## **I. Letter to Shareholders**

Over the past year, the global economic and political landscape has been dynamic, and the turbulent U.S.-China trade relations have added to the external challenges presented to corporations. Hong Hai / Foxconn Technology Group with the continued commitment and efforts of the staff, have elevated our Fortune Global 500 ranking from 25th to 24th by the Fortune Magazine. At the same time, the Group continues to lay foundation for growth of R&D: In the 2018 Top 100 Global Innovators report released by Clarivate Analytics only three institutions in Taiwan have been shortlisted, and it's with great honor for Hon Hai's to be included this year. This is an outcome of the relentless effort of the Group in creating influential development of innovation and research in the field of information technology as well as active application of international patents over the past five years. In addition, based on the 2018 Patent Application and Grant List published by the Intellectual Property Office of the Ministry of Economic Affairs, the Group was granted 246 patents in 2018, ranking the Group 6th in Taiwan. We are deeply grateful to our shareholders for their guidance and advice, as well as our customers' trust and support from our suppliers.

The outlook for 2019 is foreshadowed by global shifts in economy, with a slowdown in overall growth. Specifically, Asia is continually being affected by China's supply side structural reform; the U.S.-China trade war though waning, is still presided by high uncertainty; United States' continued raising of interest rates may lead to a sooner tightening of the global finances, and puts some Asian economies at a disadvantage; complimented by the tense geopolitical landscape with extreme weathers; a lingering threat of terrorism; all have contributed to the precariousness of the road ahead, and the challenges going forward.

In light of these macro trends, we must enforce the Group's global presence with cross-plant and international scale of operations; development of Industrial Internet of Things (IIoT) and its practical applications; to help accelerate the transformation of the Group into a technology platform company. 2019 will be focused on three main facets: "Manufacturing as Foundation, Technology as Fundamentals and Growth for the Group". The Company's core will emphasize real economy, and have identified three main sectors going forward: Intelligent Manufacturing, Internet-based Healthcare, and Data Security. Additionally, to increase competitiveness the Company will focus on increasing quality and efficiency, and lowering costs and stockpiles. The Company will operate on key strategic tenets centered on cloud computing: mobile terminals; Internet of Things (IoT); Big data; artificial intelligence (AI); high-speed networks; and robots; to consolidate industrial big data, cloud intelligence, management of data security, blockchain finance, intelligent manufacturing, and intelligent supply chains and through utilizing the "Six streams" of personnel flow, cargo flow, process flow, coupled with the flow of information, financial and technology as a basis to strive towards a society of Internet of Everything (IoE) and expedite the Company's integration into the global trend of smart industries.

Hong Hai have been leveraging roughly 40 years of our core manufacturing foundation to strive towards applications within the IIoT. Internally, parts of this long-term endeavor have already come into fruition with the help from advancements made by our big data, AI, and automation developments.

Looking forward, Hong Hai will continue to maintain a global outreach and attract the next generation of talents worldwide. Furthermore, increase material commitment in research & development, and endorsement of the latest development technology and tools to provide complete support for our employees to excel. In the next 5 years, Hong Hai will be investing tens of millions globally to establish IIoT research labs; robotics research facilities; and labs catering for IIoT and AI applications. Hong Hai / Foxconn Technology Group advocates a talent acquisition strategy of having a “global sense, being technologically adept, and of youthful vigor”, we sincerely welcome ambitious, global, passionate, professional and responsible individuals to join our family and generate value not only for Hong Hai, but that which improves lives on a global scale. Hong Hai will maintain our unabating commitment to sustainability, social responsibility, and continue to maximize value for all our shareholders.

Chairman Terry Gou

## **(9) Status of Implementation of Internal Control System**

### **a. Statement of Internal Control System**

Hon Hai Precision Industry Co., Ltd.  
Statement of Internal Controls

Date: 3/29/2019

According to the examination on internal control system done by the Company itself in 2017, we hereby states as follows:

(1) The Company's Board of Directors and management team understand their responsibilities of developing, implementing and maintaining the Company's internal control system, and such a system has been established. The purpose of establishing the internal control system is to reasonably assure the following objectives: (a) The effectiveness and efficiency of business operation (including earnings, operation performance and the safeguard of company assets); (b) Achieve the reliability, timeliness, transparency, and compliance objectives according to the relevant laws and regulations in order to provide reasonable assurances.

(2) Due to the innate limitation in designing a faultless internal control system, this system can only assure the reasonableness of the above three objectives have been fairly achieved. In addition, the effectiveness of internal control system could alter over time due to the change of business environment or situation. Since the Company's internal control system has included self-examination capability, the Company will make immediate corrections when errors are detected.

(3) The evaluation of effectiveness of the internal control system design and implementation is made in accordance with the "Guidelines for the Establishment of Internal Control Systems by Public Companies" (the Guidelines). The Guidelines are made to examine the following five factors during the management and control process:

(1) control environment, (2) risk assessment and response, (3) control activities, (4)

information and communication, and (5) supervision. Each factor also includes several items. Details of each factor can be found in the Guidelines.

(4) The Company has examined the effectiveness of each respected area in the internal control system based on the Guidelines.

(5) The examination result indicated that the Company's internal control system (including subsidiary governance) dated December 31, 2017 has effectively assured that the following objectives have been reasonably achieved during the assessing period: (a) The degree that effectiveness and efficiency of business operation; (b) The reliability of the financial and related reports; (c) The compliance of the relevant laws/regulations and company policies

## **V. Operational Highlights**

### **A. Business Activities**

#### **(1) Business Scope**

##### **(a) Major Content of Business Activities**

IT, communications, automation devices, photo-electricity, precise machinery, auto, production, sales and service related with connectors, casings, radiators, assembled parts of consuming electronics as well as assembly of network cables. The products manufactured by the Company include:

1. I/O product line: IN-PUT, OUT-PUT connectors.
2. IC line packaging and product line of expansion memory: connector for IC line and memory IC expansion bracket.
3. Product line of system connector: electrical coupler of host and branch system.
4. Product lines of network connection and output & input device: terminal, scanner, keyboard, monitor, mouse, network integrated connecting cables.
5. Photo-electricity connecting product line: optical connectors and connecting wire network used in digital network.
6. Compound connectors with electronic processing functions: filtering connectors, static-free connectors and high frequency connectors.
7. EISA graphics card connectors under new industrial standard: expansion slot connectors with open framework.
8. Casings, radiators, spare parts processed by precision metal, engineering plastic module, precise machinery components used in IT products, Bare System and consuming electronic products.
9. Assembly and processing of memory card
10. Broadband communications, wireless mobile communications and end-to-end communication products
11. Ethernet switch and wireless network products

### **(b) Operational Proportion**

100% of the products are 3C electronics (Computer, Communication, Consumer Electronics). The output and sales volume of the recent two years can be found in the table of Production and Sales.

### **(c) Current Product Items**

The Company's products cover the spares parts, modules and system assemblies for 3C electronics. The spare parts may include 3C connectors, line assembled products and other spare parts; the modules may include the machinery modules (e.g. the casing of 3C products) and electronic modules (e.g. surface adhesive product for 3C products); the system assembly is mainly for finished 3C products.

### **(d) New Products to be Developed**

As for the R&D of new products, the Company will focus on connectors such as compound, modular, high frequency, photo-electricity and surface-mounted connectors. Besides, it will follow the trend and make its computers and accessories lighter, thinner, shorter, smaller, more surface-mounted and modularized as well as integrated with communications.

## **(2) Industry Overview**

### **(a) The Current State of the Industry and Future Developments**

Looking back on 2018, many key countries' trade is still strong, with concentrated investment activities and a steady rise in consumer demand. However, with the United States' change of stance on trade policies and the gradual tightening of its monetary policies, corporate confidence and the real economy alike are feeling the tremors. During the fourth quarter, the global financial markets experienced strong turbulences, exacerbated by the slump in oil prices. With this global backdrop, manufacturers are forced into a conservative stance, inducing a drastic downturn in imports and exports for China, Japan and Korea in the fourth quarter, add to this a recent underwhelming performance in the United States' Purchasing Managers Index (PMI), a lull in the global economy seems all the more inevitable. In spite of these challenges, the United States' economy performed well in 2018, mainly fueled by the private sector investments. International institutions such as IHS Markit, Economist Information Unit, IMF and World Bank estimates that 2019 will be comparatively slow for the United States, with forecasted economic growth of 2.3-2.5%. Looking at the year ahead, with the updated findings of forecast institutions such as IMF, World

Bank, and IHS Markit, taking in consideration the uncertainties of the US-China negotiations, China's economic downturn, EU's weak growth, and a looming possibility of a no-deal Brexit, the IMF has forecasted a downward revision in global economic growth of 0.2 percentage points, while World Bank and IHS Markit revised a 0.1 percentage point decrease. Despite 2019 shaping up to be a tougher year than 2018, US-China trade negotiations are picking up, further, the United States have gradually initiated trade negotiations with other nations. With US-China still clashing, the outcome of the negotiations is pivotal and the verdict is yet to be seen.

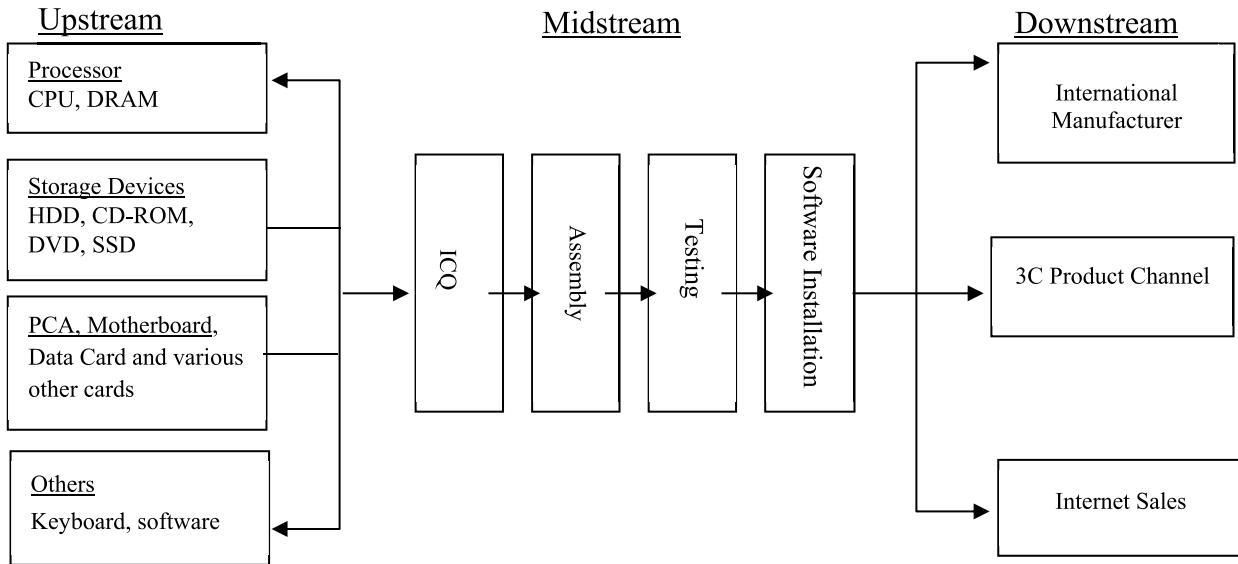

For the electronics industry, smartphones have remained the largest market in the recent years. Under the steady improvements in mobile internet coverage and broadband, the smartphone has integrated seamlessly into the lives of consumers, and globally, manufacturers have actively invested into this space. However, IDC's statistics have placed 2018 smartphone shipments at 1.4 billion units, a 4.1% YoY decrease, reflecting the saturation of the market and consumers' unwillingness to trade up devices. Looking to 2019, IDC still predicts the smartphone market to decrease by 0.8%, with a global shipment of 1.39 billion units.

Tablets, according to IDC's statistics have reached 150 million units, a 8.4% decrease from 2017, and is forecasted to decline 8.7% further, to 137 million units. Notably, general tablets are forecasted at 115 million units, with an expected continued decline, reaching a compound growth rate of -4.4%; though the market for hybrid 2-in-1 devices and their ability to cater for both entertainment and work, is expected to maintain its momentum in 2019, with annual shipments increasing 0.8% to 22 million units, and an estimated yearly compound growth rate of 4.6%.

The PC is facing stiff competition from smart devices as replacements, causing a long turnover life-cycle, and have maintained a steady decline in the recent years. According to IDC, the global shipments for PCs in 2018 were 257 million units, and is expected to marginally decline in 2019 to 254 million units, a 1.2% decrease. Among which the market for desktop computers will continue to decline in the next few years, with estimated compound growth rate of -2.6%, a contrast to the comparatively more stable laptop market, which is expected to grow slightly at a compound growth rate of 0.7%.

Regarding emerging electronic industries, such as IoT, wearables, electric vehicles, robotics, participants in the space have taken their own approaches, developed these approaches into competitive advantages, and are expected gradually enter the commercialization phase.

## (b) The Industry Value Chain and Relationships

## (c) Various Product Trends and Competition

With the recent popularization and of the smartphone, the growth of the product segment has gradually plateaued. As stated previously, the 2018 global shipments of 1.4 billion units is a YoY decrease of 4.1%, and according to IDC, the smartphone is forecasted to maintain its decline to 1.39 billion units (0.8% decrease) in 2019.

Globally, the competition for the smartphone market is increasingly fierce, with numerous manufacturers vying for market share. The overall industry has shifted towards a mid-to-low pricing strategy, causing the Average Selling Price (ASP) for smartphones to slide, and at this state, only a handful of leading brands can maintain a profit. In the meantime, brands are forced to constantly differentiate their products to stand out, resulting in smartphones with diverse applications, and related proprietary added-value services. Foldable screen; 5G; curved screen; dual camera; advanced camera features; biometrics and application integration; modular components; increase battery capacities; wireless charging; full projections; voice commands; virtual assistants; and mood sensors are just several directions smartphone manufacturers are dedicating their research and development into.

According the IDC projections, Android phones will still be the mainstay of the smartphone market, and especially competitive in the mid-to-low tier market space. 2018 global Android shipped around 1.21 billion units, and may reach 1.36 billion units in 2022, capturing 86.2% market share. Comparatively, with 14.8% market share, iOS shipped 210 million units in

2018. Android and iOS combined have accounted for 99.9% of the 2018 global smartphone market, and IDC predicts these two operating systems will continue to dominate the market, and should reach 100% market share in 2022.

For smartphone foundries, IDC's statistics show that in the third quarter of 2018, the Company ranks 2<sup>nd</sup> amongst the 10 largest smartphone foundries.

For the tablet computer market, Android is also in the lead with 105 million units shipped in 2018, amounting to a 60.3% market share; iOS on the other hand shipped 44.9 million units and holds 25.8% of the market; at 25.8% market share, Windows tablets provided 24 million units. It's worth noting that the market has responded warming to Microsoft's push to hybrid 2-in-1 tablets, resulting in a rapid segment growth. IDC estimates 22.5 million units of 2-in-1 tablets were shipped in 2018, with a growth rate of 2.7%, and a projected 2022 global shipment of 34.6 million, a YoY increase of 8.7%.

According to Digitimes research for the third quarter of 2018, the Company ranks 2<sup>nd</sup> in global tablet foundries.

In recent years, the PC industry have been stagnated due to lack of consumers' motivation to switch-up, leading to a long product turnover cycle. Adding to this the steadily increasing features of smart devices, sometimes replacing the functionalities of the PC, resulting in an overall market decline. The 2018 global PC shipments totaled 257 million units, and IDC estimates the PC to marginally decline in 2019, down to 254 million units, a 1.2% decrease. Among the product segments, the desktop is expected to continue to wane in the coming years, and is anticipated to decline at a compounding -2.6%. On the other hand, laptops are comparatively stable, and is projected to grow slightly at 0.7%.

Regarding emerging electronic industries, such as IoT, wearables, electric vehicles, robotics, participants in the space have taken their own approaches, developed these approaches into competitive advantages, and are expected gradually enter the commercialization phase.

### **(3) Technology and R&D**

#### **(a) Technical and R&D Businesses**

The Company has utilized proprietary management methods for IIDM-SM; Integration; Innovation; Design; Manufacturing to Sales; Marketing, and coupled with Precision Molding; Material Technologies; Sustainable Manufacturing Technology; SMT Manufacturing Technology; Heat Transfer Technology; Plastic Processing; Metal Processing; Testing Capabilities; Automation Capabilities; Photoelectric Consolidation

Technologies; Motherboard Design; E-Commerce Capabilities; Server Design; Wireless Communications and Light Display Modules, to achieve core competitive advantage. The Company also strives to provide the best 6C (Computers, Communication, Consumer electronics, digital Contents, Car parts and modules, Channels) foundry services with our strategic partners globally, and create maximum value for shareholders.

Looking to the future, the Company will remain committed to innovation and R&D; develop cutting-edge prospective applications; commercialize and realize product designs; bring to market the fruits of our research, and continue systemization of management processes, to solidify and maintain the Company's lead in core competencies.

## **(4) Long and Short-term Business Development Plans**

### **(a) Short-term Business Development Plans**

The Company pursues continued excellence in operational management and cost control, and provide a “One-Stop Shop” solution for global leading brands. Our commitment is to maintain the high quality of service and related added-value services enable computing, communication, consumer electronics (3C) to enrich lives of the world population. The Company will continue this pursuit and provide a diverse range of services, capture business opportunities and deepen our relationships with international brands.

In order to provide our customers with more timely services, the Company has actively established related manufacturing bases; design centers; service centers in the Europe, the Americas, and Asia to satisfy our clients' global design, manufacturing and assembly needs.

### **(b) Long-term Business Development Plans**

The Company spared no effort in innovation and R&D, with research and development centers sprawled across Asia, the Americas, and Europe, enabling around-the-clock R&D capabilities, thus enabling the shortest product-to-market cycle. The Company's global R&D center in Dingpu is

fitted with precision machinery, precision molds and nanotechnology research facilities. Leveraging the leadership of the R&D center, this enables the Company to better integrate towards technology, including forays into new territories, or applying new technologies to traditional manufacturing methods, to increase quality, reduce wasted resources, and increase global standards.

At the same time, the Company has expanded beyond the Greater China region, actively searching for investments and collaborations across US, Japan, Korea, Germany, India and South East Asian countries. In turn, uniting the world's leading technologies and talents, and creating business synergies with our partners, solidifying the Company's long-term competitive edge.

Throughout the years, the Company has actively addressed Social and Environmental Responsibility (SER) issues, both on a company-level and also an industry-level with Electronic Industry Citizenship Coalition (EICC). The Company continues to dedicate resources to address issues such as energy saving, carbon emissions, recycling and environmentally friendly initiatives. Looking to 2019, the Company will leverage innovations in software and technological services to expand the environmental protection/energy industry, and promote global energy savings and emission reduction. Simultaneously, the Company will be increasingly active in sharing the Group's global consolidated platform with like-minded companies, to "Stand Together and Strive Together", and manage the economies on a global scale. The Company seeks the cooperation of the shareholders, clients, employees, strategic partners and the general public, to promote SER related issues, accelerate the industry's global competitiveness, and create the maximum value for shareholders.

## **B. Production and Sales Status**

### **(1) Market Analysis**

#### **(a) Core Products, Sales & Services Areas**

##### **1. Components**

Computer Connectors are one of the core products of the Company, the product serves as the neural network for computer equipment and is widely used in information/communication devices, and consumer electronics. Clients focus primarily on the specifications provided by the Company, but sometimes commission designs. In the domestic market, the Company is one of the leader manufacturers of this product, and the sales department is responsible for promoting the product category to

mid-to-large sized clients, SMEs are serviced by our domestic dealers. Internationally, the sales and service is either handled directly by the head office or international subsidiaries for order transfers, and the sales promotion of the respective markets are the responsibilities of the dealers.

2. Modules

Module's specifications are mainly tailors to the clients commissioned designs; within the domestic market, the sales department is wholly responsible for the sales promotion; internationally, overseas companies oversee the local distributors and the dealers take charge of sales and promotion.

3. Assembly

Regarding the manufacturing and sales of integrating connectors; cable installation; computer foundations; surface adhesives; memory; central processing units; related software; assembly of communication and consumer electronic devices, the sales regions include the continents of Europe, the Americas, and Asia.

**(b) Market Share**

According to Bloomberg, the Company ranks first in Electronics Manufacturing Services (EMS), with a market share of 39.6%.

**(c) Future Industry Supply & Demand and Growth**

The Company's products are primarily used in industries such as communication devices (smartphones, internet-enabled devices), consumer electronics, computers, and related products, the industry developments for the respective product categories is as follows:

1. Smartphones

IDC's statistics have placed 2019 smartphone shipments of 1.39 billion units, and 1.54 billion by 2023, with an annual growth rate of 1.7%.

Currently, the United States and Western Europe are mature, saturated markets, the smartphone units in these regions have began to taper. The future demand of the smartphone relies heavily on developing regions, such as China with its increased coverage of 4G LTE, creating a surge of LTE smartphone users. Chinese smartphone brands have slowly matured and steadily captured market share. According to IDC, the top 5 brands for global smartphones' in Q3 2018 are: Samsung (YoY decrease of 13.4%, 20.3% market share), Huawei (YoY increase of 13.4%, 14.6%

market share), Apple (YoY increase of 0.5%, 13.2% market share), Xiaomi (YoY increase of 19.6%, 9.5% market share) and OPPO (YoY decrease of 1.9%, 8.4% market share). In addition to this, India is also a rapidly growing region, due to the low adoption rates of smartphones, and with the local carriers increasing internet coverage outside of tier 1 and tier 2 cities, in turn attracting many leading smartphone brands to aggressively invest in this region. With this in mind, India is expected to be a catalyst in the future growth of smartphone shipments.

Even with the many years of smartphone hardware developments behind us, the high-end products are still continuing to differentiate and innovate. Leading brands vie to increase added value for smartphones and attract additional income. Smart accessories have become a lynchpin for many brands, accessories such as bracelets, watches and external lenses. Additionally, many smartphone brands have adopted 4K screens, curved screen; dual camera; advanced camera features; biometrics and application integration; modular components; increase battery capacities; wireless charging; full projections; voice commands; virtual assistants; and mood sensors to hopes to differentiate their products.

With the increasing demand for outsourcing of global smartphone brands; the gradual reduction in the smartphone form factor; increase of functionality, the internal components are more intricate than ever. Therefore, manufacturers with a proper vertical integration and manufacturing capacity can be paramount to helping clients reduce cost, increase competitiveness. The future still holds many opportunities in this

## 2. Tablet Computers

According to IDC, tablets are projected to ship 137 million units, and decline to 122 million units by 2023, a YoY decrease of 2.8%.

IDC expects hybrid 2-in-1 devices to maintain its growth momentum in 2019, market share is projected to grow from 5.5% in 2018 to 7.1% by 2023. with annual shipments increasing 0.8% to 22 million units, and an estimated yearly compound growth rate of 4.6%. Hybrid 2-in-1 devices with keyboards or detachable tablets can cater for a diverse range of consumer needs. Following Microsoft's foray into this product segment with Surface, many brands have actively followed suit. Apart from PC brands, other handheld brands have also committed resources or are looking to compete in this market.

When comparing Tablet sizes, IDC notes that Tablets under 8”, susceptible to competition from large form-factor smartphones, will continue to decline; the future of Tablet products will focus on sizes above 8” or even 9”, with the increased screen real-estate and accompanying keyboard to satisfy the content-creation needs of consumers.

### 3. Computer Products

Comparative to the smart devices industry, the Wintel camp of PC products have lacked buzz in the recent years. The upgrade of Windows operating system and Intel chips have struggled to captivate consumers to trade-up as it used to. IDC believes that in a mature market, the PC product is reduced to just needs of replacements. In developing regions, PC have also shown little or no growth, because of the increase in functionalities from smartphones and tablet computers filling up many of the functionalities the PC once used to offer. Despite this, the PC has an irreplaceable hold on the corporate market, especially in document processing, file editing, ease of content creation, are all features that are difficult to replace with smart devices. Therefore, the PC market is still substantial, and in the consumer market, many PC brands are opting for smaller form-factors and mobility, so there is still space for development.

### 4. Cloud Computing Products

The main products includes servers, storage devices and networking devices, the related industry outlook is as follows:

- Servers/storage devices

With the advent of cloud computing, an abundance of corporate information has shifted away from the confines of physical on-site storage, and embraced cloud computing services. Coupled with the needs of calculation on the cloud, server products have also began to evolve. Digitimes Research estimates that between 2018 and 2023, server shipment is expected to grow at 14% YoY, maintaining a strong growth rate, with the main driver for this growth being the tendency for corporate units to be replaced.

Corporations and cloud service providers data processing needs grow on a daily basis, and with Big Data related technologies and solutions reaching maturity, large volumes of diverse data structures

are required to be processed quickly. Coinciding is the need for storage equipment, data back-up and recovery solutions, pushing the overall demand for storage equipment market. Currently, flexible, scaling storage, along with optimized hardware and efficient software is the golden standard for cost-performance for corporate data storage.

- Switches and Routers

With 4G becoming universal, Big Data centers and developments in IoT, brings about a increasing amounts of network traffic. Many countries have been actively expanding their 4G LTE and fiber networks and reinforcing related fundamental infrastructure. To ensure a seamless network traffic, lower response times from databases, cloud service providers have continued to invest in related infrastructure. According to IDC, global ethernet switches revenue increased by 9.1% in 2018, as the market remains healthy.

#### **(d) Competitive Niche**

- Precision molding technology
- Vertical integration and manufacturing capabilities of plastic molding, stamping, mold-flow, to mechanical components.
- Creation of internal high speed network systems
- Mechanical and barebones computer design capabilities
- Heat transfer and noise treatment capabilities
- SMT soft/hardware testing capabilities
- PCBA rapid mass production capabilities
- Photoelectric consolidation capabilities
- Management Global supply chain management know-how

#### **(e) Business Development Advantages, Disadvantages and Countermeasures**

##### **Advantages**

1. The structure of the global industry is still undergoing adjustment, the foundry requirements of 3C and electronic industries grow year over year, and is advantageous for the Company.

2. The turnaround for 3C product life cycle continue to be squeezed, and the importance of timeliness continue to play a key factor, eCMMS is in a prime position to provide speed, quality, engineering services, flexibility and cost considerations, and can assist the Company's opportunities.
3. A complete ecosystem of overseas manufacturing, which is well managed and can cater to clients' needs.
4. Globally deployed manufacturing and points of sale, increasing the consolidation of global resources while providing flexibility.
5. Standardization, computerization, and automation.
6. Establishment of series of synergistic managerial systems of industry, quality, and operations.
7. A firm grasp key capabilities of mold development, and new product development.

#### Disadvantages and Countermeasures

8. Domestic demand in Taiwan is limited

Countermeasure: With a global market and a respective global strategy, the Company is positioned to leverage cost-reductions through globalized locations and provide international clients with timely services. The global strategy is in part due to the Company's execution and the operations of eCMMS, and provides a cornerstone for the Company's competitiveness overseas.

9. Some raw materials are reliant on imports, with low domestic production

Countermeasure: With the long-term experience in managing connector related products, the Company is experienced in managing the supply-side relationships. On one hand the Company supports domestic suppliers to lower cost and reduce lead-times, on the other the Company maintains amicable relationships with large international suppliers to reduce risk and manage more sources.

10. Acquisition of land proving to be costly

Countermeasure: To offset the domestic costs of land acquisition and allocate resources more efficiently, parts of production line have been

shifted to more cost-favorable locations, this also manages location-specific risk. Additionally, the Company have established points of sale across the globe, and in turn better consolidates global resources, provides flexibility and increases the quality of service to our customers.

## **(2) Core Products, Main Applications, and Manufacturing Process**

The product segments of the Company are connectors; electronic casing; cable matching; and assembly. Connectors can be subdivided into I/O and interconnection. I/O are used in computer systems and peripherals such as mice, keyboards, display, printers, drawing machines, and network system related uses. Products examples in this category are: D-SUB connector, circular connector, flat connector, coaxial connector. Interconnection connectors are used in the main system and related devices, and is utilized between electrical components and the IC board to facilitate signals within the system and modules. For example, the connection between the motherboard, related IC boards and power supply unit. Product example in this category are: edge connectors, IC sockets, flat cable composition and connectors, various plugs and sockets. With the increasing functionality of computers, an increase in related devices, network infrastructure requirements, the demand for I/O connectors have seen an increase. On the other hand, interconnection type connectors, due to computer systems design, the trend of modularization of manufacturing, have also seen an overall increase in usage.

Cable matching is mainly catered to the customers' design, and is subdivided into functionality such as: display, mice, keyboard, network system, telecommunication device, and various circuit-enabled switches.

Assembly is also based on the design requirements by the customer, and produces various computer foundations and internal mechanisms.

### **(3) Status of Core Material Suppliers**

The Company's manufactured products such as connectors, foundations, and assembled products utilize materials such as copper, plastic pellets and auric salt, steel, and the status of suppliers are as below:

#### **1. Copper**

Have strategic alliances with several suppliers, to ensure the stability of copper supply. Prices are formulated based on LME, and the Company has dedicated personnel analyzing the market trends of the material, to ensure cost-effective purchases and ensure competitiveness.

#### **2. Plastic Pellets**

Develop connector-specific materials with domestic and international manufacturers to increase quality. The manufacturers have established a shipping warehouse in Hong Kong to ensure a steady and timely supply. Prices are negotiated annually, and leverages the Company's economy of scale for bulk purchases to ensure price competitiveness.

#### **3. Auric Salt**

Prices for auric salt are based on the international gold price, and calculated based on a formula. The supplier ships directly to the manufacturing plant to lower transportation related risks. The supplier delivers every 3 to 4 days to minimize storage overhead.

#### **4. Steel**

Develop computer foundation required materials with domestic and international manufacturers. The Company utilizes market price or annual price negotiations for steel, and leverages the Company's buying power to maintain favorable prices.

#### **5. Other material requirements for assembly or memory modules, or materials required for IC board printing, capacitors, IC**

Specific material needs from our customers can be acquired directly through the customer.

## **D. Information on Environmental Protection Costs**

### **(a) The loss caused by environmental pollution during the latest year and up to the printing date of this Annual Report:**

None

### **(b) Information on Environmental Protection Matters**

1. The main workshops and production facilities of the Company are located in Tucheng Industrial Park or Hsinchu Science Park. The Company takes environmental protection as its priority, and carries out immediate correction once discovering any problem. It also makes inspection on the existing preventive facilities. Apart from creating a good working and living environment for its employees and the neighborhood, it strictly complies with the discharge standard. For the pollution and wastes generated in the production process, the Company takes the following steps to protect the environment:
  - i. Prevention of water pollution: set up wastewater treatment plants and water quality analysis laboratory in Tucheng factory. Chemical method is applied in wastewater treatment, in which pollutants are removed from wastewater and discharged through discharge outlets. The lab has various instruments to measure temperature, PH value, chemical oxygen demand and suspended solid and analyze heavy metal, so that daily inspection on discharging water can be made and water discharge can be well controlled. The Company's factories in Huyue, Minsheng and Hsinchu all received a letter on permit to connect wastewater (or sewage) to the sewer system, under the reference of TFZ No. 1065061681, 0955060439 and YLZ No. 1000004253, and TFZ No. 1035060107 respectively.
  - ii. Prevention of stationary pollution source: waste gas is collected by extraction pipes, and released to the air after the pollutants are removed through the wet scrubber. Every year, the external testing organization is commissioned to detect the viscosity of pollutants in exhaust gas and reports the result to the competent authorities of environmental protection. The Company obtained the Operating Permit of Stationary Pollution Source in 1998 and extended it in June 2008. The permit No. is: BXCZD No. F0447-02. Currently, the total consumption of acid and alkali does not meet the control standards, and the Permit was returned to the authority per Letter No. 1012095840 from the Environmental Protection Bureau.
  - iii. Cleaning of wastes: Works are done in accordance with the Waste Cleaning Plan, and the disposal of waste is reported online in a legal

way, and wastes are legally cleaned and recycled.

- iv. Management on toxic chemicals: Toxic chemicals are stored separately and strictly controlled. Moreover, documents on use and inspection are obtained legally, and periodically reported to the component department of environmental protection.
2. The Company has been adhering to the environmental policy of “pollution control and prevention, continuous waste reduction, providing environment-friendly products, protecting the earth, creating a green enterprise,” and strictly abiding by laws and regulations on environmental protection and clients’ requirements by means of effectively controlling raw materials, manufacturing process and delivery. Besides, it is dedicated to continuous improvement in order to better product quality, make sure the products free from restricted materials and promote the transformation of upstream suppliers to green supplying chain so as to comply with RoHS requirements.

	Financial leverage	1.12	1.13	1.18	1.52	1.68	8.71

The reasons for all financial ratio changes within the most recent two years are as follows (exempt from analysis if less than 20%):

1. Interest protection: the interest protection for this period declined due increased loans for capital requirements (bonds, long/short term borrowing), resulting in an increase in interests paid for this period.
2. Cash flow adequacy ratio: cash flow decreased due to the decrease in accounts payable for this period.
3. Cash reinvestment ratio: cash flow decreased due to the decrease in accounts payable for this period.

Note: Please refer to the Formulas section below, for the formulas of items analyzed.

	Financial leverage	1.03	1.04	1.04	1.04	1.11	

The reasons for all financial ratio changes within the most recent two years are as follows (exempt from analysis if less than 20%):

1. Long-term capital to PP&E: Long-term capital to PP&E increased mainly due to the increase in new shares resulting from investment to Foxconn Industrial Internet Co., Ltd. not recognized by shareholding percentage.
2. Interest protection: the decrease in interest protection in this period is mainly due to funding needs (increase in bank loans), resulting in an increase in interests paid and decrease in income before tax.
3. Fixed assets turnover: fixed assets turnover increased mainly due to the 2017 sale of real estates, factories and equipment to Innolux, causing fixed assets to be comparatively lower than previous periods.
4. Cash flow ratio: cash flow ratio increased mainly due to the increase in the period's business activities (increase in accounts receivable).
5. Cash reinvestment ratio: cash reinvestment ratio increase mainly due to receiving cash from the period's business activities, coupled with a lower cash dividend payout than the previous year.

Note: Please refer to the details (1-6) below for the formulas of items analyzed

## **Formula:**

### (1) Financial Ratio

1. Total liabilities to Total assets = Total liabilities / Total assets
2. Long-term debts to fixed assets = (Net equity + Long-term debts) / Net fixed assets

### (2) Ability to Pay off Debt

1. Current ratio = Current Assets / Current liability
2. Quick ratio = (Current assets - Inventory - Prepaid expenses) / Current liability
3. Interest protection = Net income before income tax and interest expense / Interest expense

### (3) Ability to Operate

1. Account receivable (including account receivable and notes receivable from operation) turnover = Net sales / the Average of account receivable (including account receivable and notes receivable from operation) balance
2. A/R turnover day = 365 / account receivable turnover
3. Inventory turnover = Cost of Goods Sold / the average of inventory
4. Account payable (including account payable and notes payable from operation) turnover = Cost of goods sold / the average of account payable (including account payable and notes payable from operation) balance
5. Inventory turnover day = 365 / Inventory turnover
6. Fixed assets turnover = Net sales / Net Fixed Assets
7. Total assets turnover = Net sales / Total assets

### (4) Earning Ability

1. Return on assets = [PAT + Interest expense × (1 - interest rate)] / the average of total assets
2. Return on equity = PAT / the average of net equity
3. Net income ratio = PAT / Net sales
4. EPS = (PAT - Dividend from prefer stock) / weighted average outstanding shares

### (5) Cash Flow

1. Cash flow ratio = Cash flow from operating activities / Current liability
2. Cash flow adequacy ratio = Most recent 5-year Cash flow from operating activities / Most recent 5-year (Capital expenditure + the increase of inventory + cash dividend)
3. Cash investment ratio = (Cash flow from operating activities - cash dividend) / (Gross fixed assets + long-term investment + other assets + working capital)

### (6) Leverage

1. Operating leverage = (Net revenue - variable cost of goods sold and operating expense) / operating income
2. Financial leverage = Operating income / (Operating income - interest expenses)

For the convenience of readers and for information purpose only, the auditors' report and the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. In the event of any discrepancy between the English version and the original Chinese version or any differences in the interpretation of the two versions, the Chinese-language auditors' report and financial statements shall prevail.

## REPORT OF INDEPENDENT ACCOUNTANTS TRANSLATED FROM CHINESE

To the Board of Directors and Stockholders of Hon Hai Precision Industry Co., Ltd.

### **Opinion**

We have audited the accompanying consolidated balance sheets of Hon Hai Precision Industry Co., Ltd. and its subsidiaries (the “Group”) as at December 31, 2018 and 2017, and the related consolidated statements of comprehensive income, of changes in equity and of cash flows for the years then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, based on our audits and reports of other independent accountants, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at December 31, 2018 and 2017, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with the “Regulations Governing the Preparation of Financial Reports by Securities Issuers” and the International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the Financial Supervisory Commission.

### **Basis for opinion**

We conducted our audits in accordance with the “Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants” and generally accepted auditing standards in the Republic of China (“ROC GAAS”). Our responsibilities under those standards are further described in the Independent Accountant’s Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the Code of Professional Ethics for Certified Public Accountants in the Republic of China (the “Code”), and we have fulfilled our other ethical responsibilities in accordance with the Code. Based on our audits and the audit reports of other independent accountants, we believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### **Key audit matters**

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the year 2018. These matters were addressed in the context of our audit of the consolidated financial statements as a whole and, in forming our opinion

thereon, we do not provide a separate opinion on these matters.

Key audit matters on the consolidated financial statements for the year ended December 31, 2018 were as follows:

### **Cut-off of hub sales revenue**

#### Description

Refer to Note 4(34) for accounting policies on revenue recognition.

The Group recognises revenue upon acceptance of the goods by the customers (when control of the products is transferred) if picked up from hub. For pick-ups from hub, the Group recognises sales revenue based on movements of inventories contained in the statements or other information provided by the hub custodians. As the hubs are located around the world with numerous custodians, the frequency and contents of statements provided by custodians vary, and the process of revenue recognition involves numerous manual procedures, these factors may potentially result in inaccurate timing of sales revenue recognition and discrepancy between the physical inventory quantities in the hubs and the quantities as reflected in accounting records.

As there are numerous daily sales revenue transactions from hubs and the transaction amounts prior to and after the balance sheet date are significant to the financial statements, cut-off of hub sales revenue was identified as a key audit matter.

#### How our audit addressed the matter

We performed the following audit procedures in respect of the above key audit matter:

- A. Assessed and tested the appropriateness of internal controls over cut-off of hub sales revenue for a specific period prior to and after the balance sheet date, including agreeing to respective supporting documents provided by hub custodians, and validated the proper timing of recognising movements of inventories and respective transfer of cost of goods sold.
- B. Confirmed or conducted physical count of inventory quantities held at hubs and agreed to accounting records.

### **Allowance for inventory valuation losses**

#### Description

Refer to Note 4(14) for accounting policies on inventory valuation, Note 5(2) for uncertainty of accounting estimates and assumptions in relation to inventory valuation losses, and Note 6(7) for details of inventories. As at December 31, 2018, the Group's inventories and allowance for inventory valuation

losses amounted to NT\$649,181,868 thousand and NT\$24,156,074 thousand, respectively.

The Group is primarily engaged in manufacturing and sales of 3C electronic products. Due to rapid technological innovations, short lifespan of electronic products and fluctuations in market prices, there is a higher risk of inventory losses arising from market value decline or obsolescence. The Group recognises inventories at the lower of cost and net realisable value, and the net realisable value is estimated based on historical experience. An allowance for inventory valuation losses is provided for those inventories aged over a certain time period and those individually identified as obsolete or damaged.

As the amounts of inventories are material, the types of inventories vary, and the estimation of net realisable value for individually obsolete or damaged inventories is subject to management's judgment, we consider allowance for inventory valuation losses a key audit matter.

#### How our audit addressed the matter

We performed the following audit procedures in relation to the provision for inventory valuation losses for individually obsolete or damaged inventories:

- A. Ensured consistent application of accounting policies in relation to allowance for inventory valuation losses and assessed the reasonableness of these policies.
- B. Validated the appropriateness of system logic of inventory aging report utilised by management to ensure proper classification of inventories aged over a certain period of time.
- C. Evaluated the reasonableness of inventories individually identified as obsolete or damaged by checking the related supporting documents and comparing with the information obtained from physical inventory.
- D. Discussed with management the net realisable value of inventories aged over a certain period of time and individually identified as obsolete or damaged, validated respective supporting documents and reperformed the calculation.

### **Financial assets and financial liabilities offsetting agreement with financial institutions**

#### Description

Refer to Note 4(27) for accounting policies on offsetting of financial instruments, Note 5(1)2 for significant judgement on applying accounting policies on offsetting of financial instruments, and Note 6(14) for details of offsetting of financial instruments. As of December 31, 2018, the financial instruments that were offset amounted to NT\$1,347,892,969 thousand.

The Group has entered into financial assets and financial liabilities offsetting agreements, which

are in compliance with IAS 32, ‘Financial instruments: Presentation’, whereby financial assets and liabilities are offset and reported in the net amount since the Group has a legally enforceable right to offset the recognised amounts and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

As the determination of whether the Group meets the criteria for offsetting prescribed in IAS 32, ‘Financial instruments: Presentation’ is subject to management’s judgment, and the Group has entered into various individually significant financial assets and financial liabilities offsetting agreements, which would have a material effect on the financial statements should the financial assets and financial liabilities be presented separately, we consider offsetting of financial assets and liabilities a key audit matter.

#### How our audit addressed the matter

We performed the following audit procedures in respect of the above key audit matter:

- A. Assessed and tested internal controls over financial assets and financial liabilities offsetting agreements with financial institutions, including control processes in determining whether such agreements meet the criteria under IAS 32, ‘Financial instruments: Presentation’, and ascertained whether the offsetting made in the financial statements was properly approved and accounted for in compliance with the guidance in IAS 32.
- B. Obtained and reviewed the terms of the above agreements and confirmed whether the criteria under IAS 32, ‘Financial instruments: Presentation’ were met and the accounting treatment was prescribed in the guidance.
- C. Confirmed the existence and the rights and obligations of financial assets and financial liabilities offsetting agreements with respective financial institutions.

#### **Purchase price allocation for acquisition of Belkin International Inc.**

##### Description

Refer to Note 4(36) for the accounting policy on business combinations and Note 6(36) for the details of business combination during the year.

The Group acquired 100% equity interest in Belkin International Inc. (“Belkin”) for a consideration of NT\$27,031,880 thousand and recognised goodwill of NT\$13,563,157 thousand in 2018.

The Group is required to determine the fair values of the identifiable assets acquired and liabilities assumed of Belkin at the date of acquisition. Management engaged an independent professional appraiser to perform a fair valuation using different valuation models for different types of assets. For

details of purchase price allocation, refer to Note 6(36).

As the amount of this acquisition is material and the determination of the valuation of identified intangible assets required significant management's judgement and estimates, we consider the purchase price allocation for the acquisition of Belkin a key audit matter.

#### How our audit addressed the matter

- A. Assessed the competence and objectivity of the independent professional appraiser.
- B. Assessed management's identification of Belkin's identifiable assets acquired and liabilities assumed at the date of acquisition based on investment contracts, Belkin's financial information and the relevant accounting standards.
- C. Reviewed the appropriateness of the valuation models adopted by management, as well as the reasonableness of key assumptions, e.g. remaining useful life, royalty rate and discount rate, by comparing with the market information.
- D. Assessed the reasonableness of key assumptions underlying cash flow projections prepared by management used in the valuation models, e.g. sales growth rates and gross profit margin, by comparing these assumptions to Belkin's historical performance, market data and approved budget.

#### **Other matter – Reference to audits of other independent accountants**

We did not audit the financial statements of certain consolidated subsidiaries. Those financial statements were audited by other independent accountants, whose reports thereon have been furnished to us, and our opinion expressed herein, insofar as it relates to the amounts included in the consolidated financial statements was based solely on the reports of other independent accountants. Total assets of those consolidated subsidiaries amounted to NT\$271,749,166 thousand and NT\$254,358,470 thousand, constituting 8.04% and 7.47% of the consolidated total assets as of December 31, 2018 and 2017, respectively, and total operating revenues amounted to NT\$458,975,381 thousand and NT\$359,947,049 thousand, constituting 8.67% and 7.65% of the consolidated total operating revenues for the years then ended, respectively.

#### **Other matter – Parent company only financial reports**

We have audited and expressed an unqualified opinion on the parent company only financial statements of Hon Hai Precision Industry Co., Ltd. as at and for the years ended December 31, 2018 and

2017.

## **Responsibilities of management and those charged with governance for the consolidated financial statements**

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the “Regulations Governing the Preparation of Financial Reports by Securities Issuers” and the International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the Financial Supervisory Commission, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group’s ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including the Audit Committee, are responsible for overseeing the Group’s financial reporting process.

## **Independent accountant’s responsibilities for the audit of the consolidated financial statements**

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ROC GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ROC GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- A. Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions,

misrepresentations, or the override of internal controls.

- B. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal controls.
- C. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- D. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- E. Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- F. Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters

that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

**HON HAI PRECISION INDUSTRY CO., LTD. AND SUBSIDIARIES**  
**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**  
**FOR THE YEARS ENDED DECEMBER 31, 2018 AND 2017**  
**(EXPRESSED IN THOUSANDS OF NEW TAIWAN DOLLARS,**  
**EXCEPT AS OTHERWISE INDICATED)**

**1. HISTORY AND ORGANISATION**

Hon Hai Precision Industry Co., Ltd. (the “Company”) was incorporated as a company limited by shares under the provisions of the Company Act of the Republic of China (R.O.C.). The Company and its subsidiaries (collectively referred herein as the “Group”) are primarily engaged in the manufacture, sales and service of connectors, case, thermal module, wired/wireless communication products, optical products, power supply modules, and assemblies for use in the IT, communications, automotive equipment, precision molding, automobile, and consumer electronics industries.

**2. THE DATE OF AUTHORISATION FOR ISSUANCE OF THE CONSOLIDATED FINANCIAL STATEMENTS AND PROCEDURES FOR AUTHORISATION**

These consolidated financial statements were authorised for issuance by the Board of Directors on March 29, 2019.

**3. APPLICATION OF NEW STANDARDS, AMENDMENTS AND INTERPRETATIONS**

**(1) Effect of the adoption of new issuances of or amendments to International Financial Reporting Standards (“IFRS”) as endorsed by the Financial Supervisory Commission (“FSC”)**

New standards, interpretations and amendments endorsed by FSC effective from 2018 are as follows:

New Standards, Interpretations and Amendments	Effective date by International Accounting Standards Board
Amendments to IFRS 2, ‘Classification and measurement of share-based payment transactions’	January 1, 2018
Amendments to IFRS 4, ‘Applying IFRS 9, Financial instruments with IFRS 4, Insurance contracts’	January 1, 2018
IFRS 9, ‘Financial instruments’	January 1, 2018
IFRS 15, ‘Revenue from contracts with customers’	January 1, 2018
Amendments to IFRS 15, ‘Clarifications to IFRS 15, Revenue from contracts with customers’	January 1, 2018
Amendments to IAS 7, ‘Disclosure initiative’	January 1, 2017
Amendments to IAS 12, ‘Recognition of deferred tax assets for unrealised losses’	January 1, 2017
Amendments to IAS 40, ‘Transfers of investment property’	January 1, 2018
IFRIC 22, ‘Foreign currency transactions and advance consideration’	January 1, 2018
Annual improvements to IFRSs 2014-2016 cycle - Amendments to IFRS 1, ‘First-time adoption of International Financial Reporting Standards’	January 1, 2018

New Standards, Interpretations and Amendments

Annual improvements to IFRSs 2014-2016 cycle - Amendments to IFRS 12, 'Disclosure of interests in other entities'	January 1, 2017
Annual improvements to IFRSs 2014-2016 cycle - Amendments to IAS 28, 'Investments in associates and joint ventures'	January 1, 2018

Except for the following, the above standards and interpretations have no significant impact to the Group's financial condition and financial performance based on the Group's assessment.

A. IFRS 9, 'Financial instruments'

- (a) Classification of debt instruments is driven by the entity's business model and the contractual cash flow characteristics of the financial assets, which would be classified as financial asset at fair value through profit or loss, financial asset measured at fair value through other comprehensive income or financial asset at amortised cost. Equity instruments would be classified as financial asset at fair value through profit or loss, unless an entity makes an irrevocable election at inception to present subsequent changes in the fair value of an investment in an equity instrument that is not held for trading in other comprehensive income.
- (b) The impairment losses of debt instruments are assessed using an 'expected credit loss' approach. An entity assesses at each balance sheet date whether there has been a significant increase in credit risk on that instrument since initial recognition to recognise 12-month expected credit losses or lifetime expected credit losses (interest revenue would be calculated on the gross carrying amount of the asset before impairment losses occurred); or if the instrument has objective evidence of impairment, interest revenue after the impairment would be calculated on the book value of net carrying amount (i.e. net of credit allowance). The Company shall always measure the loss allowance at an amount equal to lifetime expected credit losses for trade receivables that do not contain a significant financing component. In line with the regulations under IFRS 9 on provision for impairment, and have no significant impact to the Group.
- (c) The Group has elected not to restate prior period financial statements using the modified retrospective approach under IFRS 9. For details of the significant effect as at January 1, 2018, please refer to Notes 12(4) B and C.

B. IFRS 15, 'Revenue from contracts with customers'

- (a) IFRS 15 requires that, when products are sold with a right of return, the entity will recognise revenue in the amount of consideration to which the entity expects to be entitled. Revenue would not be recognised for products that the entity expects to be returned. The entity raises a refund liability and an asset representing its right to recover the products from the customer.

The asset is presented separately from the refund liability.

- (b) Under IFRS 15, liabilities in relation to expected sales discounts and allowances are recognised as other current liability but were previously presented as accounts receivable - allowance for sales discounts in the balance sheet. The balance amounted to \$2,570,549 on January 1, 2018.
- (2) Effect of new issuances of or amendments to IFRSs as endorsed by the FSC but not yet adopted by the Group

New standards, interpretations and amendments endorsed by the FSC effective from 2019 are as follows:

New Standards, Interpretations and Amendments	Effective date by International Accounting Standards Board
Amendments to IFRS 9, 'Prepayment features with negative compensation'	January 1, 2019
IFRS 16, 'Leases'	January 1, 2019
Amendments to IAS 19, 'Plan amendment, curtailment or settlement'	January 1, 2019
Amendments to IAS 28, 'Long-term interests in associates and joint ventures'	January 1, 2019
IFRIC 23, 'Uncertainty over income tax treatments'	January 1, 2019
Annual improvements to IFRSs 2015-2017 cycle	January 1, 2019

Except for the following, the above standards and interpretations have no significant impact to the Group's financial condition and financial performance based on the Group's assessment.

**IFRS 16, 'Leases'**

IFRS 16, 'Leases', replaces IAS 17, 'Leases' and related interpretations and SICs. The standard requires lessees to recognise a 'right-of-use asset' and a lease liability (except for those leases with terms of 12 months or less and leases of low-value assets). The accounting stays the same for lessors, which is to classify their leases as either finance leases or operating leases and account for those two types of leases differently. IFRS 16 only requires enhanced disclosures to be provided by lessors.

The Group expects to recognise the lease contract of lessees in line with IFRS 16. However, the Group intends not to restate the financial statements of prior period (referred herein as the "modified retrospective approach"). On January 1, 2019, it is expected that 'right-of-use asset' and lease liability will both be increased by \$22,746,167. For the land use right obtained in China, it is expected that 'right-of-use asset' would be increased by \$21,316,883 and other non-current assets decreased by \$21,316,883.

(3) IFRSs issued by IASB but not yet endorsed by the FSC

New standards, interpretations and amendments issued by IASB but not yet included in the IFRSs as endorsed by the FSC are as follows:

New Standards, Interpretations and Amendments	Effective date by International Accounting Standards Board
Amendments to IAS 1 and IAS 8, ‘Disclosure Initiative-Definition of Material’	January 1, 2020
Amendments to IFRS 3, ‘Definition of a business’	January 1, 2020
Amendments to IFRS 10 and IAS 28, ‘Sale or contribution of assets between an investor and its associate or joint venture’	To be determined by International Accounting Standards Board
IFRS 17, ‘Insurance contracts’	January 1, 2021

The above standards and interpretations have no significant impact to the Group’s financial condition and financial performance based on the Group’s assessment.

**4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

Unless otherwise stated, the principal accounting policies applied in the preparation of these consolidated financial statements set out below have been consistently applied to all the periods presented.

**(1) Compliance statement**

The consolidated financial statements of the Group have been prepared in accordance with the “Regulations Governing the Preparation of Financial Reports by Securities Issuers”, International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the FSC (collectively referred herein as the “IFRSs”).

**(2) Basis of preparation**

A. Except for the following items, these consolidated financial statements have been prepared under the historical cost convention:

- (a) Financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.
- (b) Financial assets at fair value through other comprehensive income/Available-for-sale financial assets measured at fair value.
- (c) Defined benefit liabilities recognised based on the net amount of pension fund assets less present value of defined benefit obligation.

B. The preparation of financial statements in conformity with International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the FSC (collectively referred herein as the “IFRSs”) requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group’s accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 5.

C. In adopting IFRS 9 and IFRS 15 effective January 1, 2018, the Group has elected to apply modified retrospective approach whereby the cumulative impact of the adoption was recognised as retained earnings or other equity as of January 1, 2018 and the financial statements for the year ended December 31, 2017 were not restated. The financial statements for the year ended December 31, 2017 were prepared in compliance with International Accounting Standard 39 ('IAS 39'), International Accounting Standard 11 ('IAS 11'), International Accounting Standard 18 ('IAS 18') and related financial reporting interpretations. Please refer to Notes 12(4) and (5) for details of significant accounting policies.

(3) Basis of consolidation

- A. Basis for preparation of consolidated financial statements:
  - (a) All subsidiaries are included in the Group's consolidated financial statements. Subsidiaries are all entities (including structured entities) controlled by the Group. The Group controls an entity when the Group is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Consolidation of subsidiaries begins from the date the Group obtains control of the subsidiaries and ceases when the Group loses control of the subsidiaries.
  - (b) Inter-company transactions, balances and unrealised gains or losses on transactions between companies within the Group are eliminated. Accounting policies of subsidiaries have been adjusted where necessary to ensure consistency with the policies adopted by the Group.
  - (c) Profit or loss and each component of other comprehensive income are attributed to the owners of the parent and to the non-controlling interests. Total comprehensive income is attributed to the owners of the parent and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.
  - (d) Changes in a parent's ownership interest in a subsidiary that do not result in the parent losing control of the subsidiary (transactions with non-controlling interests) are accounted for as equity transactions, i.e. transactions with owners in their capacity as owners. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity.
  - (e) When the Group loses control of a subsidiary, the Group remeasures any investment retained in the former subsidiary at its fair value. That fair value is regarded as the fair value on initial recognition of a financial asset or the cost on initial recognition of the associate or joint venture. Any difference between fair value and carrying amount is recognised in profit or loss. All amounts previously recognised in other comprehensive income in relation to the subsidiary should be reclassified from equity to profit or loss.

**(4) Foreign currency translation**

- A. The consolidated financial statements are presented in New Taiwan dollars, which is the Company's functional and the Group's presentation currency.
- B. Foreign currency transactions and balances
  - (a) Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions are recognised in profit or loss in the period in which they arise.
  - (b) Monetary assets and liabilities denominated in foreign currencies at the period end are re-translated at the exchange rates prevailing at the balance sheet date. Exchange differences arising upon re-translation at the balance sheet date are recognised in profit or loss.
  - (c) Non-monetary assets and liabilities denominated in foreign currencies held at fair value through profit or loss are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognised in profit or loss. Non-monetary assets and liabilities denominated in foreign currencies held at fair value through other comprehensive income are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognised in other comprehensive income. However, non-monetary assets and liabilities denominated in foreign currencies that are not measured at fair value are translated using the historical exchange rates at the dates of the initial transactions.
  - (d) All foreign exchange gains and losses are presented in the statement of comprehensive income within "other gains and losses".
- C. Translation of foreign operations
  - (a) The operating results and financial position of all the group entities and associates that have a functional currency different from the presentation currency are translated into the presentation currency as follows:
    - i. Assets and liabilities for each balance sheet presented are translated at the closing exchange rate at the date of that balance sheet;
    - ii. Income and expenses for each statement of comprehensive income are translated at average

- exchange rates of that period; and
- iii. All resulting exchange differences are recognised in other comprehensive income.
- (b) When the foreign operation of an associate is partially disposed of or sold, exchange differences that were recorded in other comprehensive income are proportionately reclassified to profit or loss as part of the gain or loss on sale. In addition, if the Group still retains partial interest in the former foreign associate after losing significant influence over the former foreign associate, such transactions should be accounted for as disposal of all interest in these foreign operations.
- (c) When the foreign operation partially disposed of or sold is a subsidiary, cumulative exchange differences that were recorded in other comprehensive income are proportionately transferred to the non-controlling interest in this foreign operation. In addition, even when the Group retains partial interest in the former foreign subsidiary after losing control of the former foreign subsidiary, such transactions should be accounted for as disposal of all interest in the foreign operation.
- (d) Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing exchange rates at the balance sheet date.

**(5) Classification of current and non-current items**

- A. Assets that meet one of the following criteria are classified as current assets; otherwise they are classified as non-current assets:
- (a) Assets arising from operating activities that are expected to be realised, or are intended to be sold or consumed within the normal operating cycle;
- (b) Assets held mainly for trading purposes;
- (c) Assets that are expected to be realised within twelve months from the balance sheet date;
- (d) Cash and cash equivalents, excluding restricted cash and cash equivalents and those that are to be exchanged or used to settle liabilities more than twelve months after the balance sheet date.
- B. Liabilities that meet one of the following criteria are classified as current liabilities; otherwise they are classified as non-current liabilities:
- (a) Liabilities that are expected to be settled within the normal operating cycle;
- (b) Liabilities arising mainly from trading activities;
- (c) Liabilities that are to be settled within twelve months from the balance sheet date;
- (d) Liabilities for which the repayment date cannot be extended unconditionally to more than twelve months after the balance sheet date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

**(6) Cash equivalents**

Cash equivalents refer to short-term, highly liquid investments that are readily convertible to known

amounts of cash and which are subject to an insignificant risk of changes in value. Time deposits that meet the above criteria and are held for the purpose of meeting short-term cash commitment in operations are classified as cash equivalents.

(7) Financial assets at fair value through profit or loss

- A. Financial assets at fair value through profit or loss are financial assets that are not measured at amortised cost or fair value through other comprehensive income.
- B. On a regular way purchase or sale basis, financial assets at fair value through profit or loss are recognised and derecognised using trade date accounting.
- C. At initial recognition, the Group measures the financial assets at fair value and recognises the transaction costs in profit or loss. The Group subsequently measures the financial assets at fair value, and recognises the gain or loss in profit or loss.
- D. The Group recognises the dividend income when the right to receive payment is established, future economic benefits associated with the dividend will flow to the Group and the amount of the dividend can be measured reliably.

(8) Financial assets at fair value through other comprehensive income

- A. Financial assets at fair value through other comprehensive income comprise equity securities which are not held for trading, and for which the Group has made an irrevocable election at initial recognition to recognise changes in fair value in other comprehensive income and debt instruments which meet all of the following criteria:
  - (a) The objective of the Group's business model is achieved both by collecting contractual cash flows and selling financial assets; and
  - (b) The assets' contractual cash flows represent solely payments of principal and interest.
- B. On a regular way purchase or sale basis, financial assets at fair value through other comprehensive income are recognised and derecognised using trade date accounting.
- C. At initial recognition, the Group measures the financial assets at fair value plus transaction costs. The Group subsequently measures the financial assets at fair value:
  - (a) The changes in fair value of equity investments that were recognised in other comprehensive income are reclassified to retained earnings and are not reclassified to profit or loss following the derecognition of the investment. Dividends are recognised as revenue when the right to receive payment is established, future economic benefits associated with the dividend will flow to the Group and the amount of the dividend can be measured reliably.
  - (b) Except for the recognition of impairment loss, interest income and gain or loss on foreign exchange which are recognised in profit or loss, the changes in fair value of debt instruments are taken through other comprehensive income. When the financial asset is derecognised, the cumulative gain or loss previously recognised in other comprehensive income is reclassified from equity to profit or loss.

(9) Financial assets at amortised cost

- A. Financial assets at amortised cost are those that meet all of the following criteria:

- (a) The objective of the Group's business model is achieved by collecting contractual cash flows.
- (b) The assets' contractual cash flows represent solely payments of principal and interest.
- B. On a regular way purchase or sale basis, financial assets at amortised cost are recognised and derecognised using trade date accounting.
- C. At initial recognition, the Group measures the financial assets at fair value plus transaction costs. Interest income from these financial assets is included in finance income using the effective interest method. A gain or loss is recognised in profit or loss when the asset is derecognised or impaired.
- D. The Group's time deposits which do not fall under cash equivalents are those with a short maturity period and are measured at initial investment amount as the effect of discounting is immaterial.

**(10) Accounts and notes receivable**

- A. Accounts and notes receivable entitle the Group a legal right to receive consideration in exchange for transferred goods or rendered services.
- B. The short-term accounts and notes receivable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.
- C. The Group's operating pattern of accounts receivable that are expected to be factored is for the purpose of selling, and the accounts receivable are subsequently measured at fair value, with any changes in fair value recognised in profit or loss.

**(11) Impairment of financial assets**

For debt instruments measured at fair value through other comprehensive income and financial assets at amortised cost including accounts receivable, at each reporting date, the Group recognises the impairment provision for 12 months expected credit losses if there has not been a significant increase in credit risk since initial recognition or recognises the impairment provision for the lifetime expected credit losses (ECLs) if such credit risk has increased since initial recognition after taking into consideration all reasonable and verifiable information that includes forecasts. On the other hand, for accounts receivable or contract assets that do not contain a significant financing component, the Group recognises the impairment provision for lifetime ECLs.

**(12) Derecognition of financial assets**

The Group derecognises a financial asset when one of the following conditions is met:

- A. The contractual rights to receive the cash flows from the financial asset expire.
- B. The contractual rights to receive cash flows of the financial asset have been transferred and the Group has transferred substantially all risks and rewards of ownership of the financial asset.
- C. The contractual rights to receive cash flows of the financial asset have been transferred; and the Group has not retained control of the financial asset.

**(13) Operating lease (lessor)**

Lease income from an operating lease (net of any incentives given to the lessee) is recognised in profit or loss on a straight-line basis over the lease term.

(14) Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined using the weighted-average cost method. The cost of finished goods and work in process comprises raw materials, direct labour, other direct costs and related production overheads (allocated based on normal operating capacity). It excludes borrowing costs. The item by item approach is used in applying the lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated cost of completion and applicable variable selling expenses.

(15) Investments accounted for under the equity method / associates

- A. Associates are all entities over which the Group has significant influence but not control. In general, it is presumed that the investor has significant influence, if an investor holds, directly or indirectly 20 percent or more of the voting power of the investee. Investments in associates are accounted for using the equity method and are initially recognised at cost.
- B. The Group's share of its associates' post-acquisition profits or losses is recognised in profit or loss, and its share of post-acquisition movements in other comprehensive income is recognised in other comprehensive income. When the Group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognise further losses, unless it has incurred legal or constructive obligations or made payments on behalf of the associate.
- C. When changes in an associate's equity do not arise from profit or loss or other comprehensive income of the associate and such changes do not affect the Group's ownership percentage of the associate, the Group recognises change in ownership interests in the associate in 'capital surplus' in proportion to its ownership.
- D. Unrealised gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in the associates. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been adjusted where necessary to ensure consistency with the policies adopted by the Group.
- E. In the case that an associate issues new shares and the Group does not subscribe or acquire new shares proportionately, which results in a change in the Group's ownership percentage of the associate but maintains significant influence on the associate, then 'capital surplus' and 'investments accounted for under the equity method' shall be adjusted for the increase or decrease of its share of equity interest. If the above condition causes a decrease in the Group's ownership percentage of the associate, in addition to the above adjustment, the amounts previously recognised in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately on the same basis as would be required if the relevant assets or liabilities were disposed of.
- F. Upon loss of significant influence over an associate, the Group remeasures any investment

retained in the former associate at its fair value. Any difference between fair value and carrying amount is recognised in profit or loss.

- G. When the Group disposes its investment in an associate and loses significant influence over this associate, the amounts previously recognised in other comprehensive income in relation to the associate are reclassified to profit or loss, on the same basis as would be required if the relevant assets or liabilities were disposed of. If it retains significant influence over this associate, the amounts previously recognised in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately in accordance with the aforementioned approach.
- H. When the Group disposes its investment in an associate and loses significant influence over this associate, the amounts previously recognised as capital surplus in relation to the associate are transferred to profit or loss. If it retains significant influence over this associate, the amounts previously recognised as capital surplus in relation to the associate are transferred to profit or loss proportionately.

(16) Property, plant and equipment

- A. Property, plant and equipment are initially recorded at cost. Borrowing costs incurred during the construction period are capitalized.
- B. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.
- C. While land is not depreciated, other property, plant and equipment that apply cost model are depreciated using the straight-line method to allocate their cost over their estimated useful lives. Each component of property, plant and equipment is significant in relation to the total cost of the item, it must be depreciated separately.
- D. The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each financial year-end. If expectations for the assets' residual values and useful lives differ from previous estimates or the patterns of consumption of the assets' future economic benefits embodied in the assets have changed significantly, any change is accounted for as a change in estimate under IAS 8, 'Accounting Policies, Changes in Accounting Estimates and Errors', from the date of the change.

The estimated useful lives of property, plant and equipment are as follows:

Buildings	15 ~ 51 years
(Auxiliary buildings	6 ~ 11 years)
Machinery and equipment	3 ~ 9 years
Other equipment	1 ~ 6 years

(17) Leased assets/ leases (lessee)

- A. Based on the terms of a lease contract, a lease is classified as a finance lease if the Group assumes

substantially all the risks and rewards incidental to ownership of the leased asset.

- (a) A finance lease is recognised as an asset and a liability at the lease's commencement at the lower of the fair value of the leased asset or the present value of the minimum lease payments.
  - (b) The minimum lease payments are apportioned between the finance charges and the reduction of the outstanding liability. The finance charges are allocated to each period over the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.
  - (c) Property, plant and equipment held under finance leases are depreciated over their estimated useful lives. If there is no reasonable certainty that the Group will obtain ownership at the end of the lease, the asset shall be depreciated over the shorter of the lease term and its useful life.
- B. Payments made under an operating lease (net of any incentives received from the lessor) are recognised in profit or loss on a straight-line basis over the lease term.

(18) Investment property

An investment property is stated initially at its cost and measured subsequently using the cost model. Investment property is depreciated on a straight-line basis over its estimated useful life of 6 to 51 years.

(19) Intangible assets

- A. Trademark right is stated at cost and regarded as having an indefinite useful life as it was assessed to generate continuous net cash inflow in the foreseeable future. Trademark right is not amortised, but is tested annually for impairment.
- B. Goodwill is generated by adopting the acquisition method when merger and acquisition occurs.
- C. Patent is amortised on a straight-line basis over its estimated useful life of 2 to 20 years.
- D. Customer relationship and developed technologies are amortised on a straight-line basis over its estimated life of 12 years and 2 to 7 years, respectively.

(20) Impairment of non-financial assets

- A. The Group assesses at each balance sheet date the recoverable amounts of those assets where there is an indication that they are impaired. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell or value in use. Except for goodwill, when the circumstances or reasons for recognizing impairment loss for an asset in prior periods no longer exist or diminish, the impairment loss is reversed. The increased carrying amount due to reversal should not be more than what the depreciated or amortised historical cost would have been if the impairment had not been recognised.
- B. The recoverable amount of goodwill shall be evaluated periodically. An impairment is recognised when recoverable amount is lower than carrying amount. Impairment loss should not be reversed in the future.
- C. For the purpose of impairment testing, goodwill acquired in a business combination is allocated

to each of the cash-generating units, or groups of cash-generating units, that is/are expected to benefit from the synergies of the business combination. Each unit or group of units to which the goodwill is allocated represents the lowest level within the entity at which the goodwill is monitored for internal management purposes. Goodwill is monitored at the operating segment level.

(21) Borrowings

- A. Borrowings comprise long-term and short-term bank borrowings. Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in profit or loss over the period of the borrowings using the effective interest method.
- B. Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw-down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a pre-payment for liquidity services and amortised over the period of the facility to which it relates.

(22) Notes and accounts payable

- A. Accounts payable are liabilities for purchases of raw materials, goods or services and notes payable are those resulting from operating and non-operating activities.
- B. The short-term notes and accounts payable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(23) Financial liabilities at fair value through profit or loss

- A. Financial liabilities are classified in this category of held for trading if acquired principally for the purpose of repurchasing in the short-term. Derivatives are also categorised as financial liabilities held for trading unless they are designated as hedges. Financial liabilities that meet one of the following criteria are designated as at fair value through profit or loss at initial recognition:
  - (a) Hybrid (combined) contracts; or
  - (b) They eliminate or significantly reduce a measurement or recognition inconsistency; or
  - (c) They are managed and their performance is evaluated on a fair value basis, in accordance with a documented risk management policy.
- B. At initial recognition, the Group measures the financial liabilities at fair value. All related transaction costs are recognised in profit or loss. The Group subsequently measures these financial liabilities at fair value with any gain or loss recognised in profit or loss.
- C. If the credit risk results in fair value changes in financial liabilities designated as at fair value through profit or loss, they are recognised in other comprehensive income in the circumstances other than avoiding accounting mismatch or recognising in profit or loss for loan commitments or financial guarantee contracts.

**(24) Bonds payable**

Ordinary corporate bonds issued by the Group are initially recognised at fair value less transaction costs. Any difference between the proceeds (net of transaction costs) and the redemption value is presented as an addition to or deduction from bonds payable, which is amortised to profit or loss over the period of bond circulation using the effective interest method as an adjustment to ‘finance costs’.

**(25) Convertible bonds payable**

Convertible bonds issued by the Group contain conversion options (that is, the bondholders have the right to convert the bonds into the Group’s common shares by exchanging a fixed amount of cash for a fixed number of common shares), call options and put options. The Group classifies the bonds payable upon issuance as a financial asset, a financial liability or an equity instrument in accordance with the contract terms. They are accounted for as follows:

- (a) The embedded call options and put options are recognised initially at net fair value as ‘financial assets or financial liabilities at fair value through profit or loss’. They are subsequently remeasured and stated at fair value on each balance sheet date; the gain or loss is recognised as ‘gain or loss on valuation of financial assets or financial liabilities at fair value through profit or loss’.
- (b) The host contracts of bonds or are initially recognised at fair value. Any difference between the initial recognition and the redemption value is accounted for as the premium or discount on bonds payable and subsequently is amortised in profit or loss as an adjustment to ‘finance costs’ over the period of circulation using the effective interest method.
- (c) The embedded conversion options which meet the definition of an equity instrument are initially recognised in ‘capital surplus—share options’ at the residual amount of total issue price less the amount of financial assets or financial liabilities at fair value through profit or loss and bonds payable as stated above. Conversion options are not subsequently remeasured.
- (d) Any transaction costs directly attributable to the issuance are allocated to each liability or equity component in proportion to the initial carrying amount of each abovementioned item.
- (e) When bondholders exercise conversion options, the liability component of the bonds (including bonds payable and ‘financial assets or financial liabilities at fair value through profit or loss’) shall be remeasured on the conversion date. The issuance cost of converted common shares is the total book value of the abovementioned liability component and ‘capital surplus—share options’.

**(26) Derecognition of financial liabilities**

A financial liability is derecognised when the obligation specified in the contract is either discharged or cancelled or expires.

**(27) Offsetting financial instruments**

Financial assets and liabilities are offset and reported in the net amount in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle

on a net basis or realise the asset and settle the liability simultaneously.

(28) Non-hedging and embedded derivatives

- A. Non-hedging derivatives are initially recognised at fair value on the date a derivative contract is entered into and recorded as financial assets or financial liabilities at fair value through profit or loss. They are subsequently remeasured at fair value and the gains or losses are recognised in profit or loss.
- B. Under the financial assets, the hybrid contracts embedded with derivatives are initially recognised as financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income and financial assets at amortised cost based on the contract terms.
- C. Under the non-financial assets, whether the hybrid contracts embedded with derivatives are accounted for separately at initial recognition is based on whether the economic characteristics and risks of an embedded derivative are closely related in the host contract. When they are closely related, the entire hybrid instrument is accounted for by its nature in accordance with the applicable standard. When they are not closely related, the derivative is accounted for differently from the host contract as derivative while the host contract is accounted for by its nature in accordance with the applicable standard. Alternatively, the entire hybrid instrument is designated as financial liabilities at fair value through profit or loss upon initial recognition.

(29) Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of economic resources will be required to settle the obligation and the amount of the obligation can be reliably estimated. Provisions are measured at the present value of the expenditures expected to be required to settle the obligation on the balance sheet date, which is discounted using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks specific to the obligation. When discounting is used, the increase in the provision due to passage of time is recognised as interest expense. Provisions are not recognised for future operating losses.

(30) Employee benefits

A. Short-term employee benefits

Short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in respect of service rendered by employees in a period and should be recognised as expense in that period when the employees render service.

B. Pensions

(a) Defined contribution plans

For defined contribution plans, the contributions are recognised as pension expense when they are due on an accrual basis. Prepaid contributions are recognised as an asset to the extent of a cash refund or a reduction in the future payments.

(b) Defined benefit plans

i. Net obligation under a defined benefit plan is defined as the present value of an amount

of pension benefits that employees will receive on retirement for their services with the Group in current period or prior periods. The liability recognised in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets. The net defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The rate used to discount is determined by using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension liability; when there is no deep market in high-quality corporate bonds, the Group uses interest rates of government bonds (at the balance sheet date) instead.

- ii. Remeasurements arising on defined benefit plans are recognised in other comprehensive income in the period in which they arise and are recorded as retained earnings.

C. Employees' compensation and directors' and supervisors' remuneration

Employees' compensation and directors' and supervisors' remuneration are recognised as expense and liability, provided that such recognition is required under legal or constructive obligation and those amounts can be reliably estimated. Any difference between the resolved amounts and the subsequently actual distributed amounts is accounted for as changes in estimates. If employee compensation is paid by shares, the Group calculates the number of shares based on the closing price at the previous day of the board meeting resolution.

(31) Employee share-based payment

For the equity-settled share-based payment arrangements, the employee services received are measured at the fair value of the equity instruments granted at the grant date, and are recognised as compensation cost over the vesting period, with a corresponding adjustment to equity. The fair value of the equity instruments granted shall reflect the impact of market vesting conditions and non-market vesting conditions. Compensation cost is subject to adjustment based on the service conditions that are expected to be satisfied and the estimates of the number of equity instruments that are expected to vest under the non-market vesting conditions at each balance sheet date. Ultimately, the amount of compensation cost recognised is based on the number of equity instruments that eventually vest.

(32) Income tax

- A. The tax expense for the period comprises current and deferred tax. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or items recognised directly in equity, in which cases the tax is recognised in other comprehensive income or equity.
- B. The current income tax expense is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in accordance with applicable tax regulations. It establishes provisions

where appropriate based on the amounts expected to be paid to the tax authorities. An additional tax is levied on the unappropriated retained earnings and is recorded as income tax expense in the year the stockholders resolve to retain the earnings.

- C. Deferred income tax is recognised, using the balance sheet liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated balance sheet. However, the deferred income tax is not accounted for if it arises from initial recognition of goodwill or of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is provided on temporary differences arising on investments in subsidiaries and associates, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.
- D. Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized. At each balance sheet date, unrecognised and recognised deferred income tax assets are reassessed.
- E. Current income tax assets and liabilities are offset and the net amount is reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. Deferred income tax assets and liabilities are offset on the balance sheet when the entity has the legally enforceable right to offset current tax assets against current tax liabilities and they are levied by the same taxation authority on either the same entity or different entities that intend to settle on a net basis or realise the asset and settle the liability simultaneously.
- F. A deferred tax asset shall be recognised for the carryforward of unused tax credits resulting from acquisitions of equipment or technology, research and development expenditures and equity investments to the extent that it is possible that future taxable profit will be available against which the unused tax credits can be utilized.

#### (33) Dividends

Dividends are recorded in the Company's financial statements in the period in which they are approved by the Company's shareholders. Cash dividends are recorded as liabilities; stock dividends are recorded as stock dividends to be distributed and are reclassified to ordinary shares on the effective date of new shares issuance.

#### (34) Revenue recognition

- A. The Group manufactures and sells consumer electronics products. Sales are recognised when control of the products has transferred, being when the products are delivered to the customers, the customers has full discretion over the channel and price to sell the products, and there is no unfulfilled obligation that could affect the customer's acceptance of the products. Delivery

occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the customers, and either the customers has accepted the products in accordance with the sales contract, or the Group has objective evidence that all criteria for acceptance have been satisfied.

- B. Sales revenue is recognised to the extent that a significant reversal is highly improbable based on the contractual price less the estimated sales discounts and allowances. Revenue recognition is revisited at each balance sheet date. No element of financing is deemed present as the sales are made with a credit term consistent with market practice.
- C. A receivable is recognised when the goods are delivered as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.
- D. The Group's obligation to provide a refund for faulty products under the standard warranty terms is recognised as a provision.
- E. The customer pays at the time specified in the payment schedule. If the products sold exceed the payment, a contract asset is recognised. If the payments exceed the products sold, a contract liability is recognised.

(35) Government grants

Government grants are recognised in profit or loss on a systematic basis over the periods in which the Group recognises expenses for the related costs for which the grants are intended to compensate. Government grants related to property, plant and equipment are recognised as non-current liabilities and are amortised to profit or loss over the estimated useful lives of the related assets using the straight-line method.

(36) Business combinations

- A. The Group uses the acquisition method to account for business combinations. The consideration transferred for an acquisition is measured as the fair value of the assets transferred, liabilities incurred or assumed and equity instruments issued at the acquisition date, plus the fair value of any assets and liabilities resulting from a contingent consideration arrangement. All acquisition-related costs are expensed as incurred. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. For each business combination, the Group measures at the acquisition date components of non-controlling interests in the acquiree that are present ownership interests and entitle their holders to the proportionate share of the entity's net assets in the event of liquidation at either fair value or the present ownership instruments' proportionate share in the recognised amounts of the acquiree's identifiable net assets. All other non-controlling interests should be measured at the acquisition-date fair value.
- B. The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the fair value of any previous equity interest in the acquiree over the fair value of the identifiable assets acquired and the liabilities assumed is recorded as goodwill at the

acquisition date. If the total of consideration transferred, non-controlling interest in the acquiree recognised and the fair value of previously held equity interest in the acquiree is less than the fair value of the identifiable assets acquired and the liabilities assumed, the difference is recognised directly in profit or loss on the acquisition date.

(37) Operating segments

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker, who is responsible for allocating resources and assessing performance of the operating segments.

5. CRITICAL ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS ON UNCERTAINTY

The preparation of these consolidated financial statements requires management to make critical judgments in applying the Group's accounting policies and make critical assumptions and estimates concerning future events. Assumptions and estimates may differ from the actual results and are continually evaluated and adjusted based on historical experience and other factors. The above information is addressed below:

(1) Critical judgments in applying the Group's accounting policies

A. Revenue recognition

The Group determines whether the nature of its performance obligation is to provide the specified goods or services itself (i.e. the Group is a principal) or to arrange for the other party to provide those goods or services (i.e. the Group is an agent) based on the transaction model and its economic substance. The Group is a principal if it controls a promised good or service before it transfers the good or service to a customer. The Group recognises revenue at gross amount of consideration to which it expects to be entitled in exchange for those goods or services transferred. The Group is an agent if its performance obligation is to arrange for the provision of goods or services by another party. The Group recognises revenue at the amount of any fee or commission to which it expects to be entitled in exchange for arranging for the other party to provide its goods or services.

Indicators that the Group controls the good or service before it is provided to a customer include the following:

- (a) The Group is primarily responsible for the provision of goods or services;
- (b) The Group assumes the inventory risk before transferring the specified goods or services to the customer or after transferring control of the goods or services to the customer.
- (c) The Group has discretion in establishing prices for the goods or services.

B. Offsetting financial instruments

The Company's financial assets and liabilities are offset and reported in the net amount in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

## (2) Critical accounting estimates and assumptions

The Group makes estimates and assumptions based on the expectation of future events that are believed to be reasonable under the circumstances at the end of the reporting period. The resulting accounting estimates might be different from the actual results. The estimates and assumptions that may significantly adjust the carrying amounts of assets and liabilities within the next financial year are addressed below:

### Evaluation of inventories

As inventories are stated at the lower of cost and net realisable value, the Group must determine the net realisable value of inventories on balance sheet date based on judgments and estimates. Due to the rapid technology innovation, the Group evaluates the amounts of normal inventory consumption, obsolete inventories or inventories without market selling value on balance sheet date, and writes down the cost of inventories to the net realisable value. Such an evaluation of inventories is principally based on the demand for the products within the specified period in the future. Therefore, there might be significant changes to the evaluation.

As of December 31, 2018, the carrying amount of inventories was \$625,025,794.

## 6. DETAILS OF SIGNIFICANT ACCOUNTS

### (1) Cash and cash equivalents

(a) Cross currency swap contracts

The cross currency swap contracts signed by the Company are to fulfill capital movement. For exchange rate, principals denominated in two currencies are exchanged at the same exchange rate at the initial and final exchanges. Thus, there is no foreign exchange risk. For interest rate, the fixed rate between two currencies is used to exchange. Thus, there is no interest rate risk.

(b) Forward foreign exchange contracts

The Group enters into foreign exchange forward transactions to hedge the following risk of exchange rate:

- i. Operating activities: Import of raw materials and export sales
- ii. Investing activities: Import of machinery and equipment
- iii. Financing activities: Long-term and short-term foreign currency assets and liabilities

(c) Convertible bonds payable

- i. The Company's indirect subsidiary, FIH Mobile Limited, acquired convertible bonds issued by Mango International in the amount of US\$60 million. The convertible bonds are embedded derivatives. For the year ended December 31, 2018, FIH Mobile Limited recognized valuation loss of US\$44,806 based on the estimated fair value of the convertible bonds due to significant doubt on Mango International's ability to continue as a going concern.
- ii. The Company's indirect subsidiary, PCE Paragon Solutions Kft., acquired convertible bonds issued by Nanhealth, Inc. in the amount of US\$30 million. The convertible bonds are embedded derivatives. Based on the contract, PCE Paragon Solutions Kft. has the right to require conversion after issue date and until maturity date if the written consent is submitted in advance. If there are remaining convertible bonds at maturity, such convertible bonds will be redeemed in the form of cash.

(d) Put option

The Company's subsidiary, Foxconn (Far East) Limited, acquired Foxconn Ventures Pte. Ltd. in the amount of US\$600,002 thousand, and entered into an agreement with Foxconn Ventures Pte. Ltd.'s joint venture shareholder, Softbank Group Corporation. Based on the agreement, the Company's subsidiary, Foxconn (Far East) Limited, has the right to require Foxconn Ventures Pte. Ltd.'s joint venture shareholder, Softbank Group Corporation, to repurchase Alibaba Group Holding Limited's stocks at the original investment price at the date after 2 years from date of agreement.

- D. Details of the Group's investment in equity instruments and beneficiary certificates are provided in Table 3.
- E. The Group has no financial assets at fair value through profit or loss pledged to others.
- F. Information relating to credit risk of financial assets and liabilities at fair value through profit or loss is provided in Note 12(2).
- G. Information on December 31, 2017 is provided in Note 12(4).

- A. Amounts recognised in profit or loss in relation to financial assets at amortised cost are listed below:

	<u>Year ended December 31, 2018</u>
Interest income	<u>\$ 2,517,813</u>

- B. The Group invested in the trust fund named Guangdong Finance Trust - Peng Yun Tian Hua

Collection Fund Trust in December 2017 which was mainly created for the investment in Guangzhou Guangyin Nanyue Intelligent Technology Industrial Investment Partnership. As of December 31, 2018, the Group has invested a total of RMB 3.5 billion.

The significant rights and obligations of the aforementioned investment are outlined as follows:

- (a) The preferred beneficiary has priority over ordinary beneficiary of the allocation of principal and interests (derived from the principal). The ordinary beneficiary is allocated with residual interests if there is any.
  - (b) The Group is an ordinary beneficiary whereby its right to claim interests is only subject to preferred beneficiary.
  - (c) Under the agreement, the Group will take over the share in the trust of the preferred beneficiary, Bank of Guangzhou, in case it initiates a redemption.
  - (d) For the year ended December 31, 2018, the Company collected principal and investment revenue with the conditions of the contractual arrangement.
- C. The counterparties of the Group's investments have good credit quality.
- D. Information relating to pledging as collateral of financial asset at amortised cost is provided in Note 8.
- E. Information on other current assets and investments in debt instruments without active market as of December 31, 2017 is provided in Note 12(4).

#### **(5) Notes and accounts receivable**

A. Information on business combinations, please refers to Note 6 (36).

B. For the year ended December 31, 2018, the Company recognised \$2,394,961 of goodwill which

was generated by business combination and acquisition of Nokia-branded products. For the purposes of impairment testing, goodwill has been allocated to the cash-generating unit (the ‘CGU’) relating to the Nokia-related business. The recoverable amount of this unit has been determined based on value in use calculation. The calculation uses cash flow projections based on financial budgets approved by the directors covering a five-year period. The cash flows beyond the five-year period are extrapolated using a growth rate as follows. The key assumptions for the value in use calculations are as follows:

	For the years ended December 31,	
	2018	2017
Discount rate	18.81%	17.54%
Growth rate	3%	3%

This growth rate is based on the relevant industry growth forecasts and does not exceed the average long-term growth rate for the relevant industry. Other key assumptions for the value in use calculations relate to the estimation of cash inflows and outflows, which include budget sales and gross margin. Such estimation is based on management’s experience from manufacturing of related feature phones and smart phones and management’s expectations for the market development. During the year, due to the unsatisfactory performance of the CGU and it takes longer than expected time to penetrate the market, the recoverable amount was less than its book value. Based on the valuation, an impairment loss of \$2,394,961 was allocated to the goodwill.

C. For the year ended December 31, 2018, the Company estimated goodwill amounting to \$13,563,157 due to business combinations of Belkin International Inc. (‘Belkin’). For the purposes of impairment testing, goodwill has been allocated to the CGU relating to Belkin. The recoverable amount of this unit has been determined based on a value in use calculation. The calculation uses cash flow projections based on financial budgets approved by the directors covering a five-year period.

Management determined the budgeted gross profit rate based on historical performance and the expectation of market development. The average growth rate is consistent with the relevant industry. The discount rate is based on pre-tax percentage and be adjusted for particular risk of relevant operating segment. For the year ended December 31, 2018, the discount rate used in the assumption is 10.1%.

Based on the assessment mentioned above, there is no impairment loss for the year ended December 31, 2018.

The details of amortisation are as follows:

	For the year ended December 31,	
	2018	2017

#### (19) Pensions

- A. Defined benefit plans

(a) The Company has a defined benefit pension plan in accordance with the Labor Standards Law, covering all regular employees' service years prior to the enforcement of the Labor Pension Act on July 1, 2005 and service years thereafter of employees who chose to continue to be subject to the pension mechanism under the Law. Under the defined benefit pension plan, two units are accrued for each year of service for the first 15 years and one unit for each additional year thereafter, subject to a maximum of 45 units. Pension benefits are based on the number of units accrued and the average monthly salaries and wages of the last 6 months prior to retirement. The Company contributes monthly an amount equal to 2% of the employees' monthly salaries and wages to the retirement fund deposited with Bank of Taiwan, the trustee, under the name of the independent retirement fund committee. Also, the Company would assess the balance in the aforementioned labor pension reserve account by December 31, every year. If the account balance is insufficient to pay the pension calculated by the aforementioned method to the employees expected to qualify for retirement in the following year, the Company will make contributions for the deficit by next March.

(b) The amounts recognised in the balance sheet are as follows (shown as "Other non-current liabilities"):

	December 31, 2018	December 31, 2017

(d) The Bank of Taiwan was commissioned to manage the Fund of the Company's defined benefit pension plan in accordance with the Fund's annual investment and utilization plan and the "Regulations for Revenues, Expenditures, Safeguard and Utilization of the Labor Retirement Fund" (Article 6: The scope of utilization for the Fund includes deposit in domestic or foreign financial institutions, investment in domestic or foreign listed, over-the-counter, or private placement equity securities, investment in domestic or foreign real estate securitization products, etc.). With regard to the utilization of the Fund, its minimum earnings in the annual distributions on the final financial statements shall be no less than the earnings attainable from the amounts accrued from two-year time deposits with the interest rates offered by local banks. If the earnings is less than aforementioned rates, government shall make payment for the deficit after being authorised by the Regulator. The Company has no right to participate in managing and operating that fund and hence the Company is unable to disclose the classification of plan asset fair value in accordance with IAS 19 paragraph 142. The composition of fair value of plan assets as of December 31, 2018 and 2017 is given in the Annual Labor Retirement Fund Utilization Report announced by the government.

(e) The principal actuarial assumptions used were as follows:

	Year ended December 31, 2018	Year ended December 31, 2017
Discount rate	1.10%	1.20%
Future salary increases	3.50%	3.50%

Assumptions regarding future mortality experience are set based on actuarial advice in accordance with published statistics and experience in each territory.

Because the main actuarial assumption changed, the present value of defined benefit obligation is affected. The analysis was as follows:

	Discount rate		Future salary increases	
	Increase 0.25%	Decrease 0.25%	Increase 0.25%	Decrease 0.25%
<u>December 31, 2018</u>				
Effect on present value of defined benefit obligation	(\$ 65,555)	\$ 68,439	\$ 61,659	(\$ 59,517)
<u>December 31, 2017</u>				
Effect on present value of defined benefit obligation	(\$ 78,295)	\$ 81,888	\$ 74,217	(\$ 71,512)

The sensitivity analysis above was arrived at based on one assumption which changed while the other conditions remain unchanged. In practice, more than one assumption may change all at once. The method of analysing sensitivity and the method of calculating net pension liability in the balance sheet are the same.

- (f) Expected contributions to the defined benefit pension plans of the Group for the year ending December 31, 2019 are \$21,029
- (g) As of December 31, 2018, the weighted average duration of that retirement plan is 14 years.

#### B. Defined contribution plans

- (a) Effective July 1, 2005, the Company and its domestic subsidiaries have established a defined contribution pension plan (the “New Plan”) under the Labor Pension Act (the “Act”), covering all regular employees with R.O.C. nationality. Under the New Plan, the Company and its domestic subsidiaries contribute monthly an amount based on 6% of the employees’ monthly salaries and wages to the employees’ individual pension accounts at the Bureau of Labor Insurance. The benefits accrued are paid monthly or in lump sum upon termination of employment.
- (b) The subsidiaries in mainland China have defined contribution pension plans and contribute an amount monthly based on 8%~9% of employees’ monthly salaries and wages to an independent fund administered by a government agency. The plan is administered by the government of mainland China. Other than the monthly contributions, the Group does not have further pension liabilities.
- (c) For the year ended December 31, 2018 and 2017, the subsidiaries which participated in defined contribution pension plans recognised reserve according to the respective local laws for retirement plan in the amount of \$189,224 and \$67,480, respectively. The pension costs under the defined contribution pension plans of the Group for the years ended December 31, 2018 and 2017 were \$20,913,004 and \$18,822,173, respectively.

(20) Share-based payment

#### (25) Retained earnings

- A. In accordance with the Company's Articles of Incorporation, current year's earnings must be distributed in the following order:
  - (a) Covering accumulated deficit;
  - (b) Setting aside as legal reserve equal to 10% of current year's net income.
  - (c) Setting aside a special reserve in accordance with applicable legal and regulatory requirement;

The remaining earnings along with the unappropriated earnings at the beginning of the period are considered as accumulated distributable earnings. In accordance with the dividend policy, the proposal of earnings appropriation is prepared by the Board of Directors and resolved by the shareholders.

The Company is at the growing stage. The Company's stock dividend policy shall consider the Company's current and future investment environment, capital needs, local and foreign competition situation and capital budget, along with shareholders' profit and the Company's long-term financial plans. The shareholders' dividends are appropriated based on accumulated distributable earnings, which shall not be lower than 15% of the distributable earnings for the period and the cash dividends shall not be less than 10% of the shareholders' dividends.

- B. Except for covering accumulated deficit or issuing new stocks or cash to shareholders in proportion to their share ownership, the legal reserve shall not be used for any other purpose. The use of legal reserve for the issuance of stocks or cash to shareholders in proportion to their share ownership is permitted, provided that the balance of the reserve exceeds 25% of the Company's paid-in capital.
- C. In accordance with the regulations, the Company shall set aside special reserve from the debit balance on other equity items at the balance sheet date before distributing earnings. When debit balance on other equity items is reversed subsequently, the reversed amount could be included in the distributable earnings.
- D. The appropriations of 2016 earnings had been resolved at the stockholders' meeting on June 22, 2017. The appropriations of 2017 earnings had been resolved at the stockholders' meeting on June 22, 2018. Details are summarised below:

(1) Capital management

The Group's objectives when managing capital are to safeguard the Group's ability to operate with the goal to provide returns for shareholders and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, issue new shares or sell assets to reduce debt. The Group monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings (including 'current and non-current borrowings' as shown in the consolidated balance sheet) less cash and cash equivalents. Total capital is calculated as 'equity' as shown in the consolidated balance sheet less the total intangible assets.

During 2018, the Group’s strategy, which was unchanged from 2017, was to maintain the gearing ratio at 70% or below.

## (2) Financial instruments

### A. Financial instruments by category

Please refer to the consolidated balance sheets and Note 6 for the amounts and details of the financial assets (financial assets at fair value through profit or loss, available-for-sale financial assets, financial assets at fair value through other comprehensive income, financial assets at amortised cost, investments in debt instruments without active market, accounts receivable (including related parties) and other receivables) and financial liabilities (financial liabilities at fair value through profit or loss, accounts payable (including related parties), other payables, short-term loans, long-term loans and corporate bonds payable).

### B. Financial risk management policies

#### (a) Risk categories:

The Group employs a comprehensive risk management and control system to clearly identify, measure, and control the various kinds of financial risk it faces, including market risk (including foreign exchange risk, interest rate risk and price risk), credit risk, and liquidity risk.

#### (b) Management objectives:

- i. Except for market risk, which is controlled by outside factors, the remainder of the foregoing types of risks can be controlled internally or removed from business processes. Therefore, the goal in managing each of these risks is to reduce them to zero.
- ii. As for market risk, the goal is to optimize its overall position through strict analysis, suggestion, execution and audit processes, and proper consideration of a) long-term trends in the external economic/financial environment, b) internal operating conditions, and c) the actual effects of market fluctuations.
- iii. The Group's overall risk management policy focuses on the unpredictable item of financial markets and seeks to reduce the risk that potentially pose adverse effects on the Group's financial position and financial performance.
- iv. For the information on the derivative financial instruments that the Group enters into, please refer to Note 6(2).

#### (c) Management system:

- i. Risk management is executed by the Group’s finance department by following policies approved by the Board. Through cooperation with the Group's operating units, finance department is responsible for identifying, evaluating and hedging financial risks.

- ii. The Board has a written policy covering overall risk management. It also has written policies covering specific issues, such as exchange rate risk, interest rate risk, credit risk, derivative and non-derivative financial instruments used, and the investment of excess working capital.

C. Significant financial risks and degrees of financial risks

(a) Market risk

i. Foreign exchange risk

(i) Nature:

The Group is a multinational group in the Electronics manufacturing services industry. Most of the exchange rate risk from operating activities come from:

- a. Foreign exchange risk arises from different exchange rates to functional currency as the invoice dates of accounts receivable and payable denominated in non-functional foreign currency are different. Due to the characteristics of the subcontracting industry, the Company's revenue and expenditures are mostly denominated in foreign currency. Thus, the remaining net foreign exchange risk is not material after offsetting assets and liabilities. Furthermore, although the variations in currencies of the Company's certain foreign investments in emerging countries (i.e. Brazil, Mexico, etc.) are considered huge, the percentage of the investments is not significant and thus the Company's foreign exchange risk can be maintained in the controllable range. (Note: The Group has several sites in various countries and thus is exposed to various foreign exchange risks. The main risk arises from USD and RMB.)
- b. Except for the above transactions (operating activities) recognised in the income statement, assets and liabilities recognised in the balance sheet and the net investment in foreign operations also result in the exchange rate risk.

(ii) Management:

- a. For such risks, the Group has set up policies requiring companies in the Group to manage its exchange rate risks.
- b. As to the exchange rate risk arising from the difference between various functional currencies and the reporting currency in the consolidated financial statements, it is managed by the Group's finance department.

(iii) The source:

a. U.S. dollar and NT dollar:

Foreign exchange risk arises primarily from U.S. dollar-denominated cash, cash equivalents, accounts receivable and other receivables, other assets, loans, accounts payable and other payables and other liabilities, which results in exchange loss or gain when they are converted into New Taiwan dollars.

b. U.S. dollar and RMB:

Foreign exchange risk arises primarily from U.S. dollar-denominated cash, cash equivalents, accounts receivable and other receivables, other assets, loans, accounts payable and other payables and other liabilities, which results in exchange loss or gain when they are converted into RMB.

c. JPY and NT dollar:

Foreign exchange risk arises primarily from yen-denominated loans, accounts payable and other payables, which results in exchange loss or gain when they are converted into New Taiwan dollars.

d. JPY and U.S. dollar:

Foreign exchange risk arises primarily from yen-denominated loans, accounts payable and other payables, which results in exchange loss or gain when they are converted into U.S. dollar.

(iv) Extent

The information on assets and liabilities denominated in foreign currencies whose values would be materially affected by the exchange rate fluctuations is as follows:

(v) Total exchange gain (loss), including realised and unrealised arising from significant foreign exchange variation on the monetary items held by the Group for the years ended December 31, 2018 and 2017 amounted to loss of \$8,223,722 and gain of \$8,017,861, respectively.

### ii. Equity securities

#### (i) Nature

The Group primarily invests in domestic and foreign publicly traded equity instruments, which are accounted for as financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income and available-for-sale financial assets. The price of those equity instruments will be affected by the uncertainty of the future value of the investment.

#### (ii) Extent

If such equity instruments' price rise or fall by 1%, with all other factors held constant, the impact on equity due to investments in equity instruments measured at fair value through other comprehensive income, investments in equity at fair value through profit or loss and available-for-sale equity instruments are \$887,193 and \$708,684 for the years ended December 31, 2018 and 2017, respectively.

### iii. Futures

(i) Nature

The Group is exposed to commodity price risk because of future commodity price fluctuations.

(ii) Extent

The Group sets stop-loss amount to reduce its futures market risk whenever futures contracts are entered into. As a result, there is no significant futures market risk.

iv. Cash flow and fair value interest rate risk

The Group's interest rate risk arises from long-term loans or corporate bonds with floating rates. The Company's long-term corporate bonds with fixed interest rates do not have interest rate risk or fair value interest rate risk.

Long-term loans or corporate bonds with floating rates expose the Group to cash flow interest rate risk, but most of the risks are offset by cash and cash equivalents with variable interest rates.

(b) Credit risk

- i. Credit risk refers to the risk of financial loss to the Group arising from default by the clients or counterparties of financial instruments.

According to the Group's credit policy, each local entity in the Group is responsible for managing and analysing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. The Group assesses the credit quality of the customers by taking into account their financial position, past experience and other factors to conduct its internal risk management.

Individual risk limits are set based on internal or external ratings in accordance with limits set by the board of directors. The utilisation of credit limits is regularly monitored. Major credit risk arises from cash and cash equivalents, derivative financial instruments and other financial instruments. The counterparties are banks with good credit quality and financial institutions with investment grade or above and government agencies, so there is no significant compliance concerns and credit risk.

- ii. The Group assumes that if the contract payments were past due over 90 days based on the terms, there has been a significant increase in credit risk on that instrument since initial recognition; if past due over 360 days, a default has been occurred.
- iii. The following indicators are used to determine whether the credit impairment of debt instruments has occurred:
  - (i) It becomes probable that the issuer will enter bankruptcy or other financial reorganization due to their financial difficulties;
  - (ii) Default or delinquency in interest or principal repayments;
  - (iii) Adverse changes in national or regional economic conditions that are expected to cause a default.

iv. The aging analysis of notes receivable and accounts receivable (including related parties) is as follows:

	<u>December 31, 2018</u>	<u>December 31, 2017</u>
Not past due	\$ 1,015,332,780	\$ 1,219,578,117
Up to 90 days	36,344,306	14,184,411
91 to 180 days	5,849,650	1,403,365
181 to 270 days	1,722,268	1,112,623
271 to 360 days	560,655	92,540
Over 361 days	2,475,697	1,253,345
	<u>\$ 1,062,285,356</u>	<u>\$ 1,237,624,401</u>

The above aging analysis is based on days overdue.

v. The Group applies the following approaches to assess the expected credit losses (ECLs) of accounts receivable:

- (i) Assess the ECLs on an individual basis if a significant default has occurred to the certain customers.
- (ii) Classify the other customers' accounts receivable based on the Group's credit rating standards and estimates the ECLs using loss rate methodology or provision matrix.
- (iii) Adjust the loss rates constructed from historical and recent information by taking into account the business cycle indicators of the National Development Council and forecasts of the Basel Committee on Banking Supervision.
- (iv) As of December 31, 2018, the individual provision for impairment of accounts receivable using loss rate methodology or provision matrix is as follows:

	Individual	Group 1	Group 2	Group 3	Group 4	Total
<u>At December 31, 2018</u>						
Expected loss rate	100%	0.03%	0.07%	1.22%~9.33%	1.45%~25.11%

Group 1: Standard Poor's, Fitch's, or Moody's rating of A-level, or rated as A-level in accordance with the Group's credit policies for those that have no external credit ratings.

Group 2: Standard Poor's or Fitch's rating of BBB, Moody's rating of Baa, or rated as B or C in accordance with the Group's credit policies for those that have no external credit ratings.

Group 3: Standard Poor's or Fitch's rating of BB + and below, or Moody's rating of Ba1 and below.

Group 4: Rated as other than A, B, or C in accordance with the Group's credit policies for those that have no external credit ratings.

vi. The Group assessed the impairment loss arising from loans to related parties and

recognised allowance for uncollectible accounts at \$530,749 for the year ended December 31, 2018.

- vii. Movements in relation to the Group applying the simplified approach to provide loss allowance for accounts receivable (including related parties) is as follows:

	<u>Year ended December 31, 2018</u>
	<u>Accounts receivable</u>
At January 1_IAS 39	\$ 4,559,395
Adjustment under new standards	-
At January 1_IFRS 9	4,559,395

Effect of foreign exchange	( 5,606)
At December 31	<u>\$ 4,748,936</u>

- viii. Information on December 31, 2017 is provided in Note 12(4).

(c) Liquidity risk

- i. Cash flow forecasting is performed by each operating entity of the Group and aggregated by Group treasury. The Group treasury monitors rolling forecasts of the Group's liquidity requirements to ensure it has sufficient cash to meet operational needs while maintaining sufficient headroom on its undrawn committed borrowing facilities at all times so that the Group does not breach borrowing limits or covenants (where applicable) on any of its borrowing facilities. Such forecasting takes into consideration the Group's debt financing plans, covenant compliance, compliance with internal balance sheet ratio targets and, if applicable, external regulatory or legal requirements, for example, currency restrictions.
- ii. The table below analyses the Group's non-derivative financial liabilities and net-settled or gross-settled derivative financial liabilities into relevant maturity groups based on the remaining period at the balance sheet date to the contractual maturity date for non-derivative financial liabilities and to the expected maturity date for derivative financial liabilities. The amounts disclosed in the table are the contractual undiscounted cash flows.

Non-derivative financial liabilities:

**(3) Fair value information**

A. The different levels that the inputs to valuation techniques are used to measure fair value of financial and non-financial instruments have been defined as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date. A market is regarded as active where a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. The fair value of the Group's investment in listed stocks is included in Level 1.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. The fair value of the Group's investment in derivative instruments is included in Level 2.

Level 3: Unobservable inputs for the asset or liability. The fair value of the Group's equity investment without active market is included in Level 3.

B. Fair value information of investment property at cost is provided in Note 6(10).

C. Financial instruments not measured at fair value

(a) Except for those listed in the table below, the carrying amounts of the Group's financial instruments not measured at fair value (including cash and cash equivalents, notes and accounts receivable, other receivables, financial assets at amortised cost (excluding bank debentures), short-term loans, notes and accounts payable, other payable and long-term loans approximate to their fair values.

December 31, 2018				
	Fair Value			
	Book Value	Level 1	Level 2	Level 3
Financial liabilities:				
Bonds payable	\$ 190,793,600	\$ -	\$ 185,311,327	\$ -

	Book Value	Level 1	Level 2	Level 3
Financial liabilities:				
Bonds payable	\$ 206,591,488	\$ -	\$ 200,480,803	\$ -

(b) The methods and assumptions of fair value measurement are as follows:

Bonds payable: Regarding the bonds issued by the Group, the coupon rate approximates to the current market rate. Therefore, the fair value is estimated using the present value of the expected cash flows and market interest rate.

D. The related information of financial and non-financial instruments measured at fair value by level on the basis of the nature, characteristics and risks of the assets and liabilities at December 31, 2018 and 2017 is as follows:

(b) The methods and assumptions the Group used to measure fair value are as follows:

- i. The instruments the Group used market quoted prices as their fair values (that is, Level 1) are listed below by characteristics:

	Listed shares	Open-end fund
Market quoted price	Closing price	Net asset value

- ii. Except for financial instruments with active markets, the fair value of other financial instruments is measured by using valuation techniques or by reference to counterparty quotes. The fair value of financial instruments measured by using valuation techniques method can be referred to current fair value of instruments with similar terms and characteristics in substance, discounted cash flow method or other valuation methods, including calculated by applying model using market information available at the consolidated balance sheet date.
- iii. When assessing non-standard and low-complexity financial instruments, for example, cross currency swap contracts, debt instruments without active market, foreign exchange swap contracts and options, the Group adopts valuation technique that is widely used by market participants. The inputs used in the valuation method to measure these financial instruments are normally observable in the market.
- iv. The valuation of derivative financial instruments is based on valuation model widely accepted by market participants, such as present value techniques and option pricing models. Forward exchange contracts are usually valued based on the current forward exchange rate. Put option is evaluated by option-pricing model (Black-Scholes model.)
- v. The output of valuation model is an estimated value and the valuation technique may not be able to capture all relevant factors of the Group's financial and non-financial instruments. Therefore, the estimated value derived using valuation model is adjusted accordingly with additional inputs, for example, model risk or liquidity risk and etc. In accordance with the Group's management policies and relevant control procedures relating to the valuation models used for fair value measurement, management believes adjustment to valuation is necessary in order to reasonably represent the fair value of financial and non-financial instruments at the consolidated balance sheet. The inputs and pricing information used during valuation are carefully assessed and adjusted based on current market conditions.
- vi. The Group takes into account adjustments for credit risks to measure the fair value of financial and non-financial instruments to reflect credit risk of the counterparty and the Group's credit quality.

- E. For the years ended December 31, 2018 and 2017, there was no transfer between Level 1 and Level 2.
- F. The following chart is the movement of Level 3 for the year ended December 31, 2018:

	<u>Year ended December 31, 2018</u>

G. Investment segment is in charge of valuation procedures for fair value measurements being categorised within Level 3, which is to verify independent fair value of financial instruments. Such assessment is to ensure the valuation results are reasonable by applying independent information to make results close to current market conditions, confirming the resource of information is independent, reliable and in line with other resources and represented as the exercisable price, and frequently calibrating valuation model, performing back-testing, updating inputs used to the valuation model and making any other necessary adjustments to the fair value. Investment segment sets up valuation policies, valuation processes and rules for measuring fair value of financial instruments and ensures compliance with the related requirements in IFRS.

I. The Group has carefully assessed the valuation models and assumptions used to measure fair value. However, use of different valuation models or assumptions may result in different measurement. The following is the effect of profit or loss or of other comprehensive income from

financial assets and liabilities categorised within Level 3 if the inputs used to valuation models have changed:

#### (4) Effects on initial application of IFRS 9

##### A. Summary of significant accounting policies adopted in 2017:

###### (a) Financial assets at fair value through profit or loss

- i. Financial assets at fair value through profit or loss are financial assets held for trading or designated as at fair value through profit or loss on initial recognition. Financial assets are classified in this category of held for trading if acquired principally for the purpose of selling in the short-term. Derivatives are also categorized as financial assets held for trading unless they are designated as hedges. Financial assets that meet one of the following criteria are designated as at fair value through profit or loss on initial recognition:
  - (i) Hybrid (combined) contracts; or
  - (ii) Capable of eliminating or significantly reducing a measurement or recognition inconsistency; or
  - (iii) Performance is evaluated on a fair value basis, in accordance with a documented risk management or investment strategy.
- ii. On a regular way purchase or sale basis, financial assets at fair value through profit or loss are recognised and derecognised using trade date accounting.
- iii. Financial assets at fair value through profit or loss are initially recognised at fair value. Related transaction costs are expensed in profit or loss. These financial assets are subsequently remeasured and stated at fair value, and any changes in the fair value of these financial assets are recognised in profit or loss.

###### (b) Available-for-sale financial assets

- i. Available-for-sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories.
- ii. On a regular way purchase or sale basis, available-for-sale financial assets are recognised and derecognised using trade date accounting.
- iii. Available-for-sale financial assets are initially recognised at fair value plus transaction costs. These financial assets are subsequently remeasured and stated at fair value, and any changes in the fair value of these financial assets are recognised in other comprehensive income. Investments in equity instruments that do not have a quoted market price in an

active market and whose fair value cannot be reliably measured or derivatives that are linked to and must be settled by delivery of such unquoted equity instruments are presented in ‘financial assets measured at cost’.

(c) Loans and receivables

i. Accounts receivable

Accounts receivable are loans and receivables originated by the entity. They are created by the entity by selling goods or providing services to customers in the ordinary course of business. Accounts receivable are initially recognised at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment. However, short-term accounts receivable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

ii. Investments in debt instruments without active market

- (i) Investments in debt instruments without active market are loans and receivables not originated by the entity. They are bond investments with fixed or determinable payments that are not quoted in an active market, and also meet all of the following conditions:
  - a. Not designated on initial recognition as at fair value through profit or loss;
  - b. Not designated on initial recognition as available-for-sale;
  - c. Not for which the holder may not recover substantially all of its initial investment, other than because of credit deterioration.
- (ii) On a regular way purchase or sale basis, investments in debt instruments without active market are recognised and derecognised using trade date accounting.
- (iii) Investments in debt instruments without active market are initially recognised at fair value on the trade date plus transaction costs and subsequently measured at amortised cost using the effective interest method, less provision for impairment. Amortisation of a premium or a discount on such assets is recognised in profit or loss.

(d) Impairment of financial assets

- i. The Group assesses at balance sheet date whether there is objective evidence that an individual financial asset or a group of financial assets is impaired as a result of one or more events that occurred after the initial recognition of the asset (a ‘loss event’) and that loss event (or events) has an impact on the estimated future cash flows of the individual financial asset or group of financial assets that can be reliably estimated.
- ii. The criteria that the Group uses to determine whether there is an impairment loss is as follows:
  - (i) Significant financial difficulty of the issuer or debtor;
  - (ii) A breach of contract, such as a default or delinquency in interest or principal payments;
  - (iii) The Group, for economic or legal reasons relating to the borrower’s financial difficulty, granted the borrower a concession that a lender would not otherwise consider;

- (iv) Increase in probability of the borrower going bankruptcy or suffering financial reorganisation;
- (v) The disappearance of an active market for that financial asset because of financial difficulties;
- (vi) Observable data indicating that there is a measurable decrease in the estimated future cash flows from a group of financial assets since the initial recognition of those assets, although the decrease cannot yet be identified with the individual financial asset in the group, including adverse changes in the payment status of borrowers in the group or national or local economic conditions that correlate with defaults on the assets in the group;
- (vii) Information about significant changes with an adverse effect that have taken place in the technology, market, economic or legal environment in which the issuer operates, and indicates that the cost of the investment in the equity instrument may not be recovered; or
- (viii) A significant or prolonged decline in the fair value of an investment in an equity instrument below its cost.

iii. When the Group assesses that there has been objective evidence of impairment and an impairment loss has occurred, accounting for impairment is made as follows according to the category of financial assets:

(i) Financial assets measured at amortised cost

The amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the financial asset's original effective interest rate, and is recognised in profit or loss. If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment loss was recognised, the previously recognised impairment loss is reversed through profit or loss to the extent that the carrying amount of the asset does not exceed its amortised cost that would have been at the date of reversal had the impairment loss not been recognised previously. Impairment loss is recognised and reversed by adjusting the carrying amount of the asset directly.

(ii) Financial assets measured at cost

The amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at current market return rate of similar financial asset, and is recognised in profit or loss. Impairment loss recognised for this category shall not be reversed subsequently. Impairment loss is recognised by adjusting the carrying amount of the asset directly.

(iii) Available-for-sale financial assets

The amount of the impairment loss is measured as the difference between the asset's

acquisition cost (less any principal repayment and amortisation) and current fair value, less any impairment loss on that financial asset previously recognised in profit or loss, and is reclassified from ‘other comprehensive income’ to ‘profit or loss’. If, in a subsequent period, the fair value of an investment in a debt instrument increases, and the increase can be related objectively to an event occurring after the impairment loss was recognised, such impairment loss is reversed through profit or loss. Impairment loss of an investment in an equity instrument recognised in profit or loss shall not be reversed through profit or loss. Impairment loss is recognised and reversed by adjusting the carrying amount of the asset directly.

B. The reconciliations of carrying amount of financial assets transferred from December 31, 2017, IAS 39, to January 1, 2018, IFRS 9, were as follows:

- (a) Under IAS 39, because the cash flows of debt instruments, which were classified as debt instruments without active market, amounting to \$4,571,100, met the condition that it is intended to settle the principal and interest on the outstanding principal balance, they were reclassified as "financial assets at amortised cost" amounting to \$4,571,100.
- (b) Under IAS 39, the financial assets, which were classified as other current assets, amounting to \$134,524,586, met the condition that it is intended to settle the principal and interest on the outstanding principal balance, they were reclassified as "financial assets at amortised cost" amounting to \$134,524,586.
- (c) Under IAS 39, because the equity instruments, which were classified as available-for-sale financial assets and financial assets at cost, amounting to \$40,243,070 and \$22,303,863, respectively, were not held for the purpose of trading, they were reclassified as "financial assets at fair value through other comprehensive income (equity instruments)" amounting to \$64,975,925, and accordingly retained earnings was increased and other equity interest was increased in the amounts of \$1,005,821 (including owners of equity and non-controlling interest in the amount of \$853,301 and \$152,520, respectively) and \$1,423,171 (including increasing owners of equity and decreasing non-controlling interest in the amount of \$1,583,248 and \$160,077, respectively) on initial application of IFRS 9.
- (d) Under IAS 39, the equity instruments, which were classified as available-for-sale financial assets and financial assets at cost, amounting to \$30,625,352 and \$27,557,776, respectively, were reclassified as "financial assets at fair value through profit or loss (equity instruments)" amounting to \$57,159,800, and accordingly, retained earnings was increased and other equity interest was decreased in the amounts of \$11,450,731 (including owners of equity and non-controlling interest in the amount of \$6,456,365 and \$4,994,366, respectively) and \$12,474,059 (including owners of equity and non-controlling interest in the amount of \$7,190,022 and \$5,284,037, respectively) under IFRS 9.

(i) Cross currency swap contracts

The cross currency swap contracts signed by the Company are to fulfill capital movement. For exchange rate, principals denominated in two currencies are exchanged at the same exchange rate at the initial and final exchanges. Thus, there is no foreign exchange risk. For interest rate, the fixed rate between two currencies is used to exchange. Thus, there is no interest rate risk.

(ii) Forward foreign exchange contracts

The Group enters into foreign exchange forward transactions to hedge the following risk of exchange rate:

- a. Operating activities: Import of raw materials and export sales
- b. Investing activities: Import of machinery and equipment
- c. Financing activities: Long-term and short-term foreign currency assets and liabilities

(iii) Financial products

All of the structured products the Group entered into an agreement with financial institutions pertain to hybrid financial products which are principal guaranteed products in combination with embedded derivative financial products. The abovementioned agreement is designated as “financial assets at fair value through profit or loss” altogether upon initial recognition.

(iv) Convertible bonds payable

The Company’s indirect subsidiary, FIH Mobile Limited, acquired convertible bonds issued by Mango International in the amount of US\$60 million. The convertible bonds are embedded derivatives, and have been designated as financial assets at fair value through profit or loss at initial recognition. FIH Mobile Limited provided inventories, valued at US\$60 million, to Mango International upon acquisition of Mango International’s convertible bonds. Based on the contract, FIH Mobile Limited and Mango International both have the right to require conversion after issue date and until maturity date if FIH Mobile Limited or Mango International has the written consent in advance. If there are remaining convertible bonds at maturity, such convertible bonds

will be converted automatically to Mango International's common stocks.

(v) Put option

The Company's subsidiary, Foxconn (Far East) Limited, acquired Foxconn Ventures Pte. Ltd. in the amount of US\$600,002 thousand, and entered into an agreement with Foxconn Ventures Pte. Ltd.'s joint venture shareholder, Softbank Group Corporation. Based on the agreement, the Company's subsidiary, Foxconn (Far East) Limited, has the right to require Foxconn Ventures Pte. Ltd.'s joint venture shareholder, Softbank Group Corporation, to repurchase Alibaba Group Holding Limited's stocks at the original investment price at the date after 2 years from date of agreement.

iv. The Group has no financial assets at fair value through profit or loss pledged to others.

	<u>\$ 134,524,586</u>

i. The Group has signed a contract for capital guarantee financial products with the bank. For the year ended December 31, 2017, the expected range for annualised rate of return is between 1.55%~5%.

ii. Details of other current assets pledged as collateral are provided in Note 8.

(d) Financial assets carried at cost

Items	<u>December 31, 2017</u>
Non-current item:	
Unlisted stocks	<u>\$ 49,861,639</u>
i. According to the Group's intention, its investments in above equity instruments should be classified as "available-for-sale financial assets". However, as the above equity instruments are not traded in active market, and no sufficient industry information of companies similar to the above companies or no financial information of the above companies can be obtained, the fair value of the investment in above equity instruments cannot be measured reliably. Accordingly, the Group classified those stocks as 'financial assets carried at cost'.	
ii. For the year ended December 31, 2017, the Group acquired the aforementioned equity including:	
(i) Investment in shares of Katerra Inc. for a total of USD 30 million. The investee is primarily engaged in providing solutions for smart home and architecture.	
(ii) Investment in shares of NingDe Amperex Technology Ltd. for a total of RMB 1 billion. The investee is primarily engaged in manufacturing of battery cell, battery management system and power battery system.	
(iii) Investment in shares of PCCW International OTT (Cayman Islands) Holdings Limited for a total of USD 30 million. The investee is primarily engaged in IoT media and entertainment services.	
(iv) Investment in shares of Softbank Vision Fund L.P. for a total of USD 452 million. The investee is primarily engaged in IoT-related investments.	
(v) Investment in shares of Tianjin Aiqi Honghai Smart Transportation Equity Investment Fund LLP for a total of RMB 201 million. The investee is primarily engaged in investments relating to electric vehicles and driverless vehicles.	
iii. The Group invests in Jasper Infotech Private Limited (hereinafter "JIP") amounting to USD 200 million, and JIP is mainly engaged in operating online shopping platform. The Group	

evaluates that the recoverable amount of the investment is less than the carrying amount based on the latest market price, and provision for impairment loss amounted to \$6,086,126 for the year ended December 31, 2017.

- iv. The Group has assessed the aforementioned financial instruments. Because partial investment was impaired, the Group has recognised impairment loss of \$6,497,597 (shown as “other gain and loss”) for the year ended December 31, 2017.
- v. As of December 31, 2017, no financial assets measured at cost held by the Group were pledged to others.

i. The Group invested in the trust fund named Guangdong Finance Trust - Peng Yun Tian Hua Collection Fund Trust for RMB 1 billion. The fund was mainly created for the investment in Guangzhou Guangyin Nanyue Intelligent Technology Industrial Investment Partnership.	
ii. The significant rights and obligations of the aforementioned investment are outlined as follows:	
(i) The preferred beneficiary has priority over ordinary beneficiary of the allocation of principal and interests (derived from the principal). The ordinary beneficiary is allocated with residual interests if there is any.	
(ii) The Group is an ordinary beneficiary whereby its right to claim interests is only subject to preferred beneficiary.	
(iii) Under the agreement, the Group will take over the share in the trust of the preferred beneficiary, Bank of Guangzhou, in case it initiates a redemption.	
iii. Under IAS 39, ‘Financial Instruments: Recognition and Measurement’, the investment in trust fund is regarded as debt investments that are not quoted in an active market with fixed or determinable payments. Hence, it was recorded as ‘non-current bond investment without active market’.	
iv. The counterparties of the Group’s investments have good credit quality.	
v. As of December 31, 2017, the Group has no investments in debt instruments without active markets pledged to others.	

D. Credit risk information for December 31, 2017 is as follows:

- (a) Credit risk refers to the risk of financial loss to the Group arising from default by the clients or counterparties of financial instruments.
- (b) According to the Group’s credit policy, each local entity in the Group is responsible for managing and analysing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. The Group assesses the credit quality of the

customers by taking into account their financial position, past experience and other factors to conduct its internal risk management.

- (c) Individual risk limits are set based on internal or external ratings in accordance with limits set by the board of directors. The utilisation of credit limits is regularly monitored. Major credit risk arises from cash and cash equivalents, derivative financial instruments and other financial instruments. The counterparties are banks with good credit quality and financial institutions with investment grade or above and government agencies, so there is no significant compliance concerns and credit risk.
- (d) The aging analysis of notes receivable and accounts receivable (including related parties) that were past due but not impaired is as follows:

**(5) Effects of initial application of IFRS 15 and the information about application of IFRS 11 and IFRS 18 for the year ended December 31, 2017**

A. The significant accounting policies applied on revenue recognition for the year ended December 31, 2017 is set out below.

**Revenue recognition**

The Group manufactures and sells 3C products. Revenue is measured at the fair value of the consideration received or receivable, taking into account business tax, returns, rebates and discounts for the sale of goods to external customers in the ordinary course of the Group's activities. Revenue arising from the sales of goods is recognised when the Group has delivered the goods to the customer, the amount of sales revenue can be measured reliably and it is probable that the future economic benefits associated with the transaction will flow to the entity. The delivery of goods is completed when the significant risks and rewards of ownership have been transferred to the customer, the Group retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold, and the customer has accepted the goods based on the sales contract or there is objective evidence showing that all acceptance provisions have been satisfied.

B. The revenue recognised by using above accounting policies for the year ended December 31, 2017 are as follows:

	For the year ended December 31, 2017
3C products (Contain components and related electronic products)	<u>\$ 4,706,736,096</u>

C. There are no significant effects on current balance sheet and comprehensive income statement if the Group continues adopting above accounting policies.

**14. SEGMENT INFORMATION**

**(1) General information**

The Group has adopted eCMMS (E-enabled Components, Modules, Moves & Services) strategy, and provided a one-stop shop to its customers, which are primarily in the 3C industries, with a total solution for design, development, engineering, procurement, manufacturing, logistics and after-sales service. The Group segregates operating segments from both a customer service and product perspective.

In accordance with IFRS No. 8, "Operating Segments", the Group has determined the operating segments and reportable operating segments. Operating segments which have met certain quantitative threshold are disclosed individually or aggregately as reportable operating segments; other segments which have not met the quantitative threshold are included in the 'all other segments'. The Group has identified the electronic manufacturing integrated services department, which

provides global 3C production-related one-stop services, as a reportable operating segment.

(2) Measurement of segment information

The chief operating decision maker assesses performance and allocates resources of the operating segments based on each operating segment's revenue and operating income after adjusting the internal costs and allocated expenses. Except for the recognition of internal costs which shall be in accordance with the Group's related internal calculation basis, the operating segments' accounting policies are the same as disclosed in Note 4.

(3) Segment information

The financial information of reportable segments provided to chief operating decision maker is as follows:

	For the years ended December 31,	
	2018	2017
	Electronic Manufacturing Integration Service	Electronic Manufacturing Integration Service
Net external revenue	\$ 5,273,895,415	\$ 4,295,814,315

Note 1: Code of general ledger account is "investments accounted for under equity method".  
 Note 2: Code of general ledger account is "financial assets at fair value through Other Comprehensive Income". The disposal gain or loss would be reclassified from "Other Comprehensive Income" to "Retained Earnings".

Note 3: Code of general ledger account is "financial assets at amortized cost". The disposal gain and loss is from interest income.

Note 4: Code of general ledger account is "financial assets at fair value through profit or loss". Due to adoption of IFRS, it would be valued at fair value rather than recognised disposal gain or loss.

Note 5: The financial instruments meet the offsetting criteria of IAS 32. Financial assets and liabilities are offset and reported in the net amount in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

Note 6: The total amount of the Group's acquisition or sale of the same security is reaching NT\$300 million or more.

Note 7: Fill in the columns the counterparty and relationship if securities are accounted for under the equity method; otherwise leaves the columns blank.

Note 8: The counterparty is a subsidiary of the Company.

Note 1: The information of transactions between the Company and the consolidated subsidiaries should be noted in "Number" column.

(1) Number 0 represents the Company.

(2) The consolidated subsidiaries are numbered in order from number 1.

Note 2: The transaction relationships with the counterparties are as follows:

(1) The Company to the consolidated subsidiary.

(2) The consolidated subsidiary to the Company.

(3) The consolidated subsidiary to another consolidated subsidiary.

Note 3: The prices and terms to related parties were not significantly different from transactions with third parties, except for particular transactions with no similar transactions to compare with. For these transactions, the prices and terms were determined in accordance with mutual agreements.

Note 4: In calculating the ratio, the transaction amount is divided by consolidated total assets for balance sheet accounts and is divided by consolidated total revenues for income statement accounts.

Note 5: For balance sheet accounts, transactions exceeding 1% of the consolidated total assets should be disclosed; for income statement accounts, transactions exceeding 1% of the consolidated total revenue should be disclosed. All the transactions had been eliminated when preparing consolidated financial statements.

Note 6: Above transactions with related parties were based on the financial statements of the company for the same period which was audited by independent accountants.

## Audit Reports of Independent Accountants

Financial Review No. 18004661 (2019)

To Hon Hai Precision Industry Co., Ltd.

### **Opinion**

We have audited the accompanying parent company only balance sheets of Hon Hai Precision Industry Co., Ltd. (referred to as 'Hon Hai' hereinafter) as of December 31, 2018 and 2017, and the related parent company only statements of comprehensive income, parent company only statements of changes in equity, parent company only statements of cash flows for the years then ended, and notes to the parent company only financial statements (including a summary of significant accounting policies).

In our opinion, based on our audit results and the audit reports of other public accountants, the above-mentioned parent company only financial statements present fairly, in all material aspects, the parent company only financial position of Hon Hai as of December 31, 2018 and 2017, and its parent company only financial performance and parent company only cash flows then ended in accordance with "Regulations Governing the Preparation of Financial Reports by Securities Issuers."

### **Basis for Opinion**

We conducted our audits in accordance with the "Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants" and generally accepted auditing standards in the Republic of China ("ROC GAAS"). Our responsibility under such standards will be further explained in the section titled "Independent accountant's responsibilities for the audit of the parent company only financial statements" We are independent of Hon Hai in accordance with the Codes of Professional Ethics for Certified Public Accountants in the Republic of China (the "Codes"), and we have fulfilled our other ethical responsibilities in accordance with the Codes. Based on our audits and the audit reports of other independent accountants, we believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

## **Key Audit Matters**

Key audit matters refer to those matters that, in our professional judgment, were of most significance in the audit of Hon Hai's 2018 parent company only financial statements. These matters were addressed in the context of our audit of the parent company only financial statements as a whole and, in forming our opinion thereon, we do not provide a separate opinion on these matters.

Key audit matters of Hon Hai's 2018 parent company only financial statements are as follows:

### **Cut-off of hub sales revenue**

#### Description

For accounting policies on revenue recognition, please refer to Note IV (XXXIII) in the Parent Company Only Financial Statements.

Hon Hai's revenue from hub sales, among other sales patterns, is recognized when customers pick up goods from the hub (i.e. when control over goods is transferred). For pick-ups from hub, Hon Hai recognizes sales revenue based on movements of inventories contained in the statements or other information provided by the hub custodians. As the hubs are located around the world with numerous custodians, the frequency and contents of statements provided by custodians vary, and the process of revenue recognition involves numerous manual procedures, these factors may potentially result in inaccurate timing of sales revenue recognition and discrepancy between physical inventory quantities in the hubs and quantities as reflected in accounting records.

As there are numerous daily sales revenue transactions from hubs and the transaction amounts prior to and after the balance sheet date are significant to the financial statements, cut-off of hub sales revenue was identified as a key audit matter.

#### How our audit addressed the matter

We performed the following audit procedures in respect of the above key audit matter:

1. Assessed and tested the appropriateness of internal controls over cut-off of hub sales revenue for a specific time prior to and after the balance sheet date, including agreeing to respective supporting documents provided by hub custodians, and validated the proper timing of recognizing movements of inventories and respective transfer of cost of goods sold.
2. Confirmed by letter or conducted physical count of inventory quantities held at hubs and agreed to accounting records.

### **Allowance for inventory valuation losses**

## Description

Refer to Note IV(XIII) for accounting policies on inventory valuation, Note V(II) for uncertainty of accounting estimates and assumptions in relation to inventory valuation , and Note VI(VI) for details of inventories. As of December 31, 2018, Hon Hai's inventories and allowance for inventory valuation losses amounted to NT\$81,942,904 thousand and NT\$2,540,128 thousand, respectively.

Hon Hai is primarily engaged in manufacturing and sales of electronic products. Due to rapid technological innovations, short lifespan of electronic products and fluctuations in market prices, there is a higher risk of inventory losses arising from market value decline or obsolescence. Inventories sold in the ordinary course of business are measured at the lower of cost and net realizable value; the net realizable value for goods aged over a certain period of time or identified individually as obsolete is derived based on the historical experience of dealing with obsolete inventories. The aforementioned allowance for inventory valuation loss mainly comes from goods aged over a certain period of time or identified individually as obsolete or damaged.

As the amounts of inventories are material, the types of inventories vary, and the estimation of net realizable value for individually obsolete or damaged inventories is subject to management's judgment, we consider allowance for inventory valuation losses a key audit matter.

## How our audit addressed the matter

We performed the following procedures in relation to the provision for inventory valuation losses for individually obsolete or damaged inventories:

1. Ensured consistent application of accounting policies in relation to allowance for inventory valuation losses and assessed the reasonableness of these policies.
2. Validated the appropriateness of system logic of inventory aging report utilized by management to ensure proper classification of inventories aged over a certain period of time.
3. Evaluated the reasonableness of inventories individually identified as obsolete or damaged with supporting documents, and agreed to information obtained from physical inventory.
4. Discussed with management the net realizable value of inventories aged over a certain period of time and individually identified as obsolete or damaged, validated respective supporting documents and re-performed the calculation.

## **Other matters – Reference to audits of other independent accountants**

Investment accounted for under the equity method included in the Parent Company Only Financial Statements of Hon Hai Precision Industry Co., Ltd. was not audited by us, but by other independent accountants. Therefore, among our opinion on the aforementioned Parent Company Only Financial Statements, the stated amounts and other related information disclosed in Note XIII were based on the audit reports of other independent accountants. As of December 31, 2018 and 2017, the investment accounted for under the equity method amounted to NT\$40,748,228 thousand and NT\$59,283,666 thousand, respectively. Based on the financial statements for 2018 and 2017 audited by other independent accountants, the recognized comprehensive income (comprising share of profit or loss in subsidiaries, associates and joint ventures accounted for under the equity method, and share of other comprehensive income in subsidiaries, associates and joint ventures accounted for under the equity method) amounted to a loss of NT\$19,716,390 thousand and a loss of NT\$ 5,876,016 thousand, respectively.

## **Responsibilities of management and those charged with governance for the parent company only financial statements**

Management is responsible for the preparation and fair presentation of the parent company only financial statements in accordance with the “Regulations Governing the Preparation of Financial Reports by Securities Issuers”, and for such internal control as management determines is necessary to enable the preparation of the parent company only financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the parent company only financial statements, management is responsible for assessing Hon Hai’s ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate Hon Hai or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including the Audit Committee, are responsible for overseeing Hon Hai’ s financial reporting process.

## **Independent accountant’s responsibilities for the audit of the parent company only financial statements**

Our objectives are to obtain reasonable assurance about whether the parent company only financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ROC GAAS will always detect a

material misstatement when it exists. Misstatements can arise from fraud or error. Such misstatements are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these parent company only financial statements.

As part of an audit in accordance with ROC GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

Identify and assess the risks of material misstatement of the parent company only financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls.

1. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Hon Hai's internal controls.
2. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
3. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on Hon Hai's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report to the related disclosures in the parent company only financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report. However, future events or conditions may cause Hon Hai to cease to continue as a going concern.
4. Evaluate the overall presentation, structure and content of the parent company only financial statements, including the notes, and whether the parent company only financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
5. Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within Hon Hai to express an opinion on the parent company only financial statements. We are responsible for the direction, supervision and performance of the audit, and for forming an audit opinion on the parent company only financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine the key audit matters for Hon Hai's 2018 parent company only financial statements. We describe these matters in our report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

**HON HAI PRECISION INDUSTRY CO., LTD.**  
**NOTES TO THE PARENT COMPANY ONLY FINANCIAL STATEMENTS**  
**FOR THE YEARS ENDED DECEMBER 31, 2018 AND 2017**  
**(EXPRESSED IN THOUSANDS OF NEW TAIWAN DOLLARS,**  
**EXCEPT AS OTHERWISE INDICATED)**

**I. HISTORY AND ORGANIZATION**

Hon Hai Precision Industry Co., Ltd. ("the Company") was incorporated as a company limited by shares under the provisions of the Company Act of the Republic of China (R.O.C.). The Company is primarily engaged in the manufacture, sales and service of connectors, case, thermal module, wired/wireless communication products, optical products, power supply modules, and assemblies for use in the IT, communications, automotive equipment, precision molding, automobile, and consumer electronics industries.

**II. THE DATE OF AUTHORIZATION FOR ISSUANCE OF THE FINANCIAL STATEMENTS AND PROCEDURES FOR AUTHORIZATION**

The Parent Company Only Financial Statements were authorized and issued by the Board of Directors on March 29, 2019.

**III. APPLICATION OF NEW STANDARDS, AMENDMENTS AND INTERPRETATIONS**

**(I) Effect of the adoption of new issuances of or amendments to International Financial Reporting Standards ("IFRS") as endorsed by the Financial Supervisory Commission ("FSC")**

New, amended and revised International Financial Reporting Standards ("IFRS") that have been endorsed by the FSC and become effective from 2018 are stated as follows:

New Standards, Interpretations and Amendments	Effective Date by International Accounting Standards Board
Amendments to IFRS 2, 'Classification and Measurement of Share-based Payment Transactions'	January 1, 2018
Amendments to IFRS 4, 'Applying IFRS 9 Financial Instruments with IFRS 4 Insurance Contracts'	January 1, 2018
IFRS 9, 'Financial Instruments'	January 1, 2018
IFRS 15, 'Revenue from Contracts with Customers'	January 1, 2018
Amendments to IFRS 15, 'Clarifications to IFRS 15 Revenue from Contracts with Customers'	January 1, 2018
Amendments to IAS 7, 'Disclosure Initiative'	January 1, 2017
Amendments to IAS 12, 'Recognition of Deferred Tax Assets for Unrealized Losses'	January 1, 2017
Amendments to IAS 40, 'Transfers of Investment Property'	January 1, 2018
IFRIC 22, 'Foreign Currency Transactions and Advance Consideration'	January 1, 2018
Annual improvements to IFRS Standards 2014–2016 Cycle - IFRS 1, 'First-time Adoption of International Financial Reporting Standards'	January 1, 2018
Annual improvements to IFRS Standards 2014–2016 Cycle - IFRS 12, 'Disclosure of Interests in Other Entities'	January 1, 2017
Annual improvements to IFRS Standards 2014–2016 Cycle - IAS 28, 'Investments in Associates and Joint Ventures'	January 1, 2018

Based on the Company's assessment, the major effects arising from the aforementioned standards and interpretations on the Company's financial position and financial performance are stated as follows:

1. IFRS 9, 'Financial Instruments'
  - (1) Classification of debt instruments is driven by the entity's business model and the contractual cash flow characteristics of the financial assets, which would be classified as financial assets at amortized cost; equity instruments would be classified as financial assets at fair value through profit or loss, unless an entity makes an irrevocable election at inception to present in other comprehensive income subsequent changes in the fair value of an investment in an equity instrument that is not held for trading.
  - (2) The impairment losses of debt instruments are assessed using the expected credit loss approach. An entity assesses at each balance sheet date whether there has been a significant increase in credit risk on that instrument since initial recognition to recognize 12-month expected credit losses or lifetime expected credit losses (interest income would be calculated on the total carrying amount of the asset before impairment losses occurred); or if the instrument has objective evidence of impairment, interest income after the impairment would be calculated on the book value of net carrying amount (i.e., net of allowance for doubtful accounts). The Company shall always measure the loss allowance at an amount equal to lifetime expected credit losses for trade receivables that do not contain a significant financing component. The Company is in line with the regulations under IFRS 9 on provision for impairment loss, and there is no significant impact on the Company.
  - (3) The Company has elected not to restate prior period financial statements with IFRS 9 (i.e. the modified retrospective approach). For details of the significant effect as of January 1, 2018, please refer to Note XII(IV) B and C.
2. IFRS 15, 'Revenue from Contracts with Customers' and related amendments
  - (1) IFRS 15 requires that, when products are sold with a right of return, the entity will recognize revenue in the amount of consideration to which the entity expects to be entitled. Recognized revenue would not include the amount from products that the entity expects to be returned. The entity raises a refund liability and an asset representing its right to recover the products from the customer. The asset is expressed separately from the refund liability on the balance sheet.
  - (2) Under IFRS 15, refund liabilities in relation to expected sales discounts and allowances (shown as 'other current liabilities') were previously presented as accounts receivable - allowance for sales discounts in the balance sheet.

The balance amounted to \$2,391,520 on January 1, 2018.

(II) Effect of new issuances of or amendments to IFRSs as endorsed by the FSC but not yet adopted by the Company

New, amended and revised International Financial Reporting Standards ("IFRS") that have been endorsed by the FSC and become effective from 2019 are stated as follows:

New Standards, Interpretations and Amendments	Effective Date by International Accounting Standards Board
Amendments to IFRS 9, 'Prepayment Features with Negative Compensation'	January 1, 2019
IFRS 16, 'Leases'	January 1, 2019
Amendments to IAS 19, 'Plan Amendment, Curtailment or Settlement'	January 1, 2019
Amendments to IAS 28, 'Long-term Interests in Associates and Joint Ventures'	January 1, 2019
IFRIC 23, 'Uncertainty over Income Tax Treatments'	January 1, 2019
Annual improvements to IFRS Standards 2015–2017 Cycle	January 1, 2019

Except for the following, the above standards and interpretations have no significant impact on the Company's financial position and financial performance based on the Company's assessment.

**IFRS 16, 'Leases'**

IFRS 16, 'Leases,' replaces IAS 17, 'Leases' and its related interpretations and SICs. The standard requires lessees to recognize a right-of-use asset and a lease liability (except for those leases with terms of 12 months or less and leases of low-value assets). The accounting stays the same for lessors, which is to classify their leases as either finance leases or operating leases and account for those two types of leases differently. IFRS 16 only requires enhanced disclosures to be provided by lessors.

The Company expects to recognize the lease contract of lessees in line with IFRS 16. However, the Company intends not to restate the financial statements of prior period (referred to hereinafter as the "modified retrospective approach"). On January 1, 2019, it is expected that right-of-use asset and lease liability will be increased by \$253,729 and \$253,729, respectively.

(III) Effect of IFRSs issued by IASB but not yet endorsed by the FSC

New standards, interpretations and amendments issued by IASB but not yet included in the IFRSs as endorsed by the FSC are as follows:

New Standards, Interpretations and Amendments	Effective Date by International Accounting Standards Board
Amendments to IAS 1 and IAS 8, 'Disclosure Initiative—Definition of Material'	January 1, 2020
Amendments to IFRS 3, 'Definition of a Business'	January 1, 2020
Amendments to IFRS 10 and IAS 28, 'Sale or Contribution of Assets between an Investor and its Associate or Joint Venture'	To be determined by the International Accounting Standards Board
IFRS 17, 'Insurance Contracts'	January 1, 2021

The aforementioned standards and interpretations have no significant impact on the

Company's financial position and financial performance based on the Company's assessment.

**IV. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

Significant accounting policies adopted during the preparation of the parent company only financial statements are described as follows: Unless otherwise stated, such policies are consistently applicable to all the periods presented.

(I) Compliance statement

The parent company only financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers.

(II) Basis of preparation

1. Except for the following items, these parent company only financial statements have been prepared under the historical cost convention:
  - (1) Financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.
  - (2) Financial assets at fair value through other comprehensive income/available-for-sale financial assets measured at fair value.
  - (3) Defined benefit liabilities recognized based on the net amount of pension fund assets less present value of defined benefit obligation.
2. The preparation of financial statements in conformity with International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the FSC (collectively referred herein as the "IFRSs") requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Company's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the parent company only financial statements are disclosed in Note V.
3. In initial adoption of IFRS 9 and IFRS 15 on January 1, 2018, the Company has elected to apply modified retrospective approach whereby the cumulative impact of the adoption was recognized as retained earnings or other equity as of January 1, 2018 and the financial statements and their notes for the year ended December 31, 2017 were not restated. The financial statements for the year ended December 31, 2017 were prepared in compliance with International Accounting Standard 39 ("IAS 39"), International Accounting Standard 11 ("IAS 11"), International Accounting Standard 18 ("IAS 18") and related financial reporting interpretations. Please refer to Notes XII(IV) and (V) for details of significant accounting policies.

(III) Foreign currency translation

1. The parent company only financial statements are presented in NTD, which is the Company's functional and presentation currency.
2. Foreign currency transactions and balances

- (1) Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions are recognized in profit or loss in the period in which they arise.
  - (2) Monetary assets and liabilities denominated in foreign currencies at the period end are retranslated at the exchange rates prevailing at the balance sheet date. Exchange differences arising upon re-translation at the balance sheet date are recognized in profit or loss in the period in which they arise.
  - (3) Non-monetary assets and liabilities denominated in foreign currencies held at fair value through profit or loss are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognized in profit or loss in the period in which they arise. Non-monetary assets and liabilities denominated in foreign currencies held at fair value through other comprehensive income are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognized in other comprehensive income. However, non-monetary assets and liabilities denominated in foreign currencies that are not measured at fair value are translated using the historical exchange rates at the dates of the initial transactions.
  - (4) All foreign exchange gains and losses are presented in the statements of comprehensive income within "other gains and losses".
3. Translation of foreign operations
- (1) The operating results and financial position of all the group entities and associates that have a functional currency different from the presentation currency are translated into the presentation currency as follows:
    - A. Assets and liabilities for each balance sheet presented are translated at the closing exchange rate at the date of that balance sheet;
    - B. Income and expenses for each statement of comprehensive income are translated at average exchange rates of the period; and
    - C. All resulting exchange differences are recognized in other comprehensive income.
  - (2) When the foreign operation of an associate is partially disposed of or sold, exchange differences that were recorded in other comprehensive income are proportionately reclassified to profit or loss as part of the gain or loss on sale. In addition, if the Company still retains partial interest in the former foreign associate after losing significant influence over the former foreign associate, such transactions should be accounted for as disposal of all interest in these foreign operations.
  - (3) When the foreign operation partially disposed of or sold is a subsidiary,

cumulative exchange differences that were recorded in other comprehensive income are proportionately transferred to the non-controlling interest in this foreign operation. In addition, even when the Company retains partial interest in the former foreign subsidiary after losing control of the former foreign subsidiary, such transactions should be accounted for as disposal of all interest in the foreign operation.

(IV) Classification of current and non-current items

1. Assets that meet one of the following criteria are classified as current assets;
  - (1) Assets arising from operating activities that are expected to be realized, or are intended to be sold or consumed within the normal operating cycle;
  - (2) Assets held mainly for trading purposes;
  - (3) Assets that are expected to be realized within 12 months after the balance sheet date; or
  - (4) Cash and cash equivalents, excluding restricted cash and cash equivalents and those that are to be exchanged or used to settle liabilities more than 12 months after the balance sheet date.

Assets that meet none of the above criteria are classified by the Company as non-current assets.

2. Liabilities that meet one of the following criteria are classified as current liabilities.
  - (1) Liabilities that are expected to be settled within the normal operating cycle;
  - (2) Liabilities held mainly for trading purposes;
  - (3) Liabilities that are to be settled within 12 months after the balance sheet date;
  - (4) Liabilities for which the repayment date cannot be extended unconditionally to more than 12 months after the balance sheet date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

Liabilities that meet none of the above criteria are classified by the Company as non-current liabilities.

(V) Cash equivalents

Cash equivalents refer to short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. Time deposits that meet the above criteria and are held for the purpose of meeting short-term cash commitment in operations are classified as cash equivalents.

(VI) Financial assets at fair value through profit or loss

1. Financial assets at fair value through profit or loss are financial assets that are not measured at amortized cost or fair value through other comprehensive income.
2. On a regular way purchase or sale basis, financial assets at fair value through profit or loss are recognized and derecognized using trade date accounting.
3. At initial recognition, the Company measures the financial assets at fair value and

- recognizes the transaction costs in profit or loss. The Company subsequently measures the financial assets at fair value, and recognizes the gain or loss in profit or loss.
4. The Company recognizes the dividend income in profit or loss when the right to receive payment is established, future economic benefits associated with the dividend flows to the Company, and the amount of the dividend can be measured reliably.

(VII) Financial assets at fair value through other comprehensive income

1. Financial assets at fair value through other comprehensive income comprise equity instruments which are not held for trading, and for which the Company has made an irrevocable election at initial recognition to recognize changes in fair value in other comprehensive income and debt instruments which meet all of the following criteria:
  - (1) The objective of the Company's business model is achieved both by collecting contractual cash flows and selling financial assets; and
  - (2) The assets' contractual cash flows represent solely payments of principal and interest on the principal outstanding.
2. On a regular way purchase or sale basis, financial assets at fair value through other comprehensive income are recognized and derecognized using trade date accounting.
3. At initial recognition, the Company measures the financial assets at fair value plus transaction costs. The Company subsequently measures the financial assets at fair value:
  - (1) The changes in fair value of equity instruments that were recognized in other comprehensive income. Cumulative gain or loss previously recognized in comprehensive income are reclassified to retained earnings and are not reclassified to profit or loss following the derecognition of the instrument. The Company recognizes the dividend income in profit or loss when the right to receive payment is established, future economic benefits associated with the dividend flows to the Company, and the amount of the dividend can be measured reliably.
  - (2) The changes in fair value of debt instruments are recognized in other comprehensive income. Before derecognition, impairment loss, interest income and gain or loss on foreign exchange which are recognized in profit or loss. When the financial asset is derecognized, the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss.

(VIII) Financial assets at amortized cost

1. Financial assets at amortized cost are those that meet all of the following criteria:
  - (1) The objective of the Company's business model is achieved by collecting

- contractual cash flows; and
- (2) The assets' contractual cash flows represent solely payments of principal and interest on the principal amount outstanding.
2. On a regular way purchase or sale basis, financial assets at amortized cost are recognized and derecognized using trade date accounting.
3. At initial recognition, the Company measures the financial assets at fair value plus transaction costs. Subsequently, impairment loss on and interest income from these financial assets is recognized using the effective interest method in accordance with the amortization procedure. A gain or loss is recognized in profit or loss when the asset is derecognized.
4. The Company's time deposits which do not fall under cash equivalents are those with a short maturity period and are measured at initial investment amount as the effect of discounting is immaterial.
- (IX) Accounts and notes receivable
1. Accounts and notes receivable entitle an unconditional legal right to receive consideration in exchange for transferred goods or rendered services.
  2. The short-term accounts and notes receivable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.
  3. The Company's operating pattern of accounts receivable that are expected to be factored is for the purpose of selling, and the accounts receivable are subsequently measured at fair value, with any changes in fair value recognized in profit or loss.
- (X) Impairment of financial assets
- For debt instruments measured at fair value through other comprehensive income, financial assets at amortized cost, and accounts receivable containing a significant financing component, the Company measures, at each balance sheet date, the impairment provision at 12 months expected credit losses if there has no significant increase in credit risk since initial recognition or measures the impairment provision for the lifetime expected credit losses (ECLs) if such credit risk has increased since initial recognition after taking into consideration all reasonable and verifiable information that includes forecasts. On the other hand, for accounts receivable or contract assets that do not contain a significant financing component, the Company recognizes the impairment provision for lifetime ECLs.
- (XI) Derecognition of financial assets
- The Company derecognizes a financial asset when one of the following conditions is met:
1. The contractual rights to receive the cash flows from the financial asset expire.
  2. The contractual rights to receive cash flows of the financial asset have been transferred and the Company has transferred substantially all risks and rewards of ownership of the financial asset.

3. The contractual rights to receive cash flows of the financial asset have been transferred; and the Company has not retained control of the financial asset.

(XII) Lease Receivable/Operating lease (lessor)

Lease income from an operating lease (net of any incentives given to the lessee) is recognized in profit or loss on a straight-line basis over the lease term.

(XIII) Inventories

Inventories are measured at the lower of cost and net realizable value. Cost is determined using the weighted-average cost method. The cost of finished goods and goods in process comprises raw materials, direct labor, other direct costs and related production overheads (allocated based on normal operating capacity). However, loan costs are excluded. The item-by-item approach is used in applying the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated cost of completion and applicable variable selling expenses.

(XIV) Investments accounted for under the equity method / subsidiaries and associates

1. Subsidiaries are entities controlled by the Company (including structured entities). The Company controls the entity when the Company is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.
2. All unrealized profit or loss resulting from transactions between the Company and its subsidiaries have been eliminated in full. Accounting policies of subsidiaries have been adjusted when necessary in order to be consistent with those of the Company.
3. The Company's share of profit or loss in subsidiaries after acquisition is recognized in profit or loss, whereas its share of other comprehensive income in subsidiaries after acquisition is recognized in other comprehensive income. If the Company's share of loss in a subsidiary exceeds its share of equity in such a subsidiary, the Company continues to recognize losses in its shareholding percentage.
4. If a change in shareholding in a subsidiary does not result in a loss of control (i.e. transactions with non-controlling interests), such a change is accounted for as an equity transaction, that is, a transaction conducted with the owners. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity.
5. When the Company loses control over a subsidiary, the retained investment in such former subsidiary is remeasured and the remeasured value is regarded as the fair value on initial recognition of a financial asset, or as the cost on initial recognition of an investment in an associate or joint venture. Difference between fair value and carrying amount is recognized in profit or loss. All amounts recognized previously in other comprehensive income in relation to such

subsidiary are accounted for on the same basis had the Company directly disposed of the related assets or liabilities. That is, if any gains or losses previously recognized in other comprehensive income are reclassified to profit or loss upon disposal of related assets or liabilities, any gains or losses, when the Company loses control over the subsidiary, are reclassified from equity to profit or loss.

6. Associates are all entities over which the Company has significant influence but no control. In general, it is presumed that an investor has significant influence if the investor holds directly or indirectly 20% or more of the voting power of the investee. Investments in associates are accounted for under the equity method and are recognized at cost when acquisition.
7. The Company's share of profits or losses after the acquisition of associates is recognized in profit or loss, and its share of other comprehensive income after acquisition is recognized in other comprehensive income. When the Company's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Company does not recognize further losses, unless it has incurred legal or constructive obligations or made payments on behalf of the associate.
8. When changes in an associate's equity do not arise from profit or loss or other comprehensive income of the associate and such changes do not affect the Company's shareholding percentage of the associate, the Company recognizes change in ownership interests in the associate in "capital surplus" in proportion to its shareholding.
9. Unrealized gains or losses on transactions between the Company and its associates are eliminated to the extent of the Company's interest in the associates. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been adjusted where necessary to ensure consistency with the policies adopted by the Company.
10. In case an associate issues new shares and the Company does not subscribe or acquire new shares proportionately, which results in a change in the Company's ownership percentage of the associate but maintains significant influence on the associate, then "capital surplus" and "investments accounted for under the equity method" shall be adjusted for the increase or decrease of its share of equity interest. If the above condition causes a decrease in the Company's ownership percentage of the associate, in addition to the above adjustment, the amounts previously recognized in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately on the same basis as would be required if the relevant assets or liabilities were disposed of.
11. Upon loss of significant influence over an associate, the Company remeasures any investment retained in the former associate at its fair value. Any difference

- between fair value and carrying amount is recognized in profit or loss.
12. When the Company disposes of its investment in an associate and loses significant influence over this associate, the amounts previously recognized in other comprehensive income in relation to the associate are reclassified to profit or loss, on the same basis as would be required if the relevant assets or liabilities were disposed of. That is, if any gains or losses previously recognized in other comprehensive income are to be reclassified to profit or loss upon disposal of related assets or liabilities, such gains or losses, when the Company losses significant influence over the associates, are reclassified from equity to profit or loss. If it still retains significant influence over this associate, the amounts previously recognized in other comprehensive income in relation to the associate are reclassified to profit or loss proportionately in accordance with the aforementioned approach.
  13. When the Company disposes of its investment in an associate and loses significant influence over this associate, the amounts previously recognized as capital surplus in relation to the associate are transferred to profit or loss. If it retains significant influence over this associate, the amounts previously recognized as capital surplus in relation to the associate are transferred to profit or loss proportionately.
  14. According to Regulations Governing the Preparation of Financial Reports by Securities Issuers, the profit or loss of the period and other comprehensive income presented in parent company only financial statements shall be the same as the allocations of profit or loss of the period and of other comprehensive income attributable to owners of the parent presented in the financial statements prepared on a consolidated basis, and the owners' equity presented in the parent company only financial statements shall be the same as the equity attributable to owners of the parent presented in the financial statements prepared on a consolidated basis.

(XV) Property, plant and equipment

1. Property, plant and equipment are initially recorded at cost. Borrowing costs incurred during the construction period are capitalized.
2. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognized. All other repairs and maintenance are recognized as profit or loss during the financial period in which they are incurred.
3. While land is not depreciated, other property, plant and equipment that apply cost model are depreciated using the straight-line method to allocate their cost over their estimated useful lives. If each component of property, plant and equipment is significant in relation to the total cost of the item, it must be depreciated separately.

4. The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each financial year-end. If expectations for the assets' residual values and useful lives differ from previous estimates or the patterns of consumption of the assets' future economic benefits embodied in the assets have changed significantly, any change is accounted for as a change in estimate under IAS 8, 'Accounting Policies, Changes in Accounting Estimates and Errors.' from the date of the change. Useful lives of property, plant and equipment are as follows:

	Buildings and structures	15 ~ 51 years
(	Buildings and auxiliary facilities	6 ~ 11 years )
	Machinery and equipment	3 ~ 9 years
	Other assets	1 ~ 6 years

(XVI) Leased assets / operating leases (lessee)

1. Based on the terms of a lease contract, a lease is classified as a finance lease if the Company assumes substantially all the risks and rewards incidental to ownership of the leased asset.
  - (1) A finance lease is recognized as an asset and a liability at the lease's commencement at the lower of the fair value of the leased asset or the present value of the minimum lease payments.
  - (2) The minimum lease payments are apportioned between the finance charges and the reduction of the outstanding liability. The finance charges are allocated to each period over the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.
  - (3) Property, plant and equipment held under finance leases are depreciated over their estimated useful lives. If there is no reasonable certainty that the Company will obtain ownership at the end of the lease, the asset shall be depreciated over the lease term or its useful life, whichever is shorter.
2. Payments made under an operating lease (net of any incentives received from the lessor) are recognized in profit or loss on a straight-line basis over the lease term.

(XVII) Investment property

An investment property is stated initially at its cost and measured subsequently using the cost model. Investment property is depreciated on a straight-line basis over its estimated useful life of 6 to 51 years.

(XVIII) Intangible assets

1. Trademark right is stated at cost and regarded as having an indefinite useful life as it was assessed to generate continuous net cash inflow in the foreseeable future. Trademark right is not amortized, but is tested annually for impairment.
2. Goodwill is generated from adopting the acquisition method when merger and acquisition occur.
3. Patent is amortized on a straight-line basis over its estimated useful life of 2 to 20

years.

(XIX) Impairment of non-financial assets

1. The Company assesses at each balance sheet date the recoverable amounts of those assets where there is an indication that they are impaired. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less disposal costs or value in use. Except for goodwill, when the circumstances or reasons for recognizing impairment loss for an asset in prior periods no longer exist or diminish, the impairment loss is reversed. The increased carrying amount due to reversal should not be more than what the depreciated or amortized historical cost would have been if the impairment had not been recognized.
2. The recoverable amount of goodwill shall be evaluated periodically. An impairment is recognized when recoverable amount is lower than carrying amount. Impairment loss should not be reversed in the future.
3. For the purpose of impairment testing, goodwill acquired in a business combination is allocated to each of the cash-generating units, or groups of cash-generating units, that is/are expected to benefit from the synergies of the business combination.

(XX) Loans

1. Loans comprise long-term and short-term bank loans. Loans are recognized initially at fair value, net of transaction costs incurred. Loans are subsequently stated at amortized cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognized in profit or loss over the period of the loans using the effective interest method.
2. Fees paid on the establishment of loan facilities are recognized as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw-down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalized as a prepayment for liquidity services and amortized over the period of the facility to which it relates.

(XXI) Notes and accounts payable

1. Accounts payable are liabilities for purchases of raw materials, goods or services and notes payable are those resulting from operating and non-operating activities.
2. The short-term notes and accounts payable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(XXII) Financial liabilities at fair value through profit or loss

1. Financial liabilities are classified in this category of held for trading if acquired principally for the purpose of repurchasing in the short-term. Derivatives are also categorized as financial liabilities held for trading unless they are designated as

- hedges. Financial liabilities that meet one of the following criteria are designated as measured at fair value through profit or loss at initial recognition:
- (1) Hybrid (combined) contracts; or
  - (2) They eliminate or significantly reduce a measurement or recognition inconsistency; or
  - (3) They are managed and their performance is evaluated on a fair value basis, in accordance with a documented risk management policy.
2. At initial recognition, the Company measures the financial liabilities at fair value and recognizes the transaction costs in profit or loss. The Company subsequently measures the financial liabilities at fair value, and recognizes the gain or loss in profit or loss.
  3. If the credit risk results in fair value changes in financial liabilities designated as measured at fair value through profit or loss, they are recognized in other comprehensive income in the circumstances other than avoiding accounting mismatch or recognizing in profit or loss for loan commitments or financial guarantee contracts.

**(XXIII) Ordinary corporate bonds payable**

Ordinary corporate bonds issued by the Company are initially recognized at fair value less transaction costs. Any difference between the proceeds (net of transaction costs) and the redemption value is presented as an addition to or deduction from corporate bonds payable, which is amortized to profit or loss over the period of bond circulation using the effective interest method as an adjustment to "finance costs".

**(XXIV) Convertible corporate bonds payable**

Convertible corporate bonds issued by the Company contain conversion options (that is, the bondholders have the right to convert the bonds into the Company's common shares by exchanging a fixed amount of cash for a fixed number of common shares), call options and put options. The Company classifies the bonds payable upon issuance as a financial asset, a financial liability or an equity instrument in accordance with the contract terms. They are accounted for as follows:

1. The host contracts of corporate bonds are initially recognized at fair value. Any difference between the initial recognition and the redemption value is accounted for as the premium or discount on bonds payable and subsequently is amortized in profit or loss as an adjustment to "finance costs" over the period of circulation using the effective interest method.
2. The embedded conversion options which meet the definition of an equity instrument are initially recognized in "capital surplus—share options" at the residual amount of total issue price less the amount of financial assets or financial liabilities at fair value through profit or loss and bonds payable as stated above. Conversion options are not subsequently remeasured.
3. Any transaction costs directly attributable to the issuance are allocated to each

liability and equity component in proportion to the initial carrying amount of each abovementioned item.

4. When bondholders exercise conversion options, the liability component of the bonds shall be remeasured on the conversion date. The issuance cost of converted common shares is the total book value of the abovementioned liability component and "capital surplus—share options".

(XXV) Derecognition of financial liabilities

A financial liability is derecognized when the obligation specified in the contract is either discharged or cancelled or expires.

(XXVI) Offsetting financial instruments

Financial assets and liabilities are offset and reported in the net amount in the balance sheet when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously.

(XXVII) Non-hedging and embedded derivatives

1. Non-hedging derivatives are initially recognized at fair value on the date a derivative contract is entered into and recorded as financial assets or financial liabilities at fair value through profit or loss. They are subsequently remeasured at fair value and the gains or losses are recognized in profit or loss.
2. Under the financial assets, the hybrid contracts embedded with derivatives are initially recognized as financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income and financial assets at amortized cost based on the contract terms.
3. Under the non-financial assets, whether the hybrid contracts embedded with derivatives are accounted for separately at initial recognition is based on whether the economic characteristics and risks of an embedded derivative are closely related in the host contract. When they are closely related, the entire hybrid instrument is accounted for by its nature in accordance with the applicable standard. When they are not closely related, the derivative is accounted for differently from the host contract as derivative while the host contract is accounted for by its nature in accordance with the applicable standard. Alternatively, the entire hybrid instrument is designated as financial liabilities at fair value through profit or loss upon initial recognition.

(XXVIII) Provisions

Provisions are recognized when the Company has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of economic resources will be required to settle the obligation and the amount of the obligation can be reliably estimated. Provisions are measured at the present value of the expenditures expected to be required to settle the obligation on the balance sheet date, which is discounted using a pre-tax discount rate that reflects the current market assessments of

the time value of money and the risks specific to the obligation. When discounting is used, the increase in the provision due to passage of time is recognized as interest expense. Provisions are not recognized for future operating losses.

(XXIX) Employee benefits

1. Short-term employee benefits

Short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in respect of service rendered by employees in a period and should be recognized as expense in that period when the employees render service.

2. Pensions

(1) Defined contribution plans

For defined contribution plans, the contributions are recognized as pension expense when they are due on an accrual basis. Prepaid contributions are recognized as an asset to the extent of a cash refund or a reduction in the future payments.

(2) Defined benefit plans

A. Net obligation under a defined benefit plan is defined as the present value of an amount of pension benefits that employees will receive on retirement for their services with the Company in current period or prior periods. The liability recognized in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets. The net defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The rate used to discount is determined by using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension liability; when there is no deep market in high-quality corporate bonds, the Company uses interest rates of government bonds (at the balance sheet date) instead.

B. Remeasurements arising from defined benefit plans are recognized in other comprehensive income in the period in which they arise and are recorded as retained earnings.

3. Employees' compensation and directors' and supervisors' remuneration

Employees' compensation and directors' and supervisors' remuneration are recognized as expense and liability, provided that such recognition is required under legal or constructive obligation and those amounts can be reliably estimated. Any difference between the resolved amounts and the subsequently actual distributed amounts is accounted for as changes in accounting estimates. If employee compensation is paid by shares, the Company calculates the number of

shares based on the closing price at the previous day of the board meeting resolution.

(XXX) Employee share-based payment

For the equity-settled share-based payment arrangements, the employee services received are measured at the fair value of the equity instruments granted at the grant date, and are recognized as compensation cost over the vesting period, with a corresponding adjustment to equity. The fair value of the equity instruments granted shall reflect the impact of market vesting conditions and non-market vesting conditions. Compensation cost is subject to adjustment based on the service conditions that are expected to be satisfied and the estimates of the number of equity instruments that are expected to vest under the non-market vesting conditions at each balance sheet date. Ultimately, the amount of compensation cost recognized is based on the number of equity instruments that eventually vest.

(XXXI) Income tax

1. The tax expense for the period comprises current and deferred income tax. Tax is recognized in profit or loss, except to the extent that it relates to items recognized in other comprehensive income or items recognized directly in equity, in which cases the tax is recognized in other comprehensive income or equity.
2. The current income tax expense is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company operates and generates taxable income. Management periodically evaluates implementations taken in tax returns with respect to situations in accordance with applicable tax regulations. It establishes provisions where appropriate based on the amounts expected to be paid to the tax authorities. An additional tax is levied on the unappropriated retained earnings and is recorded as income tax expense in the year the shareholders resolve to distribute the earnings.
3. Deferred income tax is recognized, using the balance sheet liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the parent company only balance sheet. However, the deferred income tax is not accounted for if it arises from initial recognition of goodwill or of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is provided on temporary differences arising on investments in subsidiaries and associates, except where the timing of the reversal of the temporary difference is controlled by the Company and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

4. Deferred income tax assets are recognized only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized. At each balance sheet date, unrecognized and recognized deferred income tax assets are reassessed.
5. Current income tax assets and liabilities are offset and the net amount is reported in the balance sheet when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. Deferred income tax assets and liabilities are offset on the balance sheet when the entity has the legally enforceable right to offset current tax assets against current tax liabilities and they are levied by the same taxation authority on either the same entity or different entities that intend to settle on a net basis or realize the asset and settle the liability simultaneously.
6. A deferred tax asset shall be recognized for the carry-forward of unused tax credits resulting from acquisitions of equipment or technology, research and development expenditures and equity investments to the extent that it is possible that future taxable profit will be available against which the unused tax credits can be utilized.

**(XXXII) Dividends**

Dividends are recorded in the Company's financial statements in the period in which they are approved by the Company's shareholders. Cash dividends are recorded as liabilities; stock dividends are recorded as stock dividends to be distributed and are reclassified to common shares on the effective date of new shares issuance.

**(XXXIII) Revenue recognition**

1. The Company manufactures and sells consumer electronics products. Sales are recognized when control of the products has transferred, being when the products are delivered to the customers, the customers has full discretion over the channel and price to sell the products, and there is no unfulfilled obligation that could affect the customer's acceptance of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the customers, and either the customers has accepted the products in accordance with the sales contract, or the Company has objective evidence that all criteria for acceptance have been satisfied.
2. Sales revenue is recognized in the amount equal to its contractual price less estimated sales discounts and allowance. Sales revenue is recognized to the extent that a significant reversal is highly improbable. Revenue recognition is revisited at each balance sheet date. No element of financing is deemed present as the sales are made with a credit term consistent with market practice.
3. A receivable is recognized when the goods are delivered as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.

4. The Company's obligation to provide a refund for faulty products under the standard warranty terms is recognized as a provision.
5. The customer pays at the time specified in the payment schedule. If the products sold exceed the payment, a contract asset is recognized. If the payments exceed the products sold, a contract liability is recognized.

**(XXXIV) Government grants**

Government grants are recognized in profit or loss on a systematic basis over the periods in which the Company recognizes expenses for the related costs for which the grants are intended to compensate. Government grants related to property, plant and equipment are recognized as non-current liabilities and are amortized to profit or loss over the estimated useful lives of the related assets using the straight-line method.

**V. CRITICAL ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS ON UNCERTAINTY**

The preparation of these parent company only financial statements requires management to make critical judgments in applying the Company's accounting policies and make critical accounting assumptions and estimates as to have a reasonable expectation of future events based on the circumstances on the balance sheet date. Assumptions and estimates may differ from the actual results and are continually evaluated and adjusted based on historical experience and other factors. Such estimates and assumptions bear the risk of making material adjustments to the carrying amount of assets and liabilities for the following fiscal year. Below details the uncertainties of critical accounting judgments, estimates and assumptions:

**(I) Critical judgments in applying the Company's accounting policies**

**Revenue recognition**

The Company determines whether the nature of its performance obligation is to provide the specified goods or services itself (i.e., the Company is a principal) or to arrange for the other party to provide those goods or services (i.e., the Company is an agent) based on the transaction model and its economic substance. The Company is a principal if it controls a promised good or service before it transfers the good or service to a customer. The Company recognizes revenue at gross amount of consideration to which it expects to be entitled in exchange for those goods or services transferred. The Company is an agent if its performance obligation is to arrange for the provision of goods or services by another party. The Company recognizes revenue at the amount of any fee or commission to which it expects to be entitled in exchange for arranging for the other party to provide its goods or services.

Indicators that the Company controls the specified goods or services before they are provided to a customer include the following:

- (1) The Company is primarily responsible for the provision of goods or services;
- (2) The Company assumes the inventory risk before transferring the specified goods or services to the customer or after transferring control of the goods or services to

the customer; and

(3) The Company has discretion in establishing prices for the goods or services.

(II) Critical accounting estimates and assumptions

The Company makes estimates and assumptions based on the expectation of future events that are believed to be reasonable under the circumstances at the end of the reporting period. The resulting accounting estimates might be different from the actual results. The estimates and assumptions that may significantly adjust the carrying amounts of assets and liabilities within the next financial year are addressed below:

Evaluation of inventories

As inventories are stated at the lower of cost and net realisable value, the Company must determine the net realizable value of inventories on balance sheet date based on judgments and estimates. Due to the rapid technology innovation, the Company evaluates the amounts of normal inventory consumption, obsolete inventories or inventories without market selling value on balance sheet date, and writes down the cost of inventories to the net realizable value. Such an evaluation of inventories is principally based on the demand for the products within the specified period in the future. Therefore, there might be significant changes to the evaluation.

As of December 31, 2018, the carrying amount of inventories was \$79,402,776.

**VI. DETAILS OF SIGNIFICANT ACCOUNTS**

Total	<u>\$ 82,890,081</u>	<u>\$ 96,472,358</u>

1. The Company transacts with a variety of financial institutions with high credit quality for the purpose of dispersing credit risk, so it is expected that the probability of counterparty default is low.
2. The Company's time deposits with a maturity term of more than three months and time deposits pledged to others as collateral, which had been previously shown as "other non-current assets" before IFRS 9 application, were transferred to "financial assets at amortized cost". Please refer to Note VIII for details.

(1) Cross currency swap contracts

The cross currency swap contracts signed by the Company are to fulfill capital movement. For exchange rate, principals denominated in two currencies are exchanged at the same exchange rate at the initial and final exchanges. Thus, there is no foreign exchange risk. For interest rate, the fixed rate between two currencies is used to exchange. Thus, there is no interest rate risk.

(2) Foreign exchange forward contracts

The Company enters into foreign exchange forward transactions to hedge the following risks of exchange rate:

- A. Operating activities: Proceeds derived from import of raw materials and export sales.
- B. Investing activities: Proceeds derived from import of machinery and equipment
- C. Financing activities: Long-term and short-term foreign currency assets and liabilities (financing)

4,117,000 thousand, which was to be repaid in installments over the life of the agreement. The Company stated its installment payment for 2018 in the amount of JPY 514,626 thousand as current liabilities.

2. According to the contractual terms with ING Bank, N.V., the Company is obliged to maintain the agreed financial ratios on the annual consolidated financial statements over the credit periods.

(XIII) Pensions

1. Defined benefit plans

- (1) The Company has a defined benefit pension plan in accordance with the Labor Standards Act, covering all regular employees' service years prior to the enforcement of the Labor Pension Act on July 1, 2005 and service years thereafter of employees who chose to continue to be subject to the pension mechanism under the Labor Standards Act. Under the defined benefit pension plan, two units are accrued for each year of service for the first 15 years and one unit for each additional year thereafter, subject to a maximum of 45 units. Pension benefits are based on the number of units accrued and the average monthly salaries and wages of the last six months prior to retirement. The Company contributes monthly an amount equal to 2% of the employees' monthly salaries and wages to the retirement fund deposited with Bank of Taiwan, the trustee, under the name of the independent retirement fund committee. Also, the Company assesses the balance in the aforementioned labor pension reserve account by December 31 of every year. If the account balance is insufficient to pay the pension calculated by the aforementioned method to the employees expected to qualify for retirement in the following year, the Company will make contributions for the deficit by the end of next March.
- (2) Amounts recognized on the balance sheets are as follows (presented as 'other non-current liabilities'):

- (4) Bank of Taiwan was commissioned to manage the fund of the Company's defined benefit pension plan in accordance with the fund's annual investment and utilization plan and the "Regulations for Revenues, Expenditures, Safe guard and Utilization of the Labor Retirement Fund" (Article 6: The scope of utilization for the Fund includes deposit in domestic or foreign financial institutions, investment in domestic or foreign listed, over-the-counter, or private placement equity securities, investment in domestic or foreign real estate secularization products, etc.). Such utilization

is supervised by the Labor Funds Supervisory Committee. With regard to the utilization of the fund, its minimum earnings in the annual distributions on the final financial statements shall be no less than the earnings attainable from the amounts accrued from two-year time deposits with the interest rates offered by local banks. If the earnings is less than aforementioned rates, government shall make payment for the deficit after being authorized by the competent authority. The Company has no right to participate in managing and operating that fund and hence the Company is unable to disclose the classification of plan assets fair value in accordance with IAS 19 paragraph 142. The composition of fair value of plan assets as of December 31, 2018 and 2017 is given in the Annual Labor Retirement Fund Utilization Report announced by the government.

- (5) The principal actuarial assumptions used are summarized as follows:

	2018	2017
Discount rate	1.10%	1.20%
Future salary increases	3.50%	3.50%

Assumptions regarding future mortality experience are set based on actuarial advice in accordance with published statistics and experience in each territory. Due to the change of the main actuarial assumption, the present value of defined benefit obligation is affected. The analysis is as follows:

	Discount rate		Future salary increases	
	Increase 0.25%	Decrease 0.25%	Increase 0.25%	Decrease 0.25%
December 31, 2018				
Effects on the present value of defined benefit obligation	( \$ 65,555 )	\$ 68,439	\$ 61,659	( \$ 59,517 )

	Discount rate		Future salary increases	
	Increase 0.25%	Decrease 0.25%	Increase 0.25%	Decrease 0.25%
December 31, 2017				
Effects on the present value of defined benefit obligation	( \$ 78,295 )	\$ 81,888	\$ 74,217	( \$ 71,512 )

The sensitivity analysis above was based on one assumption which changed while the other conditions remain unchanged. In practice, more than one assumption may change all at once. The methods of analyzing sensitivity

and the method of calculating net pension liability in the balance sheet are the same.

The sensitivity analysis has been prepared using approaches and assumptions the same as last period.

- (6) Expected contributions to the defined benefit pension plans of the Company for the year ending December 31, 2019 amount to \$21,029.
  - (7) As of December 31, 2018, the weighted average duration of the retirement plan is 14 years.
2. Defined contribution plans
- (1) Effective July 1, 2005, the Company have established a defined contribution pension plan (the “New Plan”) under the Labor Pension Act (the “Act”), covering all regular employees with R.O.C. nationality. Under the New Plan, the Company contribute monthly an amount based on 6% of the employees’ monthly salaries and wages to the employees’ individual pension accounts at the Bureau of Labor Insurance. The pensions accrued are paid monthly or in lump sum in line with the amounts in employees’ individual accounts and the amounts of accumulated gains.
  - (2) The pension costs under the defined contribution pension plans of the Company for the years ended December 31, 2018 and 2017 were \$280,291 and \$383,948, respectively.

December 31	<u>13,862,991</u>	<u>17,328,738</u>

2. Pursuant to the resolution adopted at the shareholders' meeting held on June 1, 1999, the Company issued 50,000 thousand ordinary shares so as to issue 25,000 thousand units of Global Depository Receipts (GDR). Such issuance of ordinary shares had been approved and documented by the former Securities and Futures Commission of the Ministry of Finance. GDRs are issued in Europe, Asia, and the United States, totaling US\$ 347,250 thousand. Primary contractual terms are as follows:

(1) Exercise of voting power

Holders of GDRs have no right to directly exercise voting rights or attend the Company's shareholders' meeting, except when a motion is on the election of directors or supervisors. A holder or holders together holding at least 51% of the GDRs outstanding at the relevant record date of the shareholders' meeting can instruct the Depositary to vote in the same direction in respect of one or more resolutions to be proposed at the meeting.

(2) Sale and withdrawal of GDRs

Under the current R.O.C. law, shares represented by the GDRs may be withdrawn by holders of GDRs commencing three months after the initial issue of GDRs. A holder of a GDR may, provided that the Company has delivered to the custodian physical share certificates in respect of the Deposited Shares, request the Depositary to sell or cause to be sold on behalf of such holder the shares represented by such GDRs.

(3) Dividends

GDR holders are entitled to receive dividends to the same extent as the holders of ordinary shares.

(4) After years of capitalization of earnings, as of December 31, 2018, 106,352 thousand units of GDRs were outstanding, which represent 212,705

thousand shares of ordinary share.

### 3. Capital reduction by cash

In order to adjust the capital structure and increase the return on equity, the Board of Directors resolved to reduce capital and refund cash to shareholders on May 11, 2018, which was approved by the shareholders during the shareholders' meeting held on June 22, 2018. The amount of capital reduction was \$34,657,477, which cancelled 3,465,747 thousand common shares and reduced capital by 20%. The capital reduction was approved by the Securities and Futures Bureau of the Financial Supervisory Commission on August 8, 2018, and the record date of capital deduction was August 21, 2018, following the resolution of the Board meeting.

### 4. Treasury stocks

The Company's subsidiary, Hon Jin International Investment Co., Ltd., acquired ordinary shares issued by the Company in 1998. As of December 31, 2018 and 2017, the subsidiary owned a total of 1,483,078 and 1,853,848 shares of the Company's common stocks, respectively, at a cost of \$18,901. The cost was reduced to \$15,194 upon capital reduction.

## (XVI) Capital surplus

- Pursuant to the R.O.C. Company Act, capital reserve arising from paid-in capital in excess of par value on issuance of common stocks and donations can be used to cover accumulated deficit or to issue new stocks or cash to shareholders in proportion to their share ownership, provided that the Company has no accumulated deficit. Furthermore, the R.O.C. Securities and Exchange Act requires that the amount of capital reserve to be capitalized mentioned above should not exceed 10% of the paid in capital each year. Capital reserve should not be used to cover accumulated deficit unless the surplus reserve is insufficient.

2. Foxconn Industrial Internet, a subsidiary of the Company, publicly issued 1,969,530 thousand shares of China A shares in June 2018 at the par value of RMB 13.77 per share. The raised funds, net of issuance costs, reached RMB 26,716,439 thousand, resulting in a drop in the Company's shareholding percentage from 94.2% to 84.8%. The capital surplus increased by \$87,629,369 due to the Company did not acquire the new shares by shareholding percentage.

#### (XVII) Retained earnings

1. The Company's net earnings after final account are apportioned in the following order:
  - (1) Covering accumulated deficits;
  - (2) Setting aside as legal reserve equal to 10% of current year's net income.
  - (3) Setting aside or a special reserve in accordance with applicable legal and regulatory requirement ;

The remaining earnings along with the unappropriated earnings at the beginning of the period are considered as accumulated distributable earnings. In accordance with dividend policy, the proposal of earnings appropriation is prepared by the Board of Directors and resolved by the shareholders.

The Company is at the growing stage. The Company's stock dividend policy shall consider the Company's current and future investment environment, capital needs, local and foreign competition situation and capital budget, along with shareholders' profit and the Company's long-term financial plans. The shareholders' dividends are appropriated based on accumulated distributable earnings, which shall not be lower than 15% of the distributable earnings for the period and the cash dividend shall not be less than 10% of the shareholders' dividends.

2. Except for covering accumulated deficit or issuing new stocks or cash to shareholders in proportion to their share ownership, the legal reserve shall not be used for any other purpose. The use of legal reserve for the issuance of stocks or

cash to shareholders in proportion to their share ownership is permitted, provided that the balance of the reserve exceeds 25% of the Company's paid-in capital.

3. In accordance with the regulations, the Company shall set aside special reserve from the debit balance on other equity items at the balance sheet date before distributing earnings. When debit balance on other equity items is reversed subsequently, the reversed amount could be included in the distributable earnings.
4. The appropriations of 2017 and 2016 earnings had been resolved at the shareholders' meeting on June 22, 2018 and June 22, 2017, respectively. Details are summarized below:

## XII. OTHERS

### (I) Capital management

The objective of the Company's capital management is to ensure that the Company can continue as a going concern, that an optimal capital structure is maintained to lower the cost of capital, and that returns are provided to shareholders. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, issue new shares or sell assets to reduce debt. The Company monitors capital on the basis of the debt-to-net worth ratio. This ratio is calculated as net debt divided by net worth. Net debt is calculated as total loans (including "current and non-current loans" as shown in the parent company only balance sheet) less cash and cash equivalents. Net worth is calculated as 'equity' as shown in the parent company only balance sheet less the total intangible assets.

The Company's strategic maintenance in 2018 to pin the debt-to-net worth ratio at or below 70% remains unchanged from that in 2017.

### (II) Financial instruments

#### 1. Classification of financial instruments

For information and amounts related to the Company's financial assets, which comprise financial assets at fair value through profit or loss, available-for-sale financial assets, financial assets at fair value through other comprehensive income, financial assets at amortized cost, accounts receivable (including receivables due from related parties and other receivables), and financial liabilities, which comprise financial liability at fair value through profit or loss, accounts payable (including payables to related parties), other payables, short-term loans, long-term loans and corporate bond payables), refer to Note VI and the parent company only balance sheet.

#### 2. Risk management policies

##### (1) Risk categories:

The Company employs a comprehensive risk management and control system to clearly identify, measure, and control the various kinds of financial risk it faces, including market risk (including foreign exchange risk, interest rate risk and price risk), credit risk, and liquidity risk.

##### (2) Management objectives:

A. Except for market risk, which is controlled by external factors, the remainder of the foregoing types of risks can be controlled internally or removed from business processes. Therefore, the goal in managing each of these risks is to reduce them to zero.

- B. As for market risk, the goal is to optimize its overall position through strict analysis, suggestion, execution and audit processes, and proper consideration of a) long-term trends in the external economic/financial environment, b) internal operating conditions, and c) the actual effects of market fluctuations.
- C. The Company's overall risk management policy focuses on the unpredictable item of financial markets and seeks to reduce the risk that potentially pose adverse effects on the Company financial position and financial performance.
- D. For the information on the derivative financial instruments that the Company enters into, please refer to Note VI(II).

(3) Management system:

- A. Risk management is executed by the Company treasury by following policies approved by the Board. Through cooperation with the Company's operating units, finance department is responsible for identifying, evaluating and hedging financial risks.
- B. The Board of Directors has a written policy covering overall risk management. It also has written policies covering specific scopes and issues, such as exchange rate risk, interest rate risk, credit risk, derivative and non-derivative financial instruments used, and the investment of excess working capital.

3. Significant financial risks and degrees of financial risks

(1) Market risk

A. Foreign exchange risk

(A) Nature:

The Company is a multinational company in the electronics manufacturing services industry. Most of the exchange rate risk from operating activities come from:

- a. Foreign exchange risk arises from different exchange rates to functional currency, as the invoice dates of accounts receivable and payable denominated in nonfunctional foreign currency are different. Due to the characteristics of the OEM industry, the Company's revenue and expenditures are mostly denominated in foreign currency. Thus, the remaining net foreign exchange risk is not material after offsetting assets and liabilities. Furthermore, although the fluctuations in exchange rates of the Company's certain foreign investments in emerging countries (e.g., Brazil, Mexico, etc.) are considered huge, the percentage of the investments is not significant and thus the Company's foreign exchange risk

can be maintained in the controllable range. (Note: The Company has several sites in various countries and thus is exposed to various foreign exchange risks. The main risk arises from USD and RMB.)

- b. Besides the above transactions (operating activities) recognized in the income statement, assets and liabilities recognized in the balance sheet also result in the exchange rate risk.

(B) Management:

- a. For such risks, the Company has set up policies requiring companies in the Group to manage the exchange rate risks of their functional currencies.
- b. As to the exchange rate risk arising from the difference between various functional currencies and the reporting currency in the consolidated financial statements, it is managed by the Group's finance department.

(C) The source:

a. USD and NTD:

Foreign exchange risk arises primarily from USD-denominated assets, such as cash and cash equivalents, accounts receivable, and other receivables, and USD-denominated liabilities, such as loans, accounts payable and other payables, which results in exchange loss or gain when they are converted into NTD.

b. USD and RMB:

Foreign exchange risk arises primarily from USD-denominated assets, such as cash and cash equivalents, accounts receivable, and other receivables, and USD-denominated liabilities, such as loans, accounts payable and other payables, which results in exchange loss or gain when they are converted into RMB.

c. JPY and NTD:

Foreign exchange risk arises primarily from JPY-denominated liabilities, such as loans, accounts payable and other payables, which results in exchange loss or gain when they are converted into NTD.

d. JPY and USD:

Foreign exchange risk arises primarily from JPY-denominated liabilities, such as loans, accounts payable and other payables, which results in exchange loss or gain when

they are converted into USD.

- (D) Extent: The information on assets and liabilities denominated in foreign currencies whose values would be materially affected by the exchange rate fluctuations is as follows:

- (E) Total exchange gain (loss), including realized and unrealized, arising from significant foreign exchange fluctuation on the monetary items held by the Company amounted to a loss of \$86,716 and a gain of \$5,083,636, respectively, for 2018 and 2017.

#### B. Equity securities

- (A) Nature:

The Company primarily invests in domestic and foreign publicly traded equity instruments, which are accounted for as financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income and available-for-sale financial assets. The price of those equity instruments will be

affected by the uncertainty of the future value of the investment.

(B) Extent

If such equity instruments' price rise or fall by 1%, with all other factors held unchanged, the impact on equity due to investments in equity instruments measured at fair value through other comprehensive income, investments in equity at fair value through profit or loss and available-for-sale equity instruments were \$17,759 and \$22,048, respectively, for 2018 and 2017.

C. Futures

(A) Nature:

The Company is exposed to commodity price risk because of future commodity price fluctuations.

(B) Extent

The Company sets stop-loss amount to reduce its futures market risk whenever futures contracts are entered into. As potential losses are controlled within a reasonable range, there is no significant futures market risk.

D. Cash flow and fair value interest rate risk

The Company's interest rate risk arises from long-term loans or corporate bonds with floating rates. The Company's long-term corporate bonds with fixed interest rates do not have interest rate risk or fair value interest rate risk.

Long-term loans or corporate bonds with floating rates expose the Company to cash flow interest rate risk, but most of the risks are offset by cash and cash equivalents with variable interest rates.

(2) Credit risk

A. Credit risk refers to the risk of financial loss to the Company arising from default by the clients or counterparties of financial instruments.

According to the Company's credit policy, each local entity in the Group is responsible for managing and analyzing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. The internal risk control assesses customers' credit quality by taking into account their financial position, historical experience, and other factors.

Individual risk limits are set by the Board of Directors based on internal or external ratings. The utilization of credit limits is regularly monitored. Major credit risk arises from credit risks of cash and cash equivalents, derivative financial instruments, deposits at banks and financial institutions, investments on short-term wealth management products of banks and financial institutions, and other financial instruments. The

counterparties are banks with good credit quality and financial institutions with investment grade or above and government agencies, so there is no significant compliance concerns and credit risk.

- B. The Company assumes that if the contract payments were past due over 90 days based on the terms, there has been a significant increase in credit risk on that instrument since initial recognition; if past due over 360 days, a default has been occurred.
- C. The following indicators are used to determine whether the credit impairment of debt instruments has occurred:
  - (A) It becomes probable that the issuer will enter bankruptcy or other financial reorganization due to their financial difficulties;
  - (B) Default or delinquency in interest or principal repayments;
  - (C) Adverse changes in national or regional economic conditions that are expected to cause a default.
- D. The aging analysis of accounts receivable (including related parties) is as follows:

	December 31, 2018	December 31, 2017
Not past due	\$ 536,743,276	\$ 638,879,933
Up to 90 days	4,402,617	22,836,219

The table above shows an aging analysis based on the number of days overdue.

- E. The Company applies the following approaches to assess the expected credit losses (ECLs) of accounts receivable:
  - (A) Assess the ECLs on an individual basis if a significant default has occurred.
  - (B) Classify the other customers' accounts receivable based on the Company's credit rating standards and estimates the ECLs using loss rate methodology or provision matrix based on different groups.
  - (C) Adjust the loss rates constructed from historical and recent information by taking into account the business cycle indicators of the National Development Council and forecasts of the Basel Committee on Banking Supervision.

(D) As of December 31, 2018 the individual allowance for impairment of accounts receivable and ones estimated using loss rate methodology or provision matrix are as follows:

	Individual	Group 1	Group 2	Group 3	Group 4	Total
December 31, 2018						
Expected loss rate	100%	0.02%	0.07%	0.68%~1.90%	0.44%~42.22%

- Group 1: Standard Poor's, Fitch's, or Moody's rating of A-level, or rated as A-level in accordance with the Company's credit policies for those that have no external credit ratings.
- Group 2: Standard Poor's or Fitch's rating of BBB, Moody's rating of Baa, or rated as B or C-level in accordance with the Company's credit policies for those that have no external credit ratings.
- Group 3: Standard Poor's or Fitch's rating of BB + and below, or Moody's rating of Ba1 and below.
- Group 4: Rated as other than A, B, or C in accordance with the Company's credit policies for those that have no external credit ratings.

F. Movements of loss allowance for accounts receivable (including related parties) provided by the Company using the simplified approach are as follows:

	Accounts receivable for 2018

G. Credit risks on accounts receivable and notes receivable as of December 31, 2017 are provided in Note XII (IV).

(3) Liquidity risk

- A. Cash flow forecasting is performed by each operating entity of the Group and aggregated by Group treasury. The Group treasury monitors rolling forecasts of the Group's liquidity requirements and meets various contractual obligations by maintaining sufficient funds and bank facilities.
- B. The table below analyzes the Company's non-derivative financial liabilities and net-settled or gross-settled derivative financial liabilities categorized into relevant maturity groups, i.e. based on the remaining

period at the balance sheet date to the contractual maturity date for non-derivative financial liabilities and to the expected maturity date for derivative financial liabilities. The amounts disclosed in the table are the contractual undiscounted cash flows.

(III) Fair value information

1. The different levels of inputs used in the valuation techniques for measuring the fair value of financial and non-financial instruments have been defined as follows:
  - Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date. A market is regarded as active where transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. The fair value of the Company's investment in listed stocks and beneficiary certificates is included in Level 1.
  - Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. The fair value of the Company's investment in convertible corporate bonds payable and most of the derivative instruments is included in Level 2.
  - Level 3: Unobservable inputs for the asset or liability. The fair value of the Company's equity investment without active market is included in Level 3.
2. Financial instruments not measured at fair value
  - (1) Except for those listed in the table below, the carrying amounts of the Company's financial instruments not measured at fair value (including cash and cash equivalents, notes and accounts receivable, other receivables, financial assets at amortized cost (excluding bank debentures), short-term loans, notes and accounts payable, other payables and long-term loans) approximate to their fair values.

Financial liabilities:	December 31, 2018			
	Fair value			
	Book value	Level 1	Level 2	Level 3
Bonds payable	\$ 144,596,000	\$ -	\$ 137,588,355	\$ -

Financial liabilities:	December 31, 2017			
	Fair value			
	Book value	Level 1	Level 2	Level 3
Bonds payable	\$ 154,696,000	\$ -	\$ 150,366,525	\$ -

- (2) The methods and assumptions of fair value measurement are as follows:
 

Corporate bonds payable: Regarding the bonds issued by the Company, the coupon rate approximates to the current market rate. Therefore, the fair value is estimated using the present discounted value of the expected cash flows and market interest rate.

3. The Company categorizes financial and non-financial instruments measured at fair value on the basis of the nature, characteristics, risks, and fair value level of the assets and liabilities.

(1) The related information on assets and liabilities categorized by their nature is as follows:

December 31, 2018	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>

	<u>\$ -</u>	<u>( \$ 6,309,365 )</u>	<u>\$ -</u>	<u>( \$ 6,309,365 )</u>

(2) The methods and assumptions of fair value measurement are as follows:

- A. The Company adopts market quoted prices as their fair values (i.e., Level 1), which are listed below by the characteristics of the instruments:

Market quoted price	Listed stocks	Open-end fund
	Closing price	Net asset value

- B. Except for financial instruments with active markets, the fair value of other financial instruments is measured by using valuation techniques or by reference to counterparty quotes. The fair value of financial instruments measured by using valuation techniques method can be obtained by reference to the current fair value of instruments with similar terms and characteristics in substance, discounted cash flow method or other valuation methods, including fair value calculated by applying model using market information available at the parent company only balance sheet date.
- C. When assessing non-standard and low-complexity financial instruments, for example, cross currency swap contracts and wealth management products, the Company adopts valuation technique that is widely used by market participants. The inputs used in the valuation method to measure these financial instruments are normally observable in the market.
- D. The valuation of derivative financial instruments is based on valuation model widely accepted by market participants, such as present discounted value techniques and option pricing models. Forward exchange contracts are usually valued based on the current forward exchange rate. Put option is evaluated by Black-Scholes option pricing model.
- E. The output of valuation model is an estimated value and the valuation technique may not be able to capture all relevant factors of the Company's financial and non-financial instruments. Therefore, the estimated value derived using valuation model is adjusted accordingly with additional inputs, such as model risk or liquidity risk, etc. In accordance with the Company's management policies and relevant control procedures relating to the valuation models used for fair value measurement, management believes adjustment to valuation is necessary in order to reasonably present the fair value of financial and non-financial instruments at the parent company only balance sheet. The pricing information and inputs used during valuation are carefully

assessed and adjusted based on current market conditions.

- F. The Company takes into account credit risk valuation adjustment to measure the fair value of financial and non-financial instruments to reflect credit risk of the counterparty and the Company's credit quality.
- 4. For the years ended December 31, 2018 and 2017, there was no transfer between Level 1 and Level 2.
- 5. The following chart is the movement of Level 3 in 2018:

	Equity instruments for 2018
January 1	\$ -
Adjustment for retrospective application and retrospective restatement	105,789
Gains and losses recognized in other comprehensive income	<u>47,438</u>
December 31	<u>\$ 153,227</u>

- 6. Investment segment is in charge of valuation procedures for fair value measurements being categorized within Level 3, which is to verify independent fair value of financial instruments. Such assessment is to ensure the valuation results are reasonable by applying independent information to make results close to current market conditions, confirming that the source of information is independent, reliable and in line with other resources and representative of the exercisable price, frequently calibrating valuation model, performing back-testing, updating inputs used to the valuation model, and making any other necessary adjustments to the fair value.
- In addition, investment segment sets up valuation policies, valuation processes and rules for measuring fair value of financial instruments to ensure compliance with the related requirements in IFRS.

- 7. The following is the quantitative information of significant unobservable inputs and sensitivity analysis of changes in significant unobservable inputs to valuation model used in Level 3 fair value measurement:

Fair value as at December 31, 2018	Valuation technique	Significant unobservable input	Range (weighted average)	Relationship of inputs to fair value
Non-derivative equity instrument:				
Venture capital shares Private equity fund investment	Net asset value	lack of marketability discount	5.00%~10.00% (7.85%)	As the discount for lack of marketability, discount for minority interest, or expected equity value volatility goes higher, the fair value goes lower.
		minority discount of interests	15.00%	

8. The Company has carefully assessed the valuation models and inputs used to measure fair value. However, use of different valuation models or inputs may result in different measurement. The following is the effect on profit or loss or other comprehensive income from financial assets and liabilities categorized within Level 3 if the inputs used in the valuation models have changed:

	December 31, 2018					
			Recognized in profit or loss		Recognized in other comprehensive income

Equity instruments	\$ 153,227	±1%	\$ -	\$ -	\$ 1,532	( \$ 1,532 )

**(IV) Effects on initial application of IFRS 9**

1. Summary of significant accounting policies adopted in 2017 is stated as follows:
  - (1) Financial assets at fair value through profit or loss
    - A. Financial assets at fair value through profit or loss are financial assets held for trading or designated as at fair value through profit or loss on initial recognition. Financial assets are classified in the category of held for trading if acquired principally for the purpose of selling in the short-term. Derivatives are also categorized as financial assets held for trading unless they are designated as hedging instruments. Financial assets that meet one of the following criteria are designated as at fair value through profit or loss on initial recognition:
      - (A) Hybrid (combined) contracts; or
      - (B) Capable of eliminating or significantly reducing a measurement or recognition inconsistency; or
      - (C) Investments that are managed with performance evaluated on a fair value basis, in accordance with a written risk management or investment strategy.
    - B. On a regular way purchase or sale basis, financial assets at fair value through profit or loss are recognized and derecognized using trade date accounting.
    - C. Financial assets at fair value through profit or loss are initially measured at fair value. Related transaction costs are recognized in profit or loss. These financial assets are subsequently remeasured and stated at fair value, and any changes in the fair value of these financial assets are recognized in profit or loss.
  - (2) Available-for-sale financial assets
    - A. Available-for-sale financial assets are non-derivative financial assets that are either designated in this category or not classified in any of the

other categories.

- B. On a regular way purchase or sale basis, available-for-sale financial assets are recognized and derecognized using trade date accounting.
- C. Available-for-sale financial assets are initially recognized at fair value plus transaction costs. These financial assets are subsequently remeasured and stated at fair value, and any changes in the fair value of these financial assets are recognized in other comprehensive income. Investments in equity instruments that do not have a quoted market price in an active market or derivatives that are linked to and must be settled by delivery of such unquoted equity instruments and whose fair value cannot be reliably measured are presented in "financial assets measured at cost".

(3) Loans and receivables

A. Accounts receivable

Accounts receivables are receivables due from customers for the goods sold or services rendered in the ordinary course of business. Accounts receivables are initially recognized at fair value and subsequently measured at amortized cost using the effective interest method, less provision for impairment. However, non-interest bearing, short-term accounts receivables are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

B. Investments in debt instruments without active market

- (A) Investments in debt instruments without active market are loans and receivables not originated by the entity. They are bond investments with fixed or determinable payments that are not quoted in an active market, and also meet all of the following conditions:

- a. Not categorized as at fair value through profit or loss;
- b. Not designated as available-for-sale;
- c. Not for which the holder may not recover substantially all of its initial investment, other than because of credit deterioration.

- (B) On a regular way purchase or sale basis, investments in debt instruments without active market are recognized and derecognized using trade date accounting.

- (C) Investments in debt instruments without active market are initially recognized at fair value on the trade date plus transaction costs and subsequently measured at amortized cost using the effective interest method, less provision for impairment. Amortization of a premium or a discount on such assets is

recognized in profit or loss.

(4) Impairment of financial assets

- A. The Company assesses at balance sheet date whether there is objective evidence that an individual financial asset or a group of financial assets is impaired as a result of one or more events that occurred after the initial recognition of the asset (i.e., a "loss event") and that loss event (or events) has an impact on the estimated future cash flows of the individual financial asset or group of financial assets that can be reliably estimated.
- B. The criteria that the Company uses to determine whether there is an impairment loss is as follows:
  - (A) Significant financial difficulty of the issuer or debtor;
  - (B) A breach of contract, such as a default or delinquency in interest or principal payments;
  - (C) The Company, for economic or legal reasons relating to the borrower's financial difficulty, granted the borrower a concession that a lender would not otherwise consider;
  - (D) The possibility that the debtor will enter bankruptcy or other financial reorganization has significantly increased;
  - (E) The disappearance of an active market for that financial asset because of financial difficulties;
  - (F) Observable data indicating that there is a measurable decrease in the estimated future cash flows from a group of financial assets since the initial recognition of those assets, although the decrease cannot yet be identified with the individual financial asset in the group, including adverse changes in the payment status of borrowers in the group or national or local economic conditions that correlate with defaults on the assets in the group;
  - (G) Information about significant changes with an adverse effect that have taken place in the technology, market, economic or legal environment in which the issuer operates, and indicates that the cost of the investment in the equity instrument may not be recovered; or
  - (H) A significant or prolonged decline in the fair value of an investment in an equity instrument below its cost.
- C. When the Company assesses that there has been objective evidence of impairment and an impairment loss has occurred, accounting for impairment is made as follows according to the category of financial assets:
  - (A) Financial assets measured at amortized cost

The amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the financial asset's original effective interest rate, and is recognized in profit or loss. If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment loss was recognized, the previously recognized impairment loss is reversed through profit or loss to the extent that the carrying amount of the asset does not exceed its amortized cost that would have been at the date of reversal had the impairment loss not been recognized previously. Impairment loss is recognized and reversed by adjusting the carrying amount of the asset directly.

(B) Financial assets measured at cost

The amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at current market return rate of similar financial asset, and is recognized in profit or loss. Impairment loss recognized for this category shall not be reversed subsequently. Impairment loss is recognized by adjusting the carrying amount of the asset directly.

(C) Available-for-sale financial assets

The amount of the impairment loss is measured as the difference between the asset's acquisition cost (less any principal repayment and amortization) and current fair value, less any impairment loss on that financial asset previously recognized in profit or loss, and is reclassified from other comprehensive income to profit or loss. If, in a subsequent period, the fair value of an investment in a debt instrument increases, and the increase can be related objectively to an event occurring after the impairment loss was recognized, such impairment loss is reversed through profit or loss. Impairment loss of an investment in an equity instrument recognized in profit or loss shall not be reversed through profit or loss. Impairment loss is recognized and reversed by adjusting the carrying amount of the asset directly.

2. The reconciliations of carrying amount of financial assets transited from December 31, 2017 under IAS 39, to January 1, 2018 under IFRS 9, were as follows:

	Available-for-sale equity	Held-to-maturity	Effects

- (1) Financial assets classified as "other current assets" amounted to \$7,000,000 under IAS 39, as the cash flows met the condition that they are intended to settle the principal and interest on the outstanding principal balance and the Company held those assets to collect contractual cash flows, they were reclassified as "financial assets at amortized cost" of \$7,000,000 upon the initial application of IFRS 9.
- (2) Equity instruments classified as "available-for-sale financial assets and financial assets measured at cost" amounted to \$2,204,770 and \$105,789 respectively, under IAS 39, as they were not held for trading, they were reclassified as "financial assets at fair value through other comprehensive income (equity instruments)" of \$2,310,559 and retained earnings and other equity interest were increased in the amounts of \$111,926 and \$111,926, respectively, upon the initial application of IFRS 9.
- (3) Equity instruments classified as "available-for-sale financial assets and financial assets measured at cost" under IAS 39 are required to be classified as "financial assets at fair value through other comprehensive income (equity instruments)" under IFRS 9. The Company did so and resulted in an increase in investment accounted for under the equity method by \$2,436,549, an increase in retained earnings by \$741,375, and an increase in other equity by \$1,471,322.
- (4) Equity instruments classified as "available-for-sale financial assets and financial assets measured at cost" under IAS 39 are required to be classified as "financial assets at fair value through profit or loss" under IFRS 9. The Company did so and resulted in a decrease in investment accounted for under the equity method by \$733,657, an increase in retained earnings by \$6,456,365, and a decrease in other equity by \$7,190,022.
3. The significant accounts as of December 31, 2017 and for the year then ended are as follows:
- (1) Financial assets and liabilities at fair value through profit or loss

- A. For the year ended December 31, 2017, the Company recognized a net loss of \$29,090,567 (shown as “Other gains and losses”) for financial assets and liabilities held for trading.
- B. The counterparties of the Company are financial institutions with good credit quality.
- C. The transaction and contract information of non-hedging derivative financial assets and liabilities are as follows:

### (1) Cross currency swap contracts

The cross currency swap contracts signed by the Company are to fulfill capital movement. For exchange rate, principals denominated in two currencies are exchanged at the same exchange rate at the initial and final exchanges. Thus, there is no foreign exchange risk. For interest rate, the fixed rate between two currencies is used to exchange. Thus, there is no interest rate risk.

### (2) Foreign exchange forward contracts

The Company enters into foreign exchange forward transactions to hedge the following risk of exchange rate:

- A. Operating activities: Proceeds derived from import of raw materials and export sales.
- B. Investing activities: Proceeds derived from import of machinery and equipment
- C. Financing activities: Long-term and short-term foreign currency assets and liabilities (financing)

### (3) Structured products

All of the structured products of which the Company entered into agreements with financial institutions pertain to hybrid financial

products which are principal guaranteed. The abovementioned agreements in whole are designated as “financial assets at fair value through profit or loss” upon initial recognition.

- D. The Company has no financial assets at fair value through profit or loss pledged to others.

(2) Available-for-sale financial assets

Item	<u>December 31, 2017</u>
Non-current items:	
Listed stocks	\$ 1,785,634
Adjustment for valuation of available-for-sale financial assets	419,136
Total	<u>\$ 2,204,770</u>

A. The Company recognized other comprehensive income for fair value change for 2017. Please refer to Notes VI(XVIII) for details. The amount reclassified from equity to profit or loss was a gain of \$63,637,627.

B. On December 29, 2017, the Company recognized gain on disposal of preferred C stock shares without voting rights of Sharp Corporation totaling \$63,029,726 (JPY 252,490,715 thousand). The consideration for the disposal of 1,136,363 shares was \$93,128,046 (JPY352,490,712 thousand), which is due in eight installments over two years beginning from the settlement date.

As of December 31, 2017, the receivables arising from the disposal amounted to \$93,128,046 (shown as “other receivables - related parties” and “other non-current assets”).

(3) Other current assets+

Item	<u>December 31, 2017</u>
Time deposits with maturity over three months	<u>\$ 7,000,000</u>

(4) Financial assets measured at cost

Item	<u>December 31, 2017</u>
Non-current items:	
Unlisted stocks	<u>\$ 105,789</u>

A. According to the Company intention, its investments in above equity instruments should have been classified as “available-for-sale financial assets”. However, as the above equity instruments are not traded in active market, and no sufficient industry information of companies similar to the above companies or no financial information of the above

companies can be obtained, the fair value of the investment in above equity instruments cannot be measured reliably. Accordingly, the Company classified those stocks as ‘financial assets measured at cost’.

- B. As at December 31, 2017, no financial assets measured at cost held by the Company were pledged to others.
4. Credit risks as at December 31, 2017 and for the year then ended are as follows:
- A. Credit risk refers to the risk of financial loss to the Company arising from default by the clients or counterparties of financial instruments.
  - B. According to the Company’s credit policy, each local entity in the Group is responsible for managing and analyzing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. The internal risk control assesses customers’ credit quality by taking into account their financial position, historical experience, and other factors.
  - C. Individual risk limits are set by the Board of Directors based on internal or external ratings. The utilization of credit limits is regularly monitored. Major credit risk arises from credit risks of cash and cash equivalents, derivative financial instruments, deposits at banks and financial institutions, investments on short-term wealth management products of banks and financial institutions, and other financial instruments. The counterparties are banks with good credit quality and financial institutions with investment grade or above and government agencies, so there is no significant compliance concerns and credit risk.
  - D. The aging analysis of notes receivable and accounts receivable (including related parties) that were past due but not impaired is as follows:

	December 31, 2017
Up to 30 days	\$ 9,525,604
31-90 days	13,310,615
91-180 days	1,966,660
181-360 days	1,284,985
Over 361 days	87,909
	<hr/>
	\$ 26,175,773

- E. Analysis of the Company’s allowances for doubtful accounts arising from impaired accounts and notes receivables (including related parties) is provided as follows:
- (1) As of December 31, 2017, the Company’s impaired accounts receivable were \$3,203,260.

(2) Movements of allowances for doubtful accounts for items individually assessed for impairment are as follows:

	2017
January 1	\$ 3,203,260
Amounts provided for the current period	-
December 31	<u>\$ 3,203,260</u>

F. The credit quality of notes receivable and accounts receivable (including related parties) that were neither past due nor impaired is as follows based on the Company's credit quality control policy:

	December 31, 2017
Group 1	\$ 577,264,443
Group 2	40,225,803
Group 3	20,187,360
Group 4	7,509
	<u>\$ 637,685,115</u>

- Group 1: Standard Poor's, Fitch's, or Moody's rating of A-level, or rated as A-level in accordance with the Company's credit policies for those that have no external credit ratings.
- Group 2: Standard Poor's or Fitch's rating of BBB, Moody's rating of Baa, or rated as B or C-level in accordance with the Company's credit policies for those that have no external credit ratings.
- Group 3: Standard Poor's or Fitch's rating of BB + and below, or Moody's rating of Ba1 and below.
- Group 4: Rated as other than A, B, or C in accordance with the Company's credit policies for those that have no external credit ratings.

(V) Effects of initial application of IFRS 15 and details on the application of IAS 11 and IAS 18 for the year ended December 31, 2017

1. The significant accounting policies applied on revenue recognition for 2017 are set out below.

Sales revenue

The Company manufactures and sells electronic products. Revenue is measured at the fair value of the consideration received or receivable, taking into account business tax, returns, rebates and discounts for the sale of goods to external customers in the ordinary course of operating activities. Revenue arising from the sales of goods is recognized when the Company has delivered the goods to the customer, the amount of sales revenue can be measured reliably and it is probable that the future economic benefits associated with the transaction will flow to the entity. The delivery of goods is completed when the significant risks and rewards

of ownership have been transferred to the customer, the Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold, and the customer has accepted the goods based on the sales contract or there is objective evidence showing that all acceptance provisions have been satisfied.

2. The revenue recognized by using above accounting policies for 2017 is as follows:

	2017
Electronic products (including electronics parts and components)	\$ 3,118,085,676

3. There would be no significant effects on the line items presented on current balance sheets and comprehensive income statements had the Company continued adopting above accounting policies for 2018.

Note 1: Code of general ledger account is "investments accounted for under equity method".

Note 2: Code of general ledger account is "financial assets at fair value through Other Comprehensive Income". The disposal gain or loss would be reclassified from "Other Comprehensive Income" to "Retained Earnings".

Note 3: Code of general ledger account is "financial assets at amortized cost". The disposal gain and loss is from interest income.

Note 4: Code of general ledger account is "financial assets at fair value through profit or loss". Due to adoption of IFRS, it would be valued at fair value rather than recognised disposal gain or loss.

Note 5: The financial instruments meet the offsetting criteria of IAS 32. Financial assets and liabilities are offset and reported in the net amount in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

Note 6: The total amount of the Group's acquisition or sale of the same security is reaching NTS300 million or more.

Note 7: Fill in the columns the counterparty and relationship if securities are accounted for under the equity method; otherwise leaves the columns blank.

Note 8: The counterparty is a subsidiary of the Company.

Note 1: The information of transactions between the Company and the consolidated subsidiaries should be noted in "Number" column.

(1) Number 0 represents the Company.

(2) The consolidated subsidiaries are numbered in order from number 1.

Note 2: The transaction relationships with the counterparties are as follows:

(1) The Company to the consolidated subsidiary.

(2) The consolidated subsidiary to the Company.

(3) The consolidated subsidiary to another consolidated subsidiary.

Note 3: The prices and terms to related parties were not significantly different from transactions with third parties, except for particular transactions with no similar transactions to compare with. For these transactions, the prices and terms were determined in accordance with mutual agreements.

Note 4: In calculating the ratio, the transaction amount is divided by consolidated total assets for balance sheet accounts and is divided by consolidated total revenues for income statement accounts.

Note 5: For balance sheet accounts, transactions exceeding 1% of the consolidated total assets should be disclosed; for income statement accounts, transactions exceeding 1% of the consolidated total revenue should be disclosed. All the transactions had been eliminated when preparing consolidated financial statements.

Note 6: Above transactions with related parties were based on the financial statements of the company for the same period which was audited by independent accountants.

Furthermore, the project hopes to increase overall efficiency and reduce costs by increasing manufacturing capacity and efficiency, assists in R&D; design; electronic equipment manufacturing and the optimization of processes, to strive for stability whilst maintaining innovation.

## **E. Investment Policy, Cause of Profit/Loss and Future Investment Plans:**

### **(1) Policy for Recent Investments:**

Investment Policies are aligned to increase manufacturing capacity, and to aid in the Company's revenues and profits.

### **(2) Cause of Profit/Loss for Investments:**

The Company's 2018 investment income accounted for under the equity method was NT\$90,771,444,000, mainly due favorable operations in invested overseas companies.

### **(3) Future Investment Plans for the Coming Year:**

The Company's long-term investment strategy is one of prudence, and will be in correlation with market and capacity needs. The Company will continue our commitment to strengthening global competitiveness.

## **F. Risk Assessment**

### **(1) Effect of Changes in Interest Rate, Foreign Exchange and Inflation on Corporate Finance, and our Countermeasures.**

#### **(a) Interest Rates**

##### **Interest Rate Changes from 2018 to as of Today**

- USD: To maintain the economic recovery of the United States, the Federal Reserve have increased interest rates by 0.25% in 2018/3/22, 2018/6/14, 2018/9/27 respectively. The current policy for interest rates is 2.25~2.5%. The governmental bond yield rates for the 10-year period have been affected negatively by the interest rate hikes, and also the earlier-than expected conclusion of balance sheet reductions. Thus, the government bond yield rates have fallen from 3.248% highs from last October to the current levels of 2.594%.
- JPY: Since 2016/1/29, in order to continue the boost to Japan's economy and recover from the long-term deflation, the Bank of Japan has continued to maintain portions of Interest Rate on Excess Reserves (IOER) at negative rates of -0.1%. On 2018/3/31, the Bank of Japan has since introduced Yield Curve Control, and sets the target for 10-year government bonds from 0%±0.1% to 0%±0.2%. Although maintaining 80 trillion Yen target for government bond buybacks, the actual amount purchased has dropped to an annual 35 trillion Yen. The yields for 10-year government bond yields have fallen from an annual high of 0.161% to the current negatives of -0.23%.
- NTD: Taiwan did not adjust interest rates last year, and as of now the rediscount rate is maintained at 1.375%. Domestically, the economic growth of Taiwan was weak, and caused 10-year Bond yields to fall from the annual 1.066% highs of January to the current 0.7528%.
- RMB: The Chinese economy is under immense pressure from the trade-war with the United States. In the past year, there have been 4 down-adjustments by The People's Bank of China to the required reserve ratio, from 17% to 14.5%, and is forecasted for a further 1% to 13.5% downgrade in January. Currently, the 1-year deposit and loan benchmark rates are maintained at 1.50% and 4.31% respectively. The

10-year bond yield rates have fallen from last January highs of 3.979% to 3.274% in October of the same year. Though throughout this year, with the resurgence of the economy and the tightening of monetary policy, the 10-year government bond yields have risen to around 3.391%, and the market predicts a lower probability of further reduction to the required reserve ratio in April.

### **Effect of the Company's Finances**

- Debt: A. The aforementioned currencies' short-term interest rates have risen overall, and is not ideal for short-term loans with floating interest rates.
- B. Previous fixed-interest financings for ordinary corporate loans are not affected by interest rate fluctuations.
- Asset: Interest rate rises are beneficial for income from the Company's short-term funds.
- Net Result: Under proper control, the "Net Interest Income" from the last two years are as follows: +NT\$ 7.56 billion for 2017 and +NT\$ 5.42 billion for 2018.

### **Countermeasures**

The current market forecasts the USD will be less likely to raise interest rates within the year, and the NTD and JPY will maintain low interest rates. Therefore, the Company will prepare various financial instruments in mid-to-long term, fixed interest rate NTD and JPY borrowings, to offset possible future risks.

### **(b) Foreign Exchange:**

#### **Foreign Exchange Changes from 2018 to as of Today**

- USD-JPY: Early last year, President Trump initiated a trade war that impacted the globe. The friction between the US-China trade war continues to shake the global financial market, and prompted an increase for risk-avoidance needs worldwide. This caused the USD to JPY exchange rate to fall below 105 in March last year. But during the middle of the same year, with the expected increase in the US's

inflation, the Federal Reserve increased its pacing for raising interest rates, and in-turn leading to a strong USD and a USD to JPY exchange rates of 114.53 in October. This brought about the continued decline of the US stock market and that reverberated across the globe, subsequently the need for risk-avoidance on the global financial scale began to rise again. USD to JPY exchange rates again fell below 105 in January of this year. Nevertheless, with the Federal Reserve's dovish monetary policies starting from early this year, no interest rate rises are expected for the year, which leads to the lowering need of risk aversion and a warming of the stock market, as a result, the USD-JPY exchange rate have since reached highs of 112.17.

**USD-TWD:** Last year the US-China trade wars impact the world, and Taiwanese exports. USD to TWD exchange rates rose from annual lows of January to the annual high of October, from 29.064 to 31.101 respectively. Nonetheless, with the recent easing of the trade war, the USD to TWD exchange rate are floating steadily around 30.800.

**USD-CNY:** The US-China trade war was detrimental to Chinese exports, the USD-TW exchange rates rose from annual lows of April last year to annual highs of October in the same year, from 6.2690 to 6.9757 respectively. With the stabilization of the trade war and global economy alike, the USD-CNY exchange rates are sitting around 6.7000.

### **Effect of the Company's Finances**

1. Attributed Profit/Loss:

(A) Pursuant to “IFRS 9 (Financial Instruments)”, profit and loss attributed to interest rates’ fluctuations should be categorized into the two following categories:

a. Profit and Loss attributed to Exchange:

Foreign Exchange related assets or debt (such as operational accounts receivable, accounts payable, financial activities related to demand [time] deposits, short [long] term loans) and the discrepancy caused by exchange are attributed to this category.

b. Financial Assets (Liabilities) Profit and Loss Valuation:

Foreign exchange related assets or liabilities generated from risk avoidance mechanisms (such as Long-term foreign exchange trading), and the profit and loss generated at fair value are listed in this category.

- (B) In order to review the Profit and Loss generated from exchange-related fluctuations, the two factors listed above should be consolidated to provide a fuller picture.

2. Profit/Loss status:

(Note: +Profit, -Loss)

Unit: NT\$100Million

Item Type	2017			2018		
	Profit/Loss attributed to Exchange	Financial Asset (Liability) Profit/Loss Valuation	Total	Profit/Loss attributed to Exchange	Financial Asset (Liability) Profit/Loss Valuation	Total
Consolidated Statement	+80.18	-214.02	-133.84	-82.24	+153.69	+71.45

3. Profit/Loss Description:

The Company has always maintained a conservative approach to risk avoidance, and stringent internal monitoring of trends and changes in foreign exchange and external financial markets. Therefore, the Company can execute risk aversion strategies accordingly, and generate profits attributed to exchange.

### **Countermeasures**

1. Fundamental Strategy:

To cater for the complicated external factors at play, the Company attempts to offset liabilities with assets, and reduce the exposure exchange-related fluctuations.

2. Risk Avoidance:

The underlying principle is to square-off the aforementioned net positions.

### **(c) Inflation**

#### **Developments in Inflation**

Import costs have risen due to rising of the international oil prices (Brent Crude has since risen from US\$ 66 per barrel to US\$ 72, a 9.09% increase) and raw materials. This has attributed to a general increase of commodity prices in Taiwan. Taiwan's CPI (YoY%) has been 1.35% last year, and is considered manageable. With prices of eggs and marine products rising this year, inflation has crept by a fraction as the average CPI (YoY%) for the past 3 months has been 0.33% comparative to the previous year. However, industrial commodities have started to climb in the first quarter of this year, and will need to be monitored closely going forward.

#### **Effect of the Company's Finances**

- A. Fundamentally, the Company is an electronics foundry, and products have a tendency to depreciate over long periods of time. However, with a unified corporate strategy, the Company has reduced costs in various processes to offset the effects of inflation.
- B. With the Company's cost-reducing measures, operating profit margin has risen from 2.39% to 2.57% from 2017 to 2018 respectively.

#### **Countermeasures**

- A. The Company will continue to its commitment to various cost-reducing initiatives as a policy, and will be more risk-averse to inflation and deflation related factors.
- B. After a period of decline, commodity prices are in a period of rebounding. The current commodity prices are tapering off, and the Company will keep a close eye on key commodities and adjust procurement strategies accordingly.

### **(2) Policies, Main Causes of Profit/Loss and Action Plans with Respect to High-risk, High-leveraged Investment, Lending or Endorsement Guarantee, and Derivatives Transactions**

#### **(a) High-risk, High-leveraged Investments**

None

**(b) Procedures for Lending Funds to Others and Countermeasures**

**(1) Policy:**

Regarding related procedures mentioned in the Company's consolidated financial reports, please refer to the related companies' "Operational Procedures for Lending Funds to Others".

**(2) Main Reasons:**

The Company's lending to legal entities listed in the consolidated financial report have short-term financing needs.

**(3) Countermeasures:**

Depending on the nature of the loan and target's procedures, the Company will undertake necessary countermeasures.

**(c) Procedures for Endorsement & Guarantees and Future Countermeasures**

**(1) Policy:**

Regarding related procedures mentioned in the Company's consolidated financial reports, please refer to the related companies' "Procedures for Endorsement & Guarantees".

**(2) Main Reasons:**

The Company's endorsement and guarantees to legal entities listed in the consolidated financial report are parent/subsidiary companies, and endorsements and guarantees are mainly financing related.

**(3) Countermeasures:**

Implement countermeasure according to the endorsement and guarantee process.

**(d) Derivatives Transactions**

**(1) Policy:**

- A. The Company and the legal entities listed in the consolidated financial report that partake in derivatives transactions will be in accordance with FSC's "Regulations Governing the Acquisition and Disposal of Assets by Public Companies" and TWSE's "Taiwan Stock Exchange Corporation Directions for Auditing Internal Control Systems of Listed Companies".

- B. As a risk avoidance principle, positions of the Company's asset or liabilities that are in actual possession or expected to be in possession will be closed. This offsets market price fluctuations as risks and risk-avoidance transactions will counteract each other, achieving stable operations.

**(2) Causes for Profit/Loss**

- A. Externally:

Political game theory, pressures of inflation and the state of the economy has placed various governments in different predicaments. Different countries have undertaken either tightening or relaxing monetary policies, creating a turbulent and unpredictable foreign exchange market.

- B. Internally:

As a principle, derivatives trading will aim to “close the underlying net positions of related hedges”, therefore when the net position incurs a loss, the derivative transaction will be counter to and gain valuation from the asset (or liability).

**(3) Countermeasures:**

- A. Stance:

1. Derivative products are a financial tool and should be judge on how the tool is utilized, to achieve what ends, and the mentality in making such decisions.
2. The Company is committed to internal controls regarding financial derivative transactions, and has implemented various principals to reduce the risks to a minimum.
3. Domestically, IFRS has implemented strict accounting regulations and guidelines regarding financial derivatives trading. The Company's procedures are in compliance and even more rigorous than related regulations.

- B. Policy:

1. With the recent flood of “Hot Money”, the financial market has been speculative and opportunistic. Various price fluctuations are neither based on fundamentals or logic. Additionally, with the hype driven by various financial institutions and media, the risk in the market has risen greatly.

2. Under these conditions, the financial derivatives and its leverage will be used more conservatively and stringently by the Company. Strategically, the Company will not be following the herd or be intimidated by external factors, and actions shall be judge on its “risk avoidance” merits.

**(3) Future Research and Development Projects and Corresponding Budget**

The Company focuses on leading in manufacturing of high-technology products. In order to do so, the Company is committed to recruiting the best R&D talents and invest heavily and efficiently in R&D. The underlying goal is to continue advanced technology development, push the envelope for manufacturing processes and mass manufacturing. The main markets range from Precision Molding; Material Technologies; Sustainable Manufacturing Technology; SMT Manufacturing Technology; Heat Transfer Technology; Plastic Processing; Metal Processing; Testing Capabilities; Automation Capabilities; Photoelectric Consolidation Technologies; Motherboard Design; E-Commerce Capabilities; Server Design; Wired and Wireless Communications; Light Display Modules; Digital Home Networks; Nanotechnology and technologies and processes related to the Company’s core competencies. **(4) Effects of Changes in Policies and Regulations on Corporate Finance and Sales and our Countermeasures**

None

**(5) Effects of Technology and Industrial Changes on Corporate Finance and Sales and our Countermeasures**

Under a knowledge-based economy, the life-cycle of the 3C (Computers/Communication/Consumer) electronic product is continually shrinking. Short, small, light, thin, efficient heat dissipation, low-noise are the inevitable trends of these products. Aesthetically pleasing industrial design, low costs are also consumers’ key requirements. In the recent years, the Company have aggressively committed R&D resources into precision machine processing; nano-precision mold processing; heat transfer technology; noise treatment; material technology; and sustainable manufacturing, and have received impressive results, both commended by the Company’s clients and end consumers. At the same time, in response to the coming trend of digital homes and consolidation of 3C products, the Company have developed strategies and dedicated resources into the field of photoelectric technologies,. The Company will continue to embrace future

market demands to meet clients' needs, and continue leading globally in eCMMS.

**(6) The Impact of the Changes of Corporate Image on Corporate Risk Management and our Action Plan**

The outstanding performance of the Company has garnered accolades from Forbes, and ranks 24<sup>th</sup> in the “Global 500” ranking; furthermore, in the Clarivate Analytics report, “2018 Top 100 Global Innovators”, the Company was one of only three Taiwanese institutions selected. This is a recognition of the dedication the Company has displayed in the past 5 years, and the influence of the Group within the information technology, international intellectual property, and innovation space.

The abovementioned accolades show that the Company not only focuses on developing sales operations worldwide, but at the same time assists in risk avoidance with strategic partners and clients; and actively participates in developing and refining corporate social responsibilities globally. The Company's risk management strategies naturally cover R&D centers and manufacturing facilities in European, American, and Asian continents. After enduring several major events, such as Taiwan's 921 earthquake; 9/11 terrorism; west coast labor strike, the Iraqi war, and diseases such as SARS; avian influenza; and H1N1, the Company has shown that its regular risk assessment and management initiatives have proved than capable. The Company will continue to simulate various large-scale events, and formulate response strategies accordingly, to protect and maximize value for all shareholders and clients.

**(7) Anticipated Results and Risks of Acquisition**

**(13) Data Security**

**(a) Data Security Committee**

The Company has established a Data Security Committee organizational structure, and are served by the top executives of business groups; the vice general manager as the vice-chairman of the committee; the top executive of IT as a standing committee member; data security manager as the director general; and the business groups' managers serve as executive managers of the committee. The committee routinely convenes review meetings, to formulate and inspect data security management targets and policy. In order to effectively implement data security policies, the data security organization has set up functional subgroups consisting of: process/operation; audit; education and training; emergency response; and is assumed by various departmental senior managers. This implementation effectively ensures the steady operation of data security management, and related committee meetings, through to execution.

**(b) Data Security Policy**

The Company's data security policy is "Maintaining the confidentiality; integrity; usability; and legality of the Company's information, and to avoid human error; sabotage; and natural disasters that may cause assets to be used improperly; leaked; manipulated; destroyed or lost, which may impact the Company's operations or interests."

Throughout the years, the Company has adhered to the Data Security Policy, and maintained regular data security education and employee data security training sessions. Furthermore, in response to the trends in global data security and in catering to customer's needs, the Company has implemented the ISO27001 data security standard in 2011, and in June of the same year passed the same certification on major information systems within the Company, the certification is valid though to July 2019. Through the implementation of the ISO27001 certification and policies of the Company, the Company effectively protects clients' data and the Company's intellectual property, and is more responsive and capable, both in metric and proficiency to deal with data security issues that may arise.

The Company is committed to take charge of exposures to potential data security issues through implementing the Data Security Policy; Response Mechanisms; and Soft and Hardware technologies. However, considering data insurance is a new field, the Company have employed professional insurance brokerage companies to assess the Group's exposure to risk and degrees of aversion, and review relevant insurance claims institutions for matters regarding claims. After the review and relevant assessments, the Company will immediately implement data insurance, and ensure the Group's data security risk is optimally secure, protected and insured.

### **(c) Data Risk Control**

Cyber-attacks are evolving by the day, data security systems are incapable of completely blocking out every single type of cyber-attack, which can be in forms of e-mails, phishing, or brute force attacks such as DDoS. Some methods can inject malicious programs into the intranet to either destroy or steal information. Destructive methods can interrupt the Company's operations, while theft can lead to valuable operational, staff, or client information to be exposed.

The Company vigorously strategizes and implements data security countermeasures, and is committed to the continual improvement of data security environment, and lowering of related risks. The Company have formulated and implemented management policies for our data security policies; organizational duties; access control; physical environment; system development and maintenance; operational continuity; security incident management; and regulatory compliance. From a technical standpoint, the Company has deployed systems such as firewalls; intrusion detection; mail security; operation system automatic detection and updating; antivirus; internet access control; security monitoring; and weakness detection. To ensure the betterment of data security, the Company hosts half-yearly internal and external inspections conducted by professional and institutions, with aims to assess the Company's data security management systems and provide insight for areas for improvement. This report is provided directly to the Data Security Committee.

**(d) Employee Data Security Training:**

The Company provides basic data security education for new employee upon orientation, this includes education training, posters and videos to promote awareness for the issues at hand. Issues that arise from internal data security inspections are rectified by correction procedures immediately, this minimizes the risk of employees leaking company and clients' data. When external data security threats occur, the incident is to be reported immediately. These procedures create a nurturing environment for employees' data security awareness, and increases the Company's data security.

**(e) Major Cyber Attacks:**

The Company did not suffer from any major cyber-attacks in 2018.

Shenzhen Next Generation Communications Limited	<p>Logistics Equipment, Automated Testing and Testing Equipment, Non-standard Machines, Fixtures, Electronic Equipment and Modules.</p> <p>Research and Development of Communication Systems and Mobile Phones; Development of Automatic Driving Software and Systems for Smart Cars; Development of Internet-of-Things Software and Systems; 5G Sub6GHz And Millimeter-scale Wave Repeaters, Millimeter-scale Wave Antenna Modules, Communication Module Hardware, Design of Millimeter-scale Wave Radar, Smart End-user Hardware, Computer Software, Cloud Software, End-user Application Software Design, Research and Development and Sales; 5G Communication, 5G Application Data Processing and Application, Antenna, Network Technology Information, Cloud Platform Technology Research and Development, Network Technology Consulting, Technical Services; Marketing Planning, Information Technology Consulting; Domestic Trade, Import and Export of Goods and Technology.</p>
Shenzhenshi Yuzhan Precision Technology CO. , LTD	<p>Design, Sales and Maintenance of: Third-generation and Subsequent Generations of Mobile Communication Systems, Mobile Phones, Base Stations, Core Network Equipment and Network Detection Equipment and Components, New Electronic Components, Digital Audio and Video Decoding Equipment and Components, Metal / Non-Metal Products Mold; Import and Export of Goods and Technology. Production of: Third-Generation and Subsequent Generations of Mobile Communication Systems, Mobile Phones, Base Stations, Core Network Equipment and Network Detection Equipment and Components, New Electronic Components, Digital Audio and Video Decoding Equipment and Components, Metal / Non-Metal Products Mold; Warehousing Services. Technical Development, Production and Wholesale of Multi-Functional Industrial Robots, Supporting Automation Fixtures and Machining Parts; Production of Mobile Phone Parts and Mobile Communication System Parts.</p>
Shenzhen Hyper Power Information Technology Co.,Ltd.	<p>Factory Equipment System, Factory Operation Control System, Computer Software and Hardware, Information Management System, Internet-of-Things, Integrated Circuit, Electronic Product Technology Development, Technical Consulting, Technology Transfer and Technical Services; Enterprise Management Consulting, Business Information Consulting; Wholesale and Retail of Electronic Products and Parts; E-Commerce; Domestic Trade (Excluding Franchise, Exclusives, Special Control); Import and Export Operations; Multimedia Computer and Server, Data Communication Multimedia System, Commercial / Home Display, Photocopying Machine, Plastic, Wire, Hardware and Electric Material Products Operations; Digital Audio and Video System, Navigation System Sales and Services; Software Design, Development and Service; Sales and Maintenance of Commercial Electrical Appliances, Computer Hardware and Software, Communication Equipment, Daily Goods, Office Equipment, Digital Electronic Products, Precision Instruments and Equipment; Installation and Maintenance Services of Network Communication Equipment; Education and Medical Product Solutions, Video Systems, Smart Office Solutions; Self-owned Equipment Rental; Multi-Functional Machine Rental Services; Information Media Services. Cable Installation, Automatic Control Equipment Installation; Lighting Equipment Installation; Instrument and Instrument Installation; Computer Equipment Installation; Electronic Installations.</p> <p>Technology Development, Technical Services and Sales of Computers, Servers, Tablets, LCD Monitors, LCD TVs, Optoelectronic Devices, Data and Language Translators, Routers, Automotive Electronics and Related Communication Products. Mobile Phones, Projectors and Components; Import / Export Operation; Business Information Consulting; E-Commerce. Warehousing; Inspection and Maintenance of: Calculators, Servers, Tablets, LCD Monitors, LCD TVs, Optoelectronic Devices, Data and Language Translators, Routers, Automotive Electronics and Related Communication Products, Mobile Phones, Projectors and Components.</p>

Company Name	Business Scope
Shenzhen Hong Jie Fei Technology Service Co., Ltd.	Immersive Electronic Skin, Flexible Haptic Feedback, Pressure Haptics, and Wearable Devices and Related Components (Including Materials, Sensors, Transmitters, Control Management Systems, Etc.).
Hongfei Precision Technology (shenzhen) Co., Ltd.	Development, Design and Sales of Intelligent Robot System Equipment and Related Components; Intelligent Robot System Integration. Internet Information Service.
Yantian Jusda Supply Chain Management Co.Ltd.	Leases of Electronic Equipment; Domestic Trade, Import / Export Operations; Self-owned House Leasing. Development, Production and Sales of Photographic Cameras and Accessories, Multimedia Recording and Playback Machines and Accessories, Digital Audio and Video Systems.
ShenZhen AnYa Trading Co., Ltd.	Supply Chain Management and Related Supporting Services; Corporate Information Consultation; Import / Export of Goods and Technology; Domestic / International Freight Forwarding; Customs Declaration and Inspection Agency; Handling; Warehousing Services; Logistics Information Technology and Logistics Software Development, Design, Consulting, Import and Wholesale of Medical Supplies and Equipment, Cosmetics and Retail. General Freight; Domestic Express Couriers; Import and Retail of Prepackaged Food, Dairy Products (Including Infant Formula).
SHENZHEN HEALTHCONN HEALTH TECHNOLOGY CORP.	New Electronic Components, Electronic Products, Digital Products, Computer Hardware and Software and Supporting Equipment, Network Equipment, Home Appliances Sales, Technical Services and After-Sales Consulting, Installation and Maintenance Services; Merchandise Display Planning; Import of Goods and Technology; Advertising Operations.
Shenzhen Fugui Precision Industrial Co., LTD	Electronic Products, Computer Software And Hardware, Daily Provisions, Sporting Goods, Machinery And Equipment (Excluding Special Equipment), Clothing, Cosmetics Wholesale, Import And Export, Commission Agency (Excluding Auction) and Related Supporting Business (Goods does not involve the state-run trade management, involving quota, license management, and other special provisions in accordance with relevant state regulations apply); Enterprise Management Consulting; Health Management Consultation (Excluding medical behavior); Planning of Cultural Activities; Computer System Design and Technical Consultation; Business Information Consultation. Licensed Operating Project: Pre - Packaged Food, Health Food Wholesale
	Research and Development, Sales and Production of: Servers, Memory, Network Switches, Routers, IP Phones, Video Equipment, Data Terminal Equipment, Data Machines, Wireless Terminal Equipment, Automation Equipment, Data Switches, Network Controllers, Wireless Communication Equipment, Cable Communication Equipment, Communication Network Equipment, Multimedia Playback Equipment, GPS Navigator, Micro-Computer, Optical Communication Equipment, Optical Connector, Circuit Board, Machine Cabinet and Casing, Mainframe, Automation Fixtures, Metal and Plastic Products, Testing and Treatment Products, Security Products and Parts, Data Lines, Electronic Products and Parts, Computer Peripherals, Speakers and Parts, Multi-Dimensional Stereo Glasses, Gaming Consoles and Parts. Corporate Information Consultation; Data Communication Multimedia System Development. Industrial Internet Software Development; Hardware Development; Technical Services and Consulting; Enterprise Information Automation Solutions, Consulting and Training Services. Packaging Business (Excluding Printing and Publishing Operations), Warehousing Services.
	Production and Operation of: Smart Home Products and Accessories, Smart Wearables and Accessories, Research and Development, Wholesale, Import / Export of the Abovementioned Products and Related Supporting Businesses. Production and Sales of New Electronic Components, Mobile Communication Systems, Mobile Phones, Base Stations, Switching Equipment And Digital Clustering System Equipment, Electronic-specific Equipment, Test Instruments, Tooling, Digital Audio and Video Systems, the Manufacture of Parts for the Above Products. Provide After-sales Service for Self-produced Products.
	Development and Production of Digital Cameras and Key Components, Engaged in Non-Quota Authorization Management, Procurement and Export of Non-exclusive Goods. The Import / Export, Wholesale and Related Operations of the Abovementioned Products; Research and Development, Production and Operation of: Routers, Portable Media Players, GPS Navigators, Monitoring Equipment, Video Recording Devices and Accessories. Production and Operation of Various types of Plastic Hardware, Various Speakers and Parts. Production and Operation of Portable Automatic Data Processing Equipment, Portable E-Book, Remote Control, Speakers, Peripheral Equipment and Parts of the Abovementioned Products. Mobile Phone Repair Operations. Production of Smart

Company Name	Business Scope
Shenzhen Fu Lian Intelligent Manufacturing Industry Innovation Center Co., Ltd.	Watches, Smart Helmets, Smart Robots, Smart Pens, Production of Air Purifiers, Robots, Projectors, Bluetooth Speakers. All of the Above Business Scopes do not Include Navigation Electronic Map Compilation, Publishing Business, Satellite TV Broadcasting Ground Receiving Facilities and Key Components, and other Nationally Prohibited Categories, or Categories with Special Regulations.
FuGion Material Technology (ShenZhen) Limited	Research and Development and Sales of High-End Equipment and Tools; Research and Development and Sales of Mechanical Equipment and Core Components; Smart Manufacturing System and Technology Services for Solutions; Industrial Internet Platform Technology Development and Technical Services; Incubation Services and Project Investment for Technology Companies.
Shenzhen Zhanggongzhi Technology Services Co., Ltd.	Production and Operation of Potassium Cyanide; Research and Development of High-Tech Chemicals for Electronic use, Special Materials for Semiconductor Components, and Non-Ferrous Metal Composite Materials.
Innolux Automations and Intelligence Systems(Shen Zhen)co.,Ltd	Advertising Operations, Marketing Planning, Cultural Event Planning, Corporate Image Planning, Website and Mobile Software Application Design and Development; Web Design, Website and User Data Analysis; Domestic Trade, Goods and Technology Import / Export; Mechanical Equipment and Components, Sales of Mold Processing Components, Metal Processing Components, Automated Robots and Components, LED Lighting Equipment, Metal Materials, Plastic Materials, Chemical Industry Chemicals, Packaging Materials; Measuring Instruments, Welding Equipment, Construction Machinery and Accessories, Research and Development and Design Of Grinding Tools, Cutting Tools, Electric, Pneumatic and Hand Tools, Metal Products, Hardware Accessories; E-Commerce; Domestic Freight Forwarding, International Freight Forwarding; Industrial Information Technology Development; Conference Planning; Business Information Consulting; Vocational Skills Training.
SHENZHEN JINGJIANG YUNCHUANG TECHNOLOGY CO.,LTD	Internet Technology Development; Database Management; Software Technology Development; Enterprise Management Consulting; Computer Software and Hardware Technology Development, Sales; Internet Equipment Sales; Import and Export Operations; Sale of Automation Equipment;
Shenzhen Jingji Precision Machinery Trade Co., Ltd	Development, Design and Sales of Liquid Metals; Technology Development of High-end Precision Equipment and Parts; Industrial Internet Technology Research and Development, Big Data Application Technology Development, Artificial Intelligence Technology Research and Development and Sales; Precision Intelligent Manufacturing Technology Consulting; Domestic Trade; Goods and Technology Export. Development, Design, Production and Sales of: High-Speed Super-hard Tools, Micro Screw Taps, Inserts, Single Crystal and Polycrystalline Diamond Tools, High-end Combination Tools, High-end Smart Tools, and Nano-Coatings.
Shenzhen Hongzhi yun chuang Technology Co. Ltd	Domestic Trade, Import / Export of Goods and Technology; Sales of Mechanical Equipment and Components, Mold Processing Components, Metal Processing Components, Automated Robots and Components, LED Lighting Equipment, Metal Materials, Plastic Materials, Chemical Industry Chemical Materials, Packaging Materials; Technology Development a nd Sales of Computer Software; Rental of Machinery and Equipment, Home Repair; Agent Declaration, Agent Inspection, Graphic Design; Computer Design; Art Design, Packaging Design; Web Design; Advertising Operations; Exhibition Planning; Manufacturing Industrial Technology and Development, E-Commerce; Domestic Freight Forwarding, International Freight Forwarding; Marketing Planning, Conference Planning, Corporate Information Consulting, Education and Training, Information Consulting, Technology Development, Production and Sales of Automation Equipment, Industrial Robots, and Automated Components; Payment Services for Non-Financial Institutions; and Electronic Certification Services.
	Smart Equipment Software Products, New Electronic Products, Industrial Process Automation Control Systems and Devices, Computer Software and Hardware, Internet of Things Electronic Software and Hardware Research and Development, Wholesale, Technical Consulting, Technical Services, Import / Export and Related Supporting Operations; Transfer of Proprietary Technical Achievements; After-sales Service of the Abovementioned Products.

Company Name	Business Scope
System Integration Electronics (HangZhou) Co., Ltd	Development and Production of: New Electronic Components; Broadband Access Network Communication System Equipment; High-end Routers, High-end Switches, Servers and Parts of the Abovementioned Products; After-sales Service; Wholesale, Import / Export Operations of the Abovementioned Products.
LIAN FA GUANG TECHNOLOGY (SHEN ZHEN) CO., LTD	Production and Operation of 3D Sensing Modules, Camera Lens Modules, Optoelectronic Devices, Sensitive Components, Sensors, Optoelectronics-Specific Materials, Digital Cameras Modules, Precision Molds, Electronic Products, Optoelectronic Components; Import / Export of Goods and Technology (Excluding Distribution, National License-Controlled Products); Research and Development, Wholesale, Retail, Technical Consulting, Technical Services, and Advancement of the Abovementioned Products Export and Related Supporting Services; Transfer Of Proprietary Technical Achievements; After-Sales, Maintenance and Inspection Services for the Aforementioned Products;
MiiCs Business Consulting (Shenzhen),Inc.	Business Management Consulting, Economic Information Consulting, and Technology Consulting.

Kaili FuliTong International Trading Co., Ltd.	Sales, Repair and Leasing: Home Appliances, Digital TVs, LCD Modules, Mobile Phones, Electronic Whiteboards, Optical Lenses, Lens Modules, Computers, Electrical Appliances, Communication Products and Parts, Sewage Treatment Equipment and Special Materials for the Aforementioned Products, New Environmentally Friendly Energy-Saving Lamps, Digital TV Set-Top Boxes, Peripherals for Computers, Communication and Network Equipment (Except Wireless Receiving and Transmitting Equipment), Digital Audio and Video Equipment and Accessories, Digital Meters, LED Display Applications, Precision Stamping Molds, Precision Cavity Molds, Standardized Mold Parts and Spares; Sales of Daily Goods, Textiles, Clothing, Shoes and Hats, Hardware, Electricity, Toys, Backpacks, Stationery, Sporting Goods, Outdoor Products, Arts and Crafts (Except Cultural Relics), Glasses, Food; Electronic Technology Consulting, Advertising Design, Production, Agency, Publishing, Goods, Import / Export Operations of Technology. Wholesale, Import / Export of Related Products of the Aforementioned and Related Supporting Operations.
Innovative & Intelligent Factory Accelerator (Shenzhen) Co., Ltd	Technology Incubator Services; Venture Capital Business; Agency of other Venture Capital Enterprises and other Institutions or Individuals' Venture Capital Businesses; Venture Capital Consulting Business; Provide Entrepreneurial Management Services for Start-up Enterprises; Establishment of Venture Capital Enterprises and Venture Capital Management Advisory Bodies; Conference Services; Scientific Research Information Consulting, Industrialization Supporting Services; Business Management Consulting; Economic Information Consulting; Market Research; Property Leasing, Property Management.
FORTUNE PRECISION OPTICS CO., LTD.	Management Consulting Services, Computers and Computing Peripheral Equipment; Economic Information Consulting; Wholesale of Computing and Business Machinery Equipment. Retail sale of Computing and Business Machinery Equipment. Photographic and Optical Equipment Manufacturing, Die Manufacturing, Wholesale of Precision Instruments. Retail Sale of Precision Instruments. Product Designing, International Trade.
Foxconn (KunShan) Computer Connector Co., Ltd.	Development, Production and Processing of Computer and Peripheral Equipment; Server, Mobile Phone and Network Communication Equipment; Audio-Visual Equipment, and New Electronic Components such as Electromechanical Components and Optoelectronic Devices for Automotive Electrical Systems, Add-on Programs for Game Console (Excluding the Whole Machine), Instrumentation Add-on Programs and other New Instrument Components, Precision Die, Precision Cavity Mold, Standardized Mold Parts; Wiring and Cable Components; Plastic Pellets and its Recycling; Solar Photovoltaic Cell Parts; The Production of: Power Adapters, Communication Transformers, Static Converters, Batteries (Batteries), Testing Equipment and the Development of Parts and Related Software of The Above Products, Metal and Plastic Products, Packaging Materials, Detection of Electronic and Electrical Components, Environmentally Hazardous Substances, Calibration and Maintenance of Measuring Instruments, Plastic Dyeing, Color Adjustment, Modification, Processing, Provision of Related Technologies, Management Consulting; Sales of the Company's Products.

Company Name	Business Scope
Foxconn (NanJing) Software Co., Ltd.	Development, Production and Sales of Computer Software Products; Development, Research and Sales of Digital Products; Software Systems Planning and related Product Development, Research and Integration Planning; Computer Software Technology Research, System Adoption Consulting Services, Software Outsourcing Work (Or Processing), Software Testing, Computer and Communication Equipment Rental; Computer System Integration, Network Information Consulting Management and Digital Content Design; Office Equipment Maintenance. Wholesale and Import / Export Business of Producing Similar Category Products and Expendable Materials for Computer use.
Foxconn Shenyang Precision industry Co., Ltd.	Licensed Business Scope: None General Business Scope: Production and After-sales Service of LCD TVs and Related Components, Automotive Electronic Components, LED Lights; Lease of Self-Owned Factories.
Foxconn Industrial Internet Co., Ltd.	Industrial Internet Technology Research and Development; Communication System Research and Development; Enterprise Management Services; Import / Export of Electronic Products and Parts and Related Supporting Operations.
Foxconn Electronic Industry Development (Kunshan) Co., Ltd.)	Develop, Produce and Process New Electronic Components: Connectors, Cable Components, Optoelectronic Devices, Etc. for use in Computers and Computer Peripherals, Servers, Mobile Phones and Network Communication Equipment, Audio-visual Equipment, and Automotive Electrical Systems. Components, Precision Molds and Parts of the Abovementioned Products, Sales of The Company's Products.
Foxconn Precision Components (ShenZhen) Co., Ltd.	Production and Operation of Electronic Computer Parts and Peripheral Equipment and Add-on Programs, New Electronic Components and Power Electronic Components, New Instrument Components and Materials, Precision Molds and Accessories, New Display Devices, Game Consoles, Micro-Computers and Related Parts. 100% Export of Products. Additionally: Development, Production and Operation of DVD-only CD-ROM Drive, CD Players and Related Components; CD-Reading CD Player, CD Player and Related Components; DVD Playback Machine, Portable DVD Player Products and Related Components.
Foxconn Precision Electronics (TaiYuan) Co., Ltd.	After-Sales Service of Self-produced Products, Self-owned Property Lease. Development, Production and Processing of New Electronic Components, Mobile Communication Systems and Digital Clustering Systems and Components, Electronic Product Testing Instruments, Digital Camcras and Key Components, Third-Generation and Subsequent Generations of Mobile Communication Systems, Mobile Phone Networks, Core Network Devices and Networks Testing Equipment and Molds related to the Abovementioned Products, Related Technical Consultation and After-sales Service, Sale of the Company's Own Products; import / Export Operations of related Products; Various Mobile Phone Repair Business; LED Display Screen Production, Installation, Maintenance Business; Mobile Phone Motherboard Repair Business.
Foxconn Precision Electronics (YanTai) Co., Ltd.	Development, Production and Processing of New Electronic Components, Mobile Communication Systems, Base Stations, Switching Equipment and Digital Clustering System Equipment and Components, Electronic Product Testing Equipment, Digital Cameras and Key Components and Molds Related to the above Products, Assembly of LCD TV Sets and Digital TV Sets, Related Technical Consultation and After-sales Service, Sale of the Company's Own Products; Providing Contract Energy Management Services, Wholesale Operations of New Environmentally-friendly and Energy-Saving Lamps; Development, Design, Production, Processing, Sales of Electric / Non-Electric Bicycles.
Fuyou Wande Trading Limited Company	Retail of Prepackaged Food, Design, Development and Technical Services of Electronic Smart Vending Systems; Domestic Advertising Design, Production, Publishing, Agency; Technical and Operational Services of Video Products; Mobile Phone Number and Recharge Services; Sales and Import / Export of Electronic Products; Wholesale and Retail of Vending Systems and Accessories; Wholesale and Retail of Water Machines and Smart Home Appliances.
FOCAL TECH CO., LTD.	Wired Communication Equipment and Apparatus Manufacturing. Telecommunication Equipment and Apparatus Manufacturing. Computers and Computing Peripheral Equipments Manufacturing. Wholesale of Computing and Business Machinery Equipment. Wholesale of Telecom Instruments. Wholesale of Computer Software. Retail sale of Computing and Business Machinery Equipment. Retail Sale of Telecom Instruments. International Trade. Management Consulting Services. Software Design Services. Product Designing. Restrained Telecom Radio Frequency Equipments and Materials Import. Retail Sale of

Oyeze Internet Technology (Shenzhen) Co., Ltd.	Technology Development and Technical Consultation relating to Internet and Electronic Technology; Advertising Operations, Conference Planning, Exhibition Planning, Development and Sales of Computer Software and Hardware, Computer System Integration, Web Design, Computer Graphic Design and Production, Art Design.
Pan Zhou Fu Gui Kang Precision Electronic Co. Ltd.	Research and Development, Production and Sales of LCD TVs, Digital TVs, LCD Modules, Electronic Whiteboards, Precision Optical Lenses, Optical Components, Glass Components, Lens Components, Camera Modules, Smart Monitoring Devices, Large Computers, Portable Computer, Desktop Computer, Multimedia Data Processors, Mobile Communication System and Equipment, New Electronic Components, Video Wall, New Energy, Energy-Saving Products, LED Lamps, Solar Lighting Systems, Smart Lighting Poles, Smart-Multimedia Network Machines, New Game Console , Electronic Digital Products and Supporting Products of the Abovementioned Products and Related Parts, Software and Hardware Application Systems Integration, After-sales Maintenance Services, Research and Development, Manufacturing, Testing, Installation, Maintenance of LED Display Products. Energy-Saving Renovation of Lighting Systems, Urban Lighting Smart-Control Systems, Contract Energy Management EMC. Wholesale, Import / Export of Related Product Categories of the above Products and Related Supporting Operations.
FOXNUM TECHNOLOGY CO., LTD.	Machinery and Equipment Manufacturing. Electric Appliance and Audiovisual Electric Products Manufacturing. Computers and Computing Peripheral Equipments Manufacturing. Ship and Parts Manufacturing. Automobiles and Parts Manufacturing. Motor Vehicles and Parts Manufacturing. Bicycles and Parts Manufacturing. Product Designing. International Trade.
ZhenZhou GDS Information&Technology Co., Ltd.	Computer Software Development, Consulting, Services; Wholesale and Retail of: Computers and Accessories, Instrumentation, Electronic Products, Digital Products, Communications Equipment, Office Equipment, Security Monitoring Equipment, Home Appliances, Daily Goods; Operations Relating to Import / Export of Goods and Technology.
ZhengZhou Fulianwang Electronic Co., Ltd.	Sales of New Electronic Components, Electronic Products, Digital Products, Computer Hardware and Software and Supporting Equipment, Network Equipment, Home Appliances; Merchandise Display, Information Technology Services and After-sales Consulting Installation and Maintenance Services; Import / Export of Goods and Technology Business; Advertising; Housing Rental.
Zhengzhou FIH Communication Technology Co., Ltd.	Mobile Communication Systems, Mobile Phone Research and Development; Research and Development and Testing of Computer and Mobile Phone Software and Hardware, System Integration, Application Services, Technical Services; Sales and Technical Services of Mobile Phones, Network Cards, Tablet Computers, Communication Modules and Software.
Zhengzhou Yongyang Testing Services Co., Ltd	Inspection and Inspection Technical Services and Related Technical Consulting Services; Research and Development of Inspection and Testing Equipments, Technologies and Methods; Sales and Maintenance of Testing Equipments.
Zhengzhou Jusda Logistics Co., Ltd	Freight Station Operations (Warehousing Services, Freight Forwarding, Freight Agency); Self-Inspection; Domestic Trade; Import / Export of Goods and Technology; Trade Consulting Services; Maintenance and Testing of Electronic Products and Components.
Zhengzhou Jusda Industrial Park Development Co., Ltd.	Warehousing Facilities and Related Supporting Facilities, Construction, Operation and Management of Industrial Facilities, Related Consulting Services; Supply Chain Management; Warehousing Services; International Freight Forwarding; General Freight Logistics; Customs Declaration and Inspection Agency; Import / Export of Goods and Technology; Online Sales Of Products, Food, Etc.; Technical Research and Development, Design and Consultation of Logistics Information Consulting and Logistics Software; Wholesale, Import / Export of Medical Equipment and Devices. Cosmetics and Prepackaged Foods.
